## NAPANEE BOOMS

**What is the Matter with  
Napanee? She is all  
Right.**

This would about summerize the  
feeling of the citizen of our progres-  
sive town who keeps his eyes open  
this spring! Every mechanic and  
workman in town is working full time  
and getting good wages. Hardly a  
house to rent in the town, rents are  
advancing and the demand for resi-  
dences, fitted with all modern im-  
provements, have given numerous con-  
tracts to our three firms of plumbers  
and gas fitters. The extension of the  
water works mains and the gas pipes  
have given the chance long looked for  
to put in these conveniences.

The town council have decided to  
build extending new sewers on John  
street and West Dundas, in a manner  
to accommodate citizens on those  
streets and so the work multiplies and  
the town grows. Should the main  
trunk sewer be carried when voted upon  
this fall, there will be a further  
stimulant to building and improve-  
ments.

We are giving below a few of the  
building operations that we have  
noticed out of the many that are under-  
way or projected:

Campbell House barn; Daly Tea Co.  
office; C. A. Anderson & Son, livery;  
Dr. Chas. Wilson, residence; Dr. Mil-  
sap, residence; T. G. Carscallen, pro-  
posed residence; V. Kouber, store;  
Merchants Bank, new office; Geo. A.  
Thompson, additions and improve-  
ments to residence; Bay of Quinte  
Ry, new station and freight sheds and  
yards; New Skating Rink, proposed;  
James Young, improvement to resi-  
dence; The estate of J. Aylesworth,  
repairing store and new front (McIn-  
tosh Bros.); J. L. Boyes, repairing  
shop; Improvement to the Church of  
St. Mary Magdalene; Extensions to  
the water works systems; C. H. Spencer,  
new store; R. J. Wales, improve-  
ments to property on Roblins Hill;  
Royal Hotel, new sheds; U. M. Wilson,  
improvements to property; Uriah Wil-  
son, improvement to houses; New  
vault and chapel at Riverside  
Cemetery.

Thus fully \$300,000 or more is being  
spent here this year and if this were  
the case in a western town or any  
other town but Napanee every citizen  
would be on his house top crowing of  
the great town he lived in. Why, oh  
why, should we not be proud of Nap-  
anee, the best business and residential  
town in Canada? We have more  
musical and literary talent than any  
place between Toronto and Montreal;  
the best schools, stores, churches and  
residences, and because we are so ac-  
customed to it all, why we take it for  
granted but tell it abroad. Cry out  
our merit any and everywhere you go  
on your summer outing. Tell every  
body we are alive at home.

The Canadian Northern Railway has  
about decided to run its main line  
through Napanee and in a few months  
the government are to dredge the  
river. Then real estate values will  
nearly double. Keep it going, and  
every body help to prove that Napanee  
in reality is all right.

Saturdays and Wednesdays Too.

Every Wednesday as well as Satur-  
day during July and August, owing to  
it being a half holiday, we will sell

## NEWS NOTES.

Hon. W. R. Motherwell estimates a  
crop of six million bushels of wheat for  
Saskatchewan.

A man named Doherty was killed by  
a companion in a drunken brawl at  
Philipsburg, Que.

John McDevitt and John Hunter  
were killed at the Canadian Northern  
station at Beaverton.

A Japanese steamer went down off  
the coast of Korea, and only 40 per-  
sons out of 246 were saved.

W. A. Sanderson's jewellery store at  
Peterboro' was robbed of \$3,500 worth  
of watches, rings and diamonds.

Gananogue cheesemen will have to  
charter a boat to take their goods to  
Brockville owing to the G. T. R. strike.

Westbrook & Hacker's brewery at  
Brantford was burned and the Empire  
Hotel at Brandon was badly damaged  
by fire.

Nearly forty persons are reported to  
have met death in a terrific cyclone  
that swept over Italy in the vicinity  
of Milan.

Over nineteen thousand workmen in  
the building trades in Chicago will go  
on strike unless their employers grant  
their demands.

Mrs. T. Columbus, who died at Pene-  
tanguishene at the age of 100 years,  
claimed to be a descendant of Christo-  
pher Columbus.

Erwin Wider, cashier of the Russo-  
Chinese Bank in New York, is missing  
as are also stocks and securities ap-  
proximating \$600,000.

A Grand Trunk engineer discovered  
the spikes pulled out of the ties in a  
stretch of track about one hundred feet  
long east of Brockville.

Canadian Northern carmen at Win-  
nipeg have appealed to the Provincial  
Government and the Board of Control  
for assistance in settling the strike.

On Saturday, at St. Ola, Peter Fra-  
ser, who resides in the northern part  
of Hastings county, was fined \$20 and  
costs for killing a deer out of season.

It is reported that the Provincial  
Government has granted a charter for  
a railway into the Porcupine district  
to Mr. Robert Shillington, M. P. P.,  
and some associates.

Wabash employees on the division  
between Detroit and Buffalo who went  
on strike with the G. T. R. men have  
returned to work, their differences  
having been adjusted.

Officials of the customs department  
have come to the conclusion that there  
is nothing in the statutes to prevent  
the entry into Canada of films of the  
Jeffries-Johnson fight.

The grand encampment and grand  
lodges of the Independent Order of  
Oddfellows, and also the Rebekah As-  
sembly of Ontario will hold their an-  
nual session in Toronto during the week  
of August 8th.

A workman on the National Trans-  
continental Railway west of La Tuque  
tried to open a can of explosive with  
an axe. An explosion resulted, ten or  
eleven men were killed and several  
others injured.

Mr. R. H. Campbell, chief of the For-  
estry Branch, blames the Canadian  
Northern Railway for the fires in Sas-  
katchewan and Alberta, stating that  
the company disregarded orders to  
clean up its right of way.

The marriage of Miss Goyer of King-  
ston to Mr. Agnew of Montreal, which  
was annulled by the Quebec courts on

# By-Law No. 3.

Re Mohawk Skewer and Dowel Company, Limited.

Whereas the Head Office of Mohawk Skewer and Dowel Company, Limited, now is at the Town of Deseronto, in the County of Hastings, and province of Ontario.

AND WHEREAS it has been deemed expedient that the same should be changed to the City of Toronto, in the County of York, in the said province.

Therefore Mohawk Skewer and Dowel Company, Limited, enacts as follows:—

1. That the Head Office of Mohawk Skewer and Dowel Company, Limited, be and the same is hereby changed from the Town of Deseronto in the County of Hastings, to the City of Toronto, in the County of York.

2. That this By-law be submitted with all due despatch for the sanction of the shareholders of the company at a general meeting thereof to be called for considering the same. Passed this 26th day of July, A. D. 1910.

Sgd. J. F. WILLS,

President.

(SEAL)

Sgd. W. S. MORDEN,

Secretary.

# EXECUTORS' NOTICE TO CREDITORS.

In the estate of Robert Thompson deceased.

Notice is hereby given pursuant to Chapter 129, of the Revised Statutes of Ontario, section 38, and amending acts, that all persons having any claims or demands against the estate of Robert Thompson, late of the Town of Napanee, in the County of Lennox and Addington, Commission Merchant, deceased, who died on or about the 18th day of April, A. D. 1910, are required to deliver or send by post prepaid to John English, Esq., Napanee, Ontario, solicitor for the executors of the last will and testament of the said Robert Thompson, deceased, on or before the 13th day of August, A. D. 1910, their christian and surnames, addresses and descriptions, with full particulars of their claims or demands duly verified, and the nature of the security (if any) held by them.

And further take notice that after the said 13th day of August, A. D. 1910, the said executors will proceed to distribute the assets of the said estate amongst the parties entitled thereto having regard only to the claims or demands of which they shall then have received notice, and will not be responsible for the said assets or any part thereof to any person or persons of whose claims or demands they have not received notice at the time of the distribution thereof.

JOHN ENGLISH, ESQ.,

Solicitor for the said executors.

Dated the 13th day of July, 1910. 31d

# EXECUTORS' NOTICE TO CREDITORS.

In the estate of George Jerry Clapper, deceased

Notice is hereby given pursuant to Chapter 129, of the Revised Statutes of Ontario, Section 38, and amending Acts, that all persons having any claims or demands against the estate of George Jerry Clapper, late of the Township of Ernestown, in the County of Lennox and Addington, deceased, who died on or about the 18th day of June, A. D. 1910, are required to deliver or send by post prepaid to HERRINGTON, WARNER & GRANGE, Napanee, Ontario, solicitors for David Roblin Bicks and Sandford Auburn Amey, executors of the last will and testament of the said George Jerry Clapper, deceased, on or before the 1st DAY OF AUGUST, A. D. 1910, their christian and surnames, addresses and descriptions, with full particulars of their claims or demands duly verified, and the nature of the security, if any, held by them.

And further take notice that after the said 1st day of August, A. D. 1910, the said executors will proceed to distribute the assets of the said estate amongst the parties entitled thereto, having regard only to the claims or demands of which they shall then have received notice, and will not be responsible for the said assets, or any part thereof, to any person or persons of whose claims or demands they have not received notice at the time of the distribution thereof.

HERRINGTON, WARNER & GRANGE,

Solicitors for the said executors.

the government are to dredge the river. Then real estate values will nearly double. Keep it going, and every body help to prove that Napanee in reality is all right.

# Saturdays and Wednesdays Too.

Every Wednesday as well as Saturday during July and August, owing to it being a half holiday, we will sell those 50c chocolates in the boxes at 25c at Wallace's Drug store.

# CENSUS OF FOREST PRODUCTS.

The census of the forest products of Canada, to be taken on 1st June, 1911, will embrace square, waney or flat timber, logs for lumber and miscellaneous products.

In the first class are included ash, birch, elm, maple, oak, pine and all other timber cut as square, waney or flat, and in the enumeration will be reported for cubic feet and value.

Logs for lumber, which are included in the second class, are in such woods as elm, hickory, hemlock, oak, pine and spruce. They will be enumerated in the census by quantities of 1,000 feet board measure, with value in the same unit.

Miscellaneous products of the forest include bark for tanning, fence posts, firewood, hoop and hop poles, masts and spars, piling, pot and pearl ashes, railroad ties, staves, stove-bolts and heading, telegraph poles (including telephone and other poles for electric wires), wood for pulp, and the furs and skins of forest animals undressed, and they will be enumerated by number or quantity and value.

The census of forest products will be taken chiefly from farmers and the lessees of timber limits.

# Wednesday half Holiday.

To complete picnic basket go to Wallace's Drug store and get a box of those matinee chocolate for 50c (equal to any 80c kind) and a Kodak. On return bring film to Wallace's to be finished up.

# CHEESE BOARD.

The regular meeting of the Cheese Board, was held in the Council Chamber, Friday last. Twenty factories boarded 1785 cheese, 1140 white, 645 colored. Bidding opened at 10 8-4 and closed at 10 15-16. Sales 485 at 10 7-8, 390 at 10 13-16 Balance sold on curb at 10 7-8. The following factories boarded:

Ash's Cholera Syrup and all of the Huffman Remedies. Wallace has them now.

The body of the late Michael Hennessey, a farmer of Wolfe Island, was found floating off Macdonald Park. Kingston, by F. J. Todd, a barber. On July 16, Hennessey and John Casey hired a boat to cross to the island, and on Sunday the 17th, the boat was found off Simcoe Island. Both men had been drowned. On Saturday last Hennessey's mother offered \$50 reward, which Todd will receive.

# The Amateur Photographers.

Can supply all their needs in the latest and best in films, papers, developers and all photographic requisites at The Medical Hall, Napanee's Largest Drug Store—Fred L. Hooper. Special attention to mail orders. Developing and printing done on shortest notice.

Mr. R. H. Campbell, chief of the Forestry Branch, blames the Canadian Northern Railway for the fires in Saskatchewan and Alberta, stating that the company disregarded orders to clean up its right of way.

The marriage of Miss Guber of Kingston to Mr. Agnew of Montreal, which was annulled by the Quebec courts on account of the bridegroom being a miner, will be taken before the Privy Council for final adjudication.

Martin Rosendahl of Stockholm, Sweden, is in Winnipeg, on his way north to see if he can find any trace of Andree, the Swedish explorer. A short time ago stories came down from the north that Indians had relics of the party.

An effort is being made to erect a memorial to the late E. J. B. Pense, in Kingston. W. D. McRae, president of the Kingston Old Boys' Association, of Toronto, suggests that the part of the McRae estate on the corner of Clarence and Brock streets be purchased and a fountain memorial erected.

There will be no issue of a new coinage bearing the effigy of King George until January. The mint will continue to stamp the coinage with the present dies until the end of the year. The new dies are being designed in England and Canada and Britain are expected to have the first coins of the new reign simultaneously.

Another merger of considerable importance to the local manufacturers is now passing through its final stages, whereby there will be an amalgamation of the chief wheel-makers of Ontario, taking in the Ontario Wheel Company of Gananoque, the Dominion Wheel company, of Lindsay, the St. Catharines Wheel company, of that city, the Benjamin Wheel company of Yarker, the Finlay Wheel company of Norwood, and it is expected the Chaplin Wheel company, of Chatham,

The minister of Labor evidently recognizes that in his position as a member of the Cabinet he is a direct representative of the people, and that in this strike difficulty the people have a very important interest. It may be that his efforts at settlement will be unavailing, owing to the limitations, statutory and otherwise, that inconvenience his movements. Whether successful or otherwise, however, he is already entitled to credit. As for the strikers and the company management it would be well for them if they would adopt in their communications with the Minister something of his directness of speech and straightforwardness in dealing. So far their chief object seems to have been to sidestep and evade the plain issue. The time has gone by for that sort of thing, if indeed there ever was a time for it.—From the Hamilton Spectator (Con.)

# S. S. Excursion.

The annual excursion of the Western Methodist Sunday School, Napanee, will be on Tuesday, August 2nd, by steamer Brockville, to Belleville and 12 o'clock party.

Fertilizer.

# An English Chemist Has Discovered How to Grow Hair.

In England the ladies have entirely abandoned wearing rats, which is due entirely to this new discovery.

It has been proven that Henna leaves contain the ingredients that will positively grow hair. That they contain this long looked for article is proven every day.

The Americans are now placing on the market a preparation containing the extract from Henna leaves, which is having a phenomenal sale.

This preparation is called Salvia, and is being sold with a guarantee to cure Dandruff and to grow hair in abundance. Being daintily perfumed, Salvia makes a most pleasant hair dressing. Mr. Jessop your druggist, is the first to import this preparation into Napanee and a large bottle can be purchased for 50c at Jessop's Pharmacy.

# EE EXPRESS

Plumbing, Steam, Hot  
Water and Hot Air  
Heating.  
M. S. MADOLE

CANADA—FRIDAY, JULY 29th, 1910

\$1 per Year in advance: \$1.50 it not so paid.

## CLOTHING CLEAN UP.

To clear out the odd lines and sizes of Men's and Boys' Suits we are making further big cuts in the prices of these lines. If your or your boy's size is among this lot you should make a special effort to get to these sacrifices.

Two only, sizes 36 and 38, Men's Two Piece Homespun Suits, price was \$8.50, now ..... **\$4.75**

Three light Tweed Suits in neat stripe patterns, patch pockets, belt, straps, etc, were \$9.00, now **\$5.25**

Four Progress Brand Suits D. B., long roll, fancy cuffs and flaps, were \$10.00, now ..... **\$6.00**

Two only, Progress Brand, three piece light weight, high grade tweed, gray in color, were \$12 now **\$7.00**

Four lots of Boys' Suits at \$1.50, 2.00, 3.00, 4.00. The prices were in most cases twice as much.

## J. L. BOYES,

On Tuesday last.  
Mrs. Annie Fahey spent Saturday at the Old Boys' reunion in Belleville.  
Miss Mary Traynor was at home to a few of her young friends on Sunday last.  
The Misses Darcey, Sisters of Charity of the Mother House at Lindsay, are visiting their father, James Darcey. C. Benoit, Cornwall, spent Sunday last with John Meagher.  
Mr. and Mrs. Wm. Alexander were with her father, John Toppings, on Sunday.

**ODESSA.**

Council met in regular session to-day. Miss Minnie Breeze opens her dress-making parlor on August 1st.  
Pipes have been laid for street watering purposes and are nearly completed and one would not think by appearance of the streets on Saturday evening that water was scarce for it laid in pools in the road.  
The Toomey touring car from Chicago is certainly a fine one.  
The strike on the G.T.R. is causing considerable annoyance to our business men.  
Preparations are being made for the laying of considerable amount of concrete walk on the south side of main street, a very much needed improvement.  
The Ernestown Rural Telephone company is pushing the completion of a new main line from Wilton to Odessa. The company now has upwards of forty miles of line built in very little over one year.

**STELLA.**

Farmers have finished haying, and some have started harvesting. The grain, potatoes, roots and corn are looking well.  
An ice cream social was held on S. L. Pringle's lawn on Saturday evening, under the auspices of St. Paul's church. A. Reid, while in his barn, oiling the car a few days ago, sustained a broken rib. The ladder on which he was standing gave way and he fell.  
Edward Scott, while binding one day last week, was crossing a ditch and was accidentally thrown off, injuring his arm.  
Mrs. John Sanders is recovering, after her recent illness.  
Rev. E. Scammel, Kingston, preached in St. Alban's and Christ churches, Emerald, on Sunday.  
W. Scott, Napanee, is summering with his family on Preston's Point. He has a telephone line running down from Stella to the Point.  
Mr. Smith, Rochester, and two children, are summering at H. S. Patterson's.  
Mrs. J. Patterson and Mrs. (Capt.) T. Sanders, have returned home from Cleveland.  
Miss Etta Strain has returned home from Buffalo.  
Visitors: Mr. and Mrs. C. Cunningham, New Westminster, B. C., after an absence of forty years, are visiting their many friends here; Capt. and Mrs. J. Sanders, Buffalo; Mr. and Mrs. W. Ada, Ottawa; Miss Tait, Campbellford; John Hamilton, Toronto; M. Crowe, Buffalo, an old resident of the island, spent a week with friends here; Mrs. Capt. N. Allen, Belleville; Mr. and Mrs. R. G. Girvin, Hamilton; Miss G. Hinton, Mrs. R. Cousins, Hugh Gibson, Kingston.

Belleville Ont., July 25.—At an early hour this morning the body of a young man was found in the River Moira, and it was later identified as Michael Horn, a call boy at the Grand Trunk station here, 19 years of age. He was last seen Friday evening. How he met his death is not known. The face was in a badly bruised condition, and it is thought he fell off the Grand Trunk bridge and drifted down the river. His pay check was in his pocket and no foul play is suspected. Corporal Yeomans decided that no inquest is necessary. The young man was lately acting as a brakeman.

**Children Cry  
FOR FLETCHER'S  
CASTORIA**

Mrs. Jas. Thompson and infant daughter are ill. It is feared they have tuberculosis trouble.  
Mrs. M. McDonald has returned home to Napanee, after some months visit with her mother, Mrs. Geo. Dunlop.  
Mrs. A. N. Blue and family have gone to Quebec to visit her mother.  
The congregation of St. Jutes church are going to give a lawn social Thursday evening, August 14th, on Lott's lawn. Everything is being done to make it a very enjoyable time for all and a howling success. An excellent programme is being prepared, some of main features being The Farmers' Brigand vaudeville, a first class Pianist to render piano selections, many local soloists among whom might be mentioned Mr. Herkimer Aylsworth, of Deseronto. All who are looking for a good time come.

Carpenters' Tools, Hand saws, Planes, Chisels, every article the best of its kind, at  
**BOYLE & SON.**

**ALEX RAY,**  
Opt. D.  
**EYE-SIGHT  
SPECIALIST**  
of Belleville  
will be at the Campbell House,  
**Napanee, Wednesday,  
August 10th,**  
from 12 o'clock noon until 7 o'clock  
of same evening.  
All forms of Bad Vision and obscure cases of Eye Strain will receive expert examination and attention.  
Prices moderate.  
Consultation Free.

**SEALED TENDERS** addressed to the undersigned, and endorsed "Tender for supplying Coal for the Dominion Buildings," will be received until 4 p. m., on Tuesday, August 4, 1910, for the supply of coal for the Public Buildings throughout the Dominion.  
Combined specification and form of tender can be obtained on application at this office.  
Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures.  
Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p. c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so or fail to complete the work contracted for. If the tender is not accepted the cheque will be returned.  
The Department does not bind itself to accept the lowest or any tender.  
By order,  
R. C. DESROCHERS,  
Asst. Secretary.  
Department of Public Works.  
Ottawa, July 6, 1910.  
Newspapers will not be paid for this advertisement if they insert it without authority from the Department.  
**Preserving Powder Notice.**  
When sending by mail for preserving Powder always enclose 2c extra for postage. The powder is 10c per package, acts equally as well for cat-soup as for fruit, stops fermentation and your fruit will keep indefinitely.—T. B. Wallace, the Prescription Druggist

the Frost & Wood Agency, Napanee, B. C. A. WISEMAN.  
**FOR SALE**—14 acres, new house, eight rooms, bathroom, cellar, large cistern, well at door, large orchard and variety of berries, good drive house, barn and shed—a mile and a half from Napanee on Valance road. Enquire on premises. Also Piano for sale. **MRS. G. VANALSTINE.** 151  
**40 FARMS FOR SALE** in Napanee and Belleville districts. Many of these are valuable farms, and at right price. Call at once or write for list. We can suit you, and you will save time and money. Also some good town properties. **W. G. H. BROWN,** Real Estate. Opposite Royal Hotel, Napanee.

**LOST—ON THE TRAVELED ROAD** between Napanee and Glenora, by way of Brooks' ferry, on July 1st or 2nd, a pocket book containing a small sum of money and important papers with the same of the undersigned on them. Among the papers was a note for \$50. Finder will be rewarded by sending same to CHAS. HICKS, Waupoose, or to M. H. Miller, Napanee. 31c

**FARM FOR SALE**—100 acres—Valuable and desirable farm in Ernestown Township, lot No. 13, 7th concession, six miles from the town of Napanee, and about three miles from Newburgh. Farm is well fenced, never failing creek through centre of farm. Good frame house and new barn. 74 acres under cultivation. 26 acres woodland. Apply to **CHAS. BAUGHAN**, at Gibbard's sale rooms, Napanee. 38-11

**PUBLIC NOTICE.**  
All dogs in the Town of Napanee must be licensed and tagged pursuant to the By-Law in that behalf, before 1st August, otherwise prosecutions will follow.  
Tags may be obtained from Mr. E. S. Lapun, the Town Treasurer.  
**W. A. GRANGE,**  
Town Clerk.  
Dated July 12th, 1910. 31-c  
Bountiful rains are reported from Manitoba and parts of Saskatchewan

**MONUMENTS  
GRANITE and MARBLE**  
Latest Designs and Highest Class  
of Memorial Work.

Established 1837.

## NOTES AND COMMENTS

Until lately the doctors, who generally disagree, have displayed practical unanimity on water drinking at or with meals. They have discouraged it as deleterious—the theory being that the water diluted the gastric juice and impaired digestion. But the desire to drink at meals is so strong in animals and “natural” human beings that to many laymen the prompting of Dame Nature has seemed a safer guide than the injunction of the doctors. A few physicians timidly began to side with the laymen; and some investigations and experiments were made here and there. The result is that at least a respectable minority of eminent doctors and medical organs have reversed themselves and their advice.

“It seems to be quite conclusively shown,” says one authority, after a discussion of recent studies and tests, “that in the normal individual digestion is at least not impaired by the drinking of water with meals.” In other words, Dame Nature wins a moderate victory. It may be unsafe to drink too much water at meals, but it is not unsafe to yield to appetite and drink, say, a pint of water during dinner or lunch. As to other periods and times of the day, drink as much water as you can, and even cultivate the habit so as to increase your capacity and desire for pure, wholesome water. In the summer plenty of water, inside and out, should be the rule. The healthiest peoples are great consumers of water; individuals induced to change their habits by friends have often marveled at the beneficial effects of “mere” water drinking in their own cases.

Buenos Ayres has an architect in Prof. Pierre Roveda who has devised a special plan for building whole districts of houses for the working man. Instead of erecting the houses on the ordinary square block, Prof. Roveda has used a circle, which has a diameter of from 120 to 130 yards. This circle of ground is subdivided into ninety-nine radial lots converging to a center. The circle is concentrically divided to form an interior avenue four yards broad to allow communication with the center of the circle. Each avenue leads to external sidewalks and to longitudinal and transverse streets.

In the center of the circle is a plot of forty yards in diameter, where children may be left to themselves without their parents' care, in charge of a specially designated person. In this garden a playroom, a school, a hospital, a fire station, and an administration room are to be found. Naturally this circular

# GETTING INTO THE GAME

## We Go on the Field Because There is Need of Fighting; We Find Life in the Fight.

“Thou therefore endure hardness,”—II. Tim. ii. 3.

Whatever we may think of Paul of Tarsus as a theologian it is difficult not to admire him as a man, he was compounded of such fine, strong, manly stuff. What he really said to Timothy was: “Have a share in hardness; as though it was the great good chance of a lifetime.” He invited him not to fail to get in with the rest of humanity and enjoy life's conflict.

The world is full of people who do not really enjoy life because they elect to spend it on the bleachers instead of in the field. They struggle with a vigor that would do good service in the fight, for the evil privilege of the sheltered places, where there is neither toil nor danger; they imagine life's box seats are the gifts of the gods and know not that ease is the saddest sentence that can be bestowed on us.

The heroes are not on the padded seats; the folks with the field glasses and the highly developed powers of technical criticism are not the workers; they do not live; they only look on; they are the parasites, and to them there are no prizes. That is so often folly, that we struggle for the front seats, think these are the chief places, the great rewards, and know not that the gains are in the dust and turmoil of the field.

Life's bitterness is its sweetness; its pains are its pleasure; its struggle avails because it is life itself. That of which the poet sings:

“THE KEEN JOY OF LIVING,” is this being in the press, knowing for ourselves how keen is the strife, and learning the blessedness of facing great odds, getting under heavy loads, and wringing life's essence, its wine of joy, out of that from which the flesh shrinks and before which the spirit quivers.

No folly is greater than that of sighing over life's sorrows. True, there are pains and sorrows for which there is no need; there are the cries of those who are wounded without gain, in carelessness or greed; but even these call us to the midst of the strife, to right these wrongs, to heal the wounded and to strike the oppressor.

The depressing sense of life as a vast, unsolved, impenetrable prob-

lem lies heavy on the minds of those who stand aloof from life itself. The monk, the philosopher withdrawn from the crowded ways of men, becomes imbued with melancholy as he decries the sight spread before him, the clouds of the strife obscure his vision; if he were but in the press of the fight he might see more clearly.

We need greatly to fear that temptation which would persuade us that the desirable thing is to flee from life, to find either the easy place or the idler who needs not to toil or the sheltered place of the coward, who professes to have no interest in the struggle or the prize. We cannot help yearning for rest, but to covet ease, to snatch at the bait of sloth, whether that of squalor or of luxury, is to lose the reality and to shut ourselves out from the

BEST THAT LIFE HAS FOR US.

We spend too much time analyzing the fight, pining over the strife, and lamenting the noise of the battle. From the outside it is all a depressing mystery. The cure for our resultant pessimism is simply to get into the field, shoulder our burdens, take up our work, strive forward for the things that are worth while, and a joy in living and a sense of its reality and joy will soon be ours.

But the great thing is that we are missing the best part of life unless we are in the field, close to all our fellows, missing not only the tide of the conflict but the warm throb, the great tide of human feeling, the blessedness of touch with our own kind in days of need and the splendid thrill of standing shoulder to shoulder in some great cause, in the great, constant cause of our oppressing humanity.

This is the divine sign on man, not that he stands aloof, according to the ancient thought of the gods, surveying the scene with placid brow, still less that he shrinks away with quivering lips fearing the heat and stress of the battle, but that he cannot be content to live unless he has a part in the whole world process, unless he is throwing himself into that life which moves on, groaning and trawling, into larger, finer life.

HENRY F. COPE.

## THE SUNDAY SCHOOL

INTERNATIONAL LESSON,  
JULY 31.

Lesson V. A Lesson on Forgiveness. Matt. 18. 21-35. Golden Text, Matt. 6. 14.

Verse 21. Then came Peter—Matthew's peculiar interest in Peter has been noticed several times in previous lessons (compare

more than the debtor asks for, which is like God.

28. A hundred shillings—A paltry sum compared with the debt just remitted. Probably the amount would not be more than seventeen dollars. The contrast displays the meagreness of our claims upon others as compared with God's claims upon us for our sin.

Pay what thou owest—Men, acting upon the harsh impulses of a barren justice, are apt to forget that God has dealt with them in undeserved mercy.

2. Have patience . . . I will pay—the same language used by his creditor, except that the latter, in

# HOME.

## SELECTED RECIPES.

Savory Sauce and Cold Lamb.—Melt one cup of currant jelly, add bits of shredded orange and chopped mint. Garnish with parsley or mint.

Fireless Cooker Recipe.—For oatmeal, boil one cup of oatmeal and one-half teaspoonful of salt with two cups of water for five minutes. Place, closely covered, in cooker, and allow to remain overnight.

Fireless Cooker Recipe.—For dried fruit, wash fruit and soak four hours in water which just covers it. Simmer in the same water on the stove five minutes, then place in cooker and allow to remain eight to ten hours. Less water is required than when fruit is cooked on the stove.

Fireless Cooker Recipe.—For baked beans, pick over and wash one quart of pea beans. Soak overnight in cold water. While preparing breakfast, or early the following morning, drain and cover with fresh water; bring slowly to a simmer. Cook until skin will burst. Drain, and add one-half pound of lean salt pork, one-half teaspoonful of salt, two tablespoonfuls of molasses, and two tablespoonfuls of sugar. Cover with boiling water, cover pail, and cook gently thirty minutes. Place in cooker. Remove one-half hour before the evening meal, and brown uncovered in the oven.

Ham Mousse.—Mix two cups of boiled ham, chopped fine, one teaspoonful of mustard, a dash of Cayenne pepper, one teaspoonful of gelatine and one-half cup of whipped cream. Pack into a mold and place on ice. Serve with a cream sauce composed of one tablespoonful of vinegar, one teaspoonful of mustard, two tablespoonfuls of fresh horseradish, or horseradish sauce, one-half teaspoonful of salt, a dash of Cayenne pepper and one-half cup of whipped cream.

Fried Peaches.—The rich yellow Crawford peaches are the best. Wipe them clean, halve without peeling and remove the stones. Lay them flat side down in a frying-pan with just enough melted butter to prevent sticking to the pan. Fry slowly until half-done; then turn and fill the stone cavities with sugar. When done lift them carefully, with a spoon in each hand, into the saucers in which they are to be served, as the syrup will surely be spilled if they are carried to the table in a large dish first. Peaches prepared in this way make a suitable dessert for the little folks served with boiled rice which has been buttered and sweetened a little. For adults they are delicious with hot biscuits or sponge-cake.

## DESSERTS.

Lemon Ice.—One quart milk, grated rind of one lemon, one-half cup sugar. Let these ingredients come to a boil, then set aside to cool. After cooling add juice of four lemons and freeze. When partly frozen add beaten whites of two eggs.

Marshmallow Delight.—Cut up

collet when Last stipate from water fast make i ple. I soak t rec mornis

Whi ing wh them, on the of the and ke Star make i gandie like no dress you w bottles starch the dy starch new w

Line has be owing Tar ed by pentin To-1 lard, it, and strain Soils in bed baskets positio Floor should with a only a To-1 rub a and t tens. Save for th dying, are re Cor hand tute is a stri cork. ...selves without their parents' care, in charge of a specially designated person. In this garden a playroom, a school, a hospital, a fire station, and an administration room are to be found. Naturally this circular plot of ground leaves free four corners. In each of these four corners the professor proposes to build four chalets, such as grocery shops, dairies, haberdasheries, and the like, which are intended to be carried on in a co-operative way. In each of the ninety-nine radial plots a workingman's house is to be erected on the English plan. Prof. Rodda argues for his circular arrangement that it will give continuous sunshine at all hours of the day and plenty of light and air.

## WEDDING SUPERSTITIONS.

### Why Ring is Placed on Fourth Finger of Left Hand.

Through popular superstitions may lack reason or reasonable explanation, they must have an origin, and this has formed the basis of quite an interesting book by T. Sharper Knowlson, says the London Daily Mail.

The question of the wedding ring and why it should be placed on the fourth finger of the left hand, he traces back to a writer in the British Apollo (1705).

"There is nothing more in this," it is stated, "than that the custom was handed down to the present age from the practice of our ancestors, who found the left hand more convenient for such ornaments than the right in that it is ever less employed; for the same reason they chose the fourth finger, which is not only less used than either of the rest, but is more capable of preserving a ring from bruises, having this one quality peculiar to itself, that it cannot be extended but in company with some other finger, whereas the rest may be singly stretched to their full length and straightness."

The old fashioned notion that a shoe should bring luck at a wedding is another superstition curious to explain.

"It was in the sense of confirming a sale or exchange that the Jews understood the removal and giving of a shoe or sandal. When the kinsman of Boaz consented to waive his claim upon the parcel of land which Naomi would sell in favor of Boaz, he 'drew off his shoe,' for 'this was a testimony in Israel.'"

In a different sense the removal of a shoe marks the winding up of negotiations among the laws and ordinances given in the book of Deuteronomy, where the widow who is refused marriage by her husband's surviving brother is directed to 'come unto him in the presence of the elders, and loose his shoe from off his foot,' thus asserting her independence and heaping upon him the blame for failure to comply with the law.

"When the Emperor Vladimar proposed marriage to the daughter of Reginald she refused him with the words:

"I will not take off my shoe to the son of a slave."

In Anglo-Saxon marriages the bride's father delivered her shoe to the bridegroom, who touched her on the head with it in token of his authority."

ness. Matt. 13. 13-35. Golden Text, Matt. 6. 14.

Verse 21. Then came Peter—Matthew's peculiar interest in Peter has been noticed several times in previous lessons (compare Matt. 10. 2; 14. 28; 15. 15; 16. 18; 17. 4, 24).

How oft—Jesus had shown that if a man was at fault it was necessary to treat his case with patience, seeking not only reparation but for his reclamation from evil. But must one go on forgiving indefinitely? Would not seven times be a munificent treatment, especially since that was to be more than twice as generous as the rabbis?

22. I say not . . . seven times—The attitude of Jesus on the question of forgiveness is, that there must be no counting at all. To have your wrong forgiven is to have it canceled and to begin again on a new basis. Seventy times seven suggests that there is to be no limit to forgiveness. An allusion to the song of Lamech (Gen. 4. 24) is not improbable. The carnal man longs for vengeance 'seventy and sevenfold.' But the spiritually-minded man rejoices that he can forgive another with as much heartiness as he would avenge himself.

23. Therefore—This marks the close connection between the saying of Jesus and the parable of the unmerciful servant. Because, in the kingdom of heaven, there is no limit to the obligation to forgive, this kingdom is likened unto a king whose conspicuous generosity to a debtor laid upon that man the duty of dealing mercifully with others.

24. Owed him ten thousand talents—An impossible sum, representing a debt, say, of \$10,000,000, which would be incapable of discharge. Is our debt to God so enormous? The damage done by sin can scarcely be estimated. It is certain, however, that no man has the power in himself to repair that damage, or to make it right between himself and God. Besides this, the wrong done by one man reaches to others, involving even the innocent (represented here by the servant's wife and children being sold into slavery).

25. Payment to be made—Forgiveness is possible only as the full obligation of sin is met. In other words, it is costly. In this case, the sincere penitence of the debtor is reckoned a sufficient payment. The atoning work of Christ does not come into view in such parables as this and the prodigal son. But it must not, therefore, be counted out. Repentance is not necessary in order to make God forgiving; it is the evidence that a man is ready to accept in all sincerity what a forgiving God has done for him in the death of his Son.

26. I will pay thee all—The man could hardly have realized how hopeless such an attempt would be. Like the prodigal son, he cares only to be as a hired servant, with a chance to work the debt off.

27. Being moved with compassion—This parable illustrates how unreasonable it is to give every detail of these picture-teachings of Jesus an exact significance. This phrase, for example, cannot mean that God is so heartless as to require anything man can do to rouse him to pity. All that God requires is a safe ground upon which to open up the flood gates of his free, forgiving mercy.

Forgave him the debt—He does

ing upon the harsh impulses of a barren justice, are apt to forget that God has dealt with them in undeserved mercy.

2. Have patience . . . I will pay—the same language used by his creditor, except that the latter, in proof of the superficiality of his penitence, made the astonishing promise to pay all.

30. Into prison, till he should pay—This was the act of a man blinded by his own madness. He injured himself by making it impossible for the servant to earn the wherewithal to pay.

33. Shouldest not thou also have had mercy?—Compare James 2. 13: "For judgment is without mercy to him that hath showed no mercy."

34. His lord was wroth—The anger of God does not come into view until the man refuses to manifest to another a forgiving temper. "We are not . . . to think that to treasure up the recollection of injuries which we think we have received from others may be a sin that is greater than any of these." If God requires of us what we, in cold justice, require of others, who of us is there can in all eternity pay all that was due?

Delivered him to the tormentors—While this detail might describe the punishment inflicted by an earthly monarch, it is scarcely a fair picture of the procedure of our heavenly Father.

## KING GEORGE'S MANNER.

### "A Typical, Real Sailorman," Says Gen. Woodford.

There was a general impression when George V. came to the throne that he had none of his father's bonhomie that put all men at their ease. Events have proved that this opinion has no foundation and only arose from ignorance of the new King's character, due to the quiet and retired life he has led.

Since his accession he has received deputation after deputation, representing all classes, and all have gone away with a high opinion of George V.'s savoir faire. When Gen. Stewart L. Woodford as president of the Hudson-Fulton Commission of New York presented the gold medal and address, originally intended to be given to Edward VII., the new King did not content himself with a formal acceptance and transmission of a stereotyped reply, but talked freely for half an hour.

His manner is quiet yet cordial, his way of speaking, which recalls that of his cousin Prince Henry of Prussia is frank; he gives the impression of not being a talkative man without appearing reticent; in fact, Gen. Woodford sums it up as "the speech of the typical real sailor man." His late profession too is evidently the subject nearest his heart, for he talked to Gen. Woodford with knowledge of the three warships sent to New York for the fetes and with appreciation of Admiral Seymour, who commanded them.

Somehow a girl always imagines that her piano playing sounds good to the neighbors.

Even those who think twice before they speak are apt to have another think coming after they have spoken.

gusted this of the lemon, one-half cup sugar. Let these ingredients come to a boil, then set aside to cool. After cooling add juice of four lemons and freeze. When partly frozen add beaten whites of two eggs.

Marshmallow Delight.—Cut up one pound marshmallows. Whip one-half pint cream. Chop one cup English walnut meats, or put in candied cherries. Flavor with rum. Mix marshmallows and nuts, or the cherries. Pour over them beaten cream. Serve in sherbet glasses.

## SMALL CAKE.

Rocks.—Three eggs well beaten, one cupful of butter, one and one-half cupfuls of brown sugar, three-quarters pound raisins, one-quarter pound of English walnuts in fine pieces, two cupfuls of flour, one teaspoonful of soda dissolved in water. Drop teaspoonfuls on a buttered pan and bake slowly.

Oatmeal Cakes.—Cupful of butter or one-half lard and one-half butter, one cupful of sugar, one teaspoonful of cinnamon, one cupful of sour milk, one level teaspoonful of soda, one egg, one cupful of raisins and mixed currants, two cupfuls of cracked oats, two cupfuls of flour. Drop on pans about size of walnut an inch apart. If sweet milk is used use two teaspoonfuls of baking powder. These have a nutty flavor.

## SANDWICH RECIPES.

Toasted Sandwiches.—Take round of sandwich bread, cut off crust before slicing, slice bread in pieces, one-half inch thick. Mix one slightly beaten egg with one jar of club cheese, pinch of salt, and pepper (red). Butter bread with plenty of cheese, put on top two slices of crisply fried bacon, and put under broiler until cheese is melted. This makes a delicious sandwich of toasted bread, melted cheese, and broiled bacon.

Cheese Sandwiches.—For these sandwiches use graham bread. Spread it first with a thin coating of butter, then a coating of mustard, next a layer of cottage cheese, then add a layer of olives which have been chopped fine and mixed with mayonnaise dressing.

## USE OF BRAN WATER.

Few housekeepers know the value of bran water in the household. Its uses are manifold and its cost but a trifle. As an effectual and harmless dirt remover it cannot be surpassed. In preparing it for use, place in a cloth bag some bran, upon which pour boiling water; let stand for several minutes; squeeze the bag out and remove, when the water is ready for use.

In washing woodwork be it hardwood or painted, it will be found invaluable. The dirt is quickly removed and the original finish of the wood is retained.

For washing printed fabrics it has no equal, for it will not injure the most delicate colors.

If one would use bran water when washing the hair she would find it not only cleanses the scalp thoroughly but also imparts to the hair that beautiful luster so much desired.

Another important consideration is that the water does not injure the hands, like so many cleansing preparations; on the contrary it has long been known that bran is an ex-

cellent skin whitener and beneficial when used in the bath.

Lastly, it will cure chronic constipation, by drinking anywhere from three to five cups of bran water at intervals before breakfast. A few drops of lemon juice make it more palatable to some people. For this purpose it is well to soak the bran overnight in a covered receptacle and strain in the morning.

### IN THE LAUNDRY.

**White Dress Skirts.**—When washing white dress skirts do not wring them, but hang them dripping wet on the line by the belt. The weight of the water prevents shrinkage and keeps the skirt an even length.

**Starch for Black Dresses.**—To make starch for a black lawn or organdie dress that will make it look like new and will not show on the dress take black dye, dissolve it in you would for coloring, and keep bottled. When you make the starch, make it quite thin, strain the dye and pour a little into the starch. The dress will look like new when laundered.

### USEFUL HINTS.

Linen turns yellow because soap has been left in it at the laundry, owing to insufficient rinsing.

Tar on a cloth suit may be removed by successive applications of turpentine, naphtha and benzine.

To remove a burnt taste from lard, slice some raw potatoes into it, and cook for a few minutes, and strain off.

Soiled linen should never be kept in bedrooms. A place for the linen basket should be found in an airy position.

Floors which are to be stained should be first prepared by painting with a very thin coating of size evenly applied.

To soften the skin of a fur rug, rub a little vaseline into the hands and then work the skin till it softens. This will take some time.

Save the ends of wooden matches, for they are useful in reviving a dying fire. If kept in a box, they are ready for use at any time.

Corkscrews are not always at hand when wanted. A good substitute is an ordinary large screw with a string attached to pull out the cork.

Dusters for old china and bric-a-brac should be made of cheese cloth. It is better than any other material, and the cheapest.

Wash black stockings thoroughly in salt and water, then again in a weaker solution, and finally in clear water; if treated like this, stockings will not crack.

When boiling anything quickly, do not leave a metal spoon in the saucepan, for much of the heat passes through the spoon, and boiling is checked.

Rinse silk handkerchiefs the last time in water with a little methylated spirits in it. Roll up in a cloth, iron on both sides, and they will have the gloss you desire.

Boiled water, when used for drinking purposes, should be prepared carefully. See that the water boils fast for fifteen minutes, then keep it covered till required.

Patent leather and kid boots will take a far brighter polish if they are first wiped over with a sponge dipped in milk. This must be allowed to dry before the polish is applied.

When preparing vegetables or

## ALL MINERAL ON WANE

GOLD AND SILVER ARE THE ONLY EXCEPTION.

Report of Geographical Survey on Decline of Mineral Resources Alarming.

In the following striking approximate dates for the disappearance of some of the most indispensable of natural geological survey calls the attention of the public to a figurative to-morrow:—

Coal, exhausted in, 2040.

Petroleum, exhausted in, 1959.

Natural gas, exhausted in, 1934.

Iron ores, exhausted in, 1939.

Lead ores, exhausted in, indeterminate.

Gold, exhausted in, indeterminate.

Silver, exhausted in, indeterminate.

Copper, exhausted in, indeterminate.

Zinc, exhausted in, indeterminate.

Phosphates, exhausted in, 1934.

The figures have been taken from files of the survey's publications and a canvass of the situation has been prepared in a special bulletin. The chief implied charge in the work is that wanton waste has been going on in the production of many of these nature's supplies and that one of the first moves in retrenchment should be more economical methods in mining and distribution.

### COAL HEADS LIST.

Coal heads the list as the most wasted of all products, losing 50 per cent. of the original deposit in the mining and marketing. The greatest of these losses come from leaving thin strips of coal in the veins and in thicker strata as pillars supporting the mine roof. But thousands more tons find their way to the slate and shale dumps, while from the first movement in shipping a loss is suffered through shattering and weathering and haulage, until the fuel is at the furnace door. And even then bad firing under boilers occasions another extravagance, complained of scarcely less by owners of steam plants than by a general public which protests against soot and smoke.

As the national survey sees it, however, the situation as to petroleum is much more serious. This mineral oil has been in use only about fifty years, while if consumption and waste still goes on, it will have disappeared within twenty-five or thirty years.

### NATURAL GAS WASTING.

If production be curtailed and the waste is stopped it may last to the end of the present century. Electricity has displaced much of the oil originally consumed for illumination, but the lubricants which are by-products of the crude petroleum are not to be replaced with either animal or vegetable oils.

Natural gas is wasting into the air at the rate of a billion cubic feet every twenty-four hours, and this, with the rate of consumption, promises to exhaust the supply within twenty-five years.

Iron, which is almost universal, ordinarily is found in ores so poor that up to the present methods

## THE WAYS OF ASSASSINS

THE LARANG USED BY MALEFACTORS OF CHINA.

Slab Their Victims in Abdomen, Trusting to Splenomegaly to Finish Their Work.

"Pathological assassination" is the term applied by a writer in The Lancet (London) to two recent cases which have occupied the attention of the press of two continents—the Hyde crime in Kansas City, and the numerous murders "to order" alleged to have been committed in Russia by a physician of noble blood.

"It is a question if a parallel can be found among western nations or savages at large to the use of the larang, which means in Malay language 'the forbidden,' and is used in Southern China and the Malay countries, such as Sarawak, for purposes of assassination," says The Lancet. "Mr W. H. Battie, in his recent oration on 'Internal Injuries,' delivered before Medical Society of London, exhibited a larang belonging to Dr. White Hopkins, who has been resident for some time in Sarawak. In shape the instrument resembles an iron dagger, and it is probably made out of

### A LARGE TIMBER NAIL.

to which, with the aid of twine, an ornate curved crosspiece is fitted. The head of the nail is held so as to protrude from the loose sleeve of the malefactor who uses it. A stroke from this nail on the abdomen of a victim frequently brings about the latter's death from ruptured spleen, the calculation of Chinese assassins being that some 90 per cent. of those they attack are suffering from splenomegaly, due to malaria."

"The nearest approach to this truly fiendish form of assassination discoverable in the annals of legal medicine is murder by infection. In a case now sub judice in Russia a suspicious death is attributed to subcutaneous infection by cholera virus. Quite recently also a medical man, Dr. Clarke Hyde of Kansas City, was condemned to imprisonment for life for the murder of three victims, whom, with eight others, he is supposed to have infected with the virus of typhoid fever. This, we think, must be one of the first instances of a culture of a pathogenic germ being used for criminal purposes. It is a method capable of great extension and likely to trouble the medical legists of the future, though, fortunately, its use will necessarily be restricted to persons with some knowledge of bacteriology."

"Among primitive people the belief in

### MURDER BY INFECTION

has often been entertained—as, for instance, by modern Russian peasants, who accuse medical men of deliberately spreading (on the principle of breaking windows to do good to the glaziers) the disease they have been striving to prevent. Then there are the historic cases of the plague poisoners of Milan and Geneva, who in the seventeenth century, were accused in num-

## 'On the Farm

### WHY NOT MORE SHEEP!

Before the days of the American tariff on sheep and wool, a flourishing business was done with sheep through the greater part of Eastern Canada. The breeder of pure-breds is still in the business, duties not interfering with his export trade, but on the farms of the mutton-producer, even the old sheep shed has disappeared; farmers themselves have forgotten the flavor of mutton chops, or leg of lamb, else surely there could be found a small flock somewhere back of the barns; and the children have to adopt a pig for pet, and wear factory-knit stockings and mittens. It was not always so.

It is not well that the sheep have gone from so many of our farms. They are splendid gleaners, at least eighty per cent. of the weeds in a pasture will be eradicated by sheep; very few weeds seeds, if any, escaping destruction. They get much in a pasture that all other stock refuse. In winter, they are splendid consumers of coarse roughages, as pea straw, stemmy clover, and barley and oat straw. They do not demand painstaking care, save at weaning time. Thus, they are a sort of inexpensive accessory, gathering up the loose waste ends, and converting them into a cash surplus.

The dispersion of farm flocks all over older Canada has an economic reason. Other reasons are frequently given, but they are inadequate. The cur dog is a nuisance; sheep surely will go through poorly built wire fences, if large flocks are maintained on small pastures; other stock prefer not to graze after sheep; but these reasons are insufficient. If sheep were paying relatively, as they did formerly, they would not have been thus abandoned. When sheep were in their zenith, dairying had scarcely appeared above the horizon, beef-making had so frequently and irregularly partial or total eclipse, that many men felt they could not rely upon it as their guiding star, and pork-production oscillated then as now. Now dairying is developed into a highly profitable, permanent industry; beefmaking has probably become more restricted, but is more reliably profitable; pork production has shifted from fat pork to bacon, increasing the profit and constancy of the trade. But no such improvement can be noted in mutton production. The business stands too much where it did in the long ago. Lambs dropped in the spring are retained all summer and sold in the fall or early winter, when they are not especially desired. There is not a sufficient profit in the business, handled after this fashion, to continue its prosecution. This is the quasi economic reason of the decline in popularity of sheep in Canada.

But there is money, more money, in sheep and lambs than ever before, if the methods of procedure were adapted to the present demands. What is wanted particularly is lamb, not mutton. The market wants Christmas lamb, Easter

to take a far brighter polish if they are first wiped over with a sponge dipped in milk. This must be allowed to dry before the polish is applied.

When preparing vegetables or fruits that stain the fingers, a very good plan is to previously rub the thumb and forefinger with a little grease, and it will prevent the stains that are so unsightly and difficult to remove.

In some cases fried fish may be given to invalids, and is, of course, more relished. But the frying must be perfectly done, and no fat left soaking on the dish. It is better fried without the casing of egg and bread crumbs, which is likely to disagree with a delicate stomach.

Padding Embroidery Work—For this lint cotton is much better than thread; moisten the finger tips and roll the cotton size and length wanted, and put in place and work over it. No shrinking required, as most thread does.

Sometimes one desires to change the air of a room in, as it were, double quick time. Then the plan is to open the window wide, and to open the door and to swing it backwards and forwards very quickly, making it serve as a sort of fan.

To cure earache, warm a little safflower oil to milk heat and drop it from a spoon into the ear. Another remedy is to roast an onion in the coals and take out the centre, put the fine point of this into the ear and let it remain several hours.

Should the knob come off the lid of a pan or kettle, a screw should be slipped through the hole, with the head to the inside of the lid, and a cork screwed on to the protruding end. This will make a knob that will not get hot, and that can be easily removed when dirty.

Oil, fruit or paint stains can be successfully removed by means of a homemade mixture composed of a teaspoon each of oil of lemon, peppermint, cloves and cinnamon, with wineglass of spirits of turpentine. This should be rubbed over the surface of the fabric with a piece of flannel, an old handkerchief answering the purpose excellently.

To clean an ingrain carpet mix damp (not wet) cornmeal with dry salt and sprinkle carpet liberally. Leave it for an hour, then sweep it into the carpet with a clean broom and against the nap. This done, sweep again, this time with the nap. Lastly, strew a fresh supply of salt and meal on the carpet and let it lie there for three hours before repeating the double sweeping.

### DOUBTFUL NAME.

Some years ago a Nottingham clergyman in baptizing a baby paused in the midst of the service to enquire the name of the infant, to which the mother with a profound courtesy, replied: "Shady, sir, if you please." "Shady," replied the minister. "Then it's a boy, and you mean Shadrach, eh?" "No, please your reverence, it's a girl." "And pray," asked the inquisitive pastor, "how happened you to call the child by such a strange name?" "Why, sir," responded the woman, "if you must know, our name is Bower, and my husband said as how he should like her to be called Shady, because Shady Bower sounds so pretty!"

To sit on a jury is what it sometimes needs.

this, with the rate of consumption, premises to exhaust the supply within twenty-five years.

Iron, which is almost universal, ordinarily is found in ores so poor that up to the present methods have not evolved which will allow of them being worked within bounds of reason. These rich and easily worked ore beds are becoming exhausted rapidly.

### ZINC GIVES MOST PROMISE.

As to lead, the production has been increasing in the United States but decreasing elsewhere in the world, with marked increase in prices. Altogether it appears that the maximum of production has been reached and that hereafter there will be a decline in the output of the mineral.

Copper, in rich deposits, has been feeling the drain of the world's demand. But the mineral exists over wide areas and with increase in price of the metal, these low grade ores probably will be worked far into the future. Zinc, of all the baser metals, gives most promise of life by reason of the vast deposits of the mineral.

But gold and silver, of all the mineral resources of the country, promise centuries of exploitation, even on present lines. Also there is the minimum of waste in the processes of redemption.

### CHEAP MILK REFRIGERATOR.

How It is Made From a Wooden Box and a Tin Pail.

If milk is not kept cold it is a dangerous food for babies, for every minute that it is much above the temperature of ice the germs of disease increase in it at an alarming rate. Very many babies die of summer complaint merely because their milk has been allowed to stand for hours in a warm room.

Many are unable to buy enough ice in summer to preserve milk in ordinary refrigerators for twenty-four hours. Most mothers, however, buy a five cent cake every morning and by following the suggestion of Dr. Alfred F. Hess can make at home at small cost an excellent milk refrigerator that requires only a very little ice:

"Obtain a box from the grocer, any wooden box a foot in depth will answer the purpose. Buy a tin pail with a cover, one deep enough to hold a quart bottle of milk and a slightly larger pail without a cover. Place one inside the other and stand them in the centre of the box. Now pack sawdust or excelsior beneath and all about them to keep the heat from getting in; complete the refrigerator by nailing about fifty layers of newspaper to the under surface of the box cover.

"The refrigerator is now ready for use. In the morning as soon as the milk is received it should be placed in the pail and five cents worth of ice should be cracked and placed about the milk bottle. The cover should be replaced on the can and the lid on the wooden box. Every morning the melted ice should be poured off."

A woman isn't necessarily wise because she can fool a fool man.

The trouble with some men is they have too many fool friends.

They have been striving to prevent. Then there are the historic cases of the plague poisoners of Milan and Geneva, who in the seventeenth century, were accused in numbers of disseminating the plague with the help of poisoned ointments, infected clothes, and so forth, in the interests of nurses and all the other employees in epidemics. Searching in works of travel one finds sometimes isolated cases of explorers being apparently allowed to die by sledge drivers, guides and others who have been interested in the loot of their master's property, and these cases are analogous, as the murder is done by enlisting the services of disease. Thus, in Dr. J. J. Hayes' 'The Open Polar Sea,' the death of a Mr. Sonntag is described, who, when manifestly suffering from a chill during a long sledge journey, was nearly drowned, and died presumably of cold shortly afterward. The Esquimau driver who was with him gave an unsatisfactory account of his death, and Dr. Hayes implies that foul play was suspected. The larang users, however, with their knowledge of a pathological condition and their calculation of probabilities, are easily ahead of all other competitors in iniquity."

### A PECULIAR NEW CANNON.

Liquid Springs Substitute For the Recoil Cylinders.

A new cannon with liquid springs, which is said to have achieved unprecedented results, is shortly to be delivered to the British War Office from the Elswick firm of Sir W. E. Armstrong, Whitworth & Company, says The New York Herald. The experiments which have recently been carried out at the firm's range at Silloth, Cumberland, are said to have resulted in the weapons answering every call made upon it and to have more than realized the expectations of the inventors.

The gun is a 14.3 pounder, similar in make to the latest pattern breech loading guns, with the exception that in this latter springs are used in the recoil apparatus. These have been done away with completely in the new weapon, and a liquid, which is the firm's patent, and air have been substituted in the recoil cylinders. By this means it has been proved possible for the gun to remain in the same position while ten shots are being fired. The gun needs only laying once to insure this feat, and while the experiments were in progress all the shots hit the object aimed at. In fact, five of the shots went through practically the same hole in the bull's-eye—a remarkable result, never achieved before in the annals of gunnery.

In place of the two recoil cylinders on the gun carriage which carried the running out rods and springs, there are five chambers containing the liquid and air.

### SET HIM THINKING.

"I always feel, after I have spent an hour or two in your company," he said, "that I am a better man." "It is very good of you to say so," she replied. "Don't hesitate to come often."

Few people care if care did kill a cat.

in sheep and lambs than ever before, if the methods of procedure were adapted to the present demands. What is wanted particularly is lamb, not mutton. The market wants Christmas lamb, Easter lamb, spring lamb, early summer lamb. This trade is almost as easily met, and is highly profitable. The producer must plan his crop for the market he wishes to suit. If for Christmas and the post-Christmas trade, they must be fall lambs for Easter, they must be January lambs, and so on. What misses for January will sell later on almost as good a market. But always the lambs must be forced, and brought to market at from two to three months. At two months, the lambs can be brought to about forty pounds, and at three months sixty-five; the latter weight is getting rather heavy. For these fancy markets, the lambs at from two to three months will bring from seven and a half to ten dollars. A spring lamb, kept all summer, and marketed in the fall at 90 to 100 pounds, for five or six cents a pound will bring no more.

It is true here, as elsewhere, that the wool produced by most sheep will pay for their keep. They are worth much as gleaners; they are worth much as a source of wool and meat supply to farms; they are a delight to have about the farmhouse, and they will pay, and pay well to those men who will adapt them to the market demands.—Farmer's Advocate.

### THE LONELY CHICK.

I'm just a lonely little chick—I can not fly nor sing—I never had a mother to protect me 'neath her wing. Of brothers and of sisters I have twenty-five or so; We sadly need a mother now, to bring us up, you know.

Another family of chicks is living in our pen, And they've a watchful mother—such a nice, big speckled hen—She hunts for dainty morsels, then she calls, "Cluck, cluck! come quick!" But oh, she shuns me, for I'm called an "incubator chick."

I saw an ugly, thieving cat come prowling 'round one day. Then Mother Speck just spread her wings and hid her chicks away; But when I tried in following, beneath her wing to creep, Those cruel chickens pecked at me, and cried aloud, "Cheap! cheap!"

My owner tells my pedigree and says I'm "splendid stock;" That Leghorns and Buff Cochins can't compare with Plymouth Rock; But what is pedigree to me when hawks come flying 'round, And incubators have no wings to hide me safe and sound?

Some day perhaps, when a hen like Mrs. Speck I've grown, I'll scratch up tempting morsels for a family of my own; Then if some lonely orphan comes my choicest scraps to pick, I won't forget that I was once an "incubator chick."

—The New Idea Women's Magazine for July.

# THE MYSTERY CLEARED UP;

## OR, THE HERITAGE OF MADAME YALTA.

### CHAPTER VIII.—(Cont'd)

"Do you refuse?"

The countess did not take the trouble to reply. She pulled a card, and motioned the insolent doctor to the door.

"Very well," he said, in a rating tone; "you drive me away. I shall not return, and you will not see me again, for forty-eight hours from now you will be dead. One word only. Know that all who have aided you, all who have received your confidence, will be pitilessly struck. Your reason will not save them. Adieu, countess. I shall regret you. You might have powerfully aided our cause, and you will end like a traitor."

Having hurled this menacing farewell, Villagos turned on his heels toward the door. Kardiki, summoned by the stroke of the bell, awaited him there. The Nihilist Russian and the Pole exchanged not very amicable glances, and the faithful servant of Madame Yalta followed him to prevent an aggressive return. Scarcely had they disappeared, when Maxime raised the tapestry behind which he had been concealed during this tragic conversation. The countess approached him and found Alice standing behind her cousin. Alice, pale and trembling, had not strength to speak, but Maxime exclaimed:

"We have heard all."

"Then you know that I am to die," said the countess, with a sad smile.

"To die! it is this wretch who will die. I charge myself with sending him into the other world with a good sword thrust."

"No. You will not play your life against a murderer's. You can no longer doubt that M. de Carnoel is innocent."

"Alice doubts it no more than I. And my uncle must yield to the evidence. The time for circumspection is past. I want to lead back Robert to the house from which he came out poor and proud. I wish to have him re-enter it with his head erect. He is here, is he not?"

"Yes," replied the countess, "but I claim the honor of presenting him to M. Dorgeres. It is for me to repair the wrong that has been done."

"But," said Maxime, with a little embarrassment, "I do not know whether my uncle will consent—"

"To receive us. You will tell him what you have just learned. I have nothing now to conceal. It matters little that they should know I have dishonored myself by allying myself with rascals. I forswear them and I brave their vengeance. I deny them so utterly that I shall ask M. Dorgeres to publish everywhere their history and mine."

"It would be a grave imprudence and I beg you not to do it. Why

"So entirely that I seem never to have been ill," replied Georget. "I have already played ball with my right arm, and my memory has come back."

"Then I shall not leave you, my boy, you can tell me many things. Where were you going at this rate?"

"To tell my story to M. Dorgeres."

"What story?"

"I am going to tell him that I explained to the persons who carried off M. Borisoff's casket how to open the safe."

"I suspected as much. Was it your own idea to come and confess to my uncle?"

"No, grandmother sent me."

Maxime began to understand. The countess must have gone early this morning to announce to Madame Piriac the delivery of M. de Carnoel, and to give her instructions in consequence.

"And you are not afraid that your former patron will have you arrested? I don't know how he will take your confessions. Is it to soften him that you are so dressed up?"

"Oh no, Monsieur Maxime, the countess brought me this costume. She is going to take me away and does not wish me to be groom any longer."

"To take you away! where?"

"I don't know. I only know she is going away this evening, and we are going with her,—grandmother and I. And I will be sorry, because I won't see you any more."

"Come with me. My uncle is not at home. He will return soon, and we will see him together. But I have somewhere to go in the meanwhile."

"With pleasure, Monsieur Maxime," said the child. He did not inquire where he was to be taken, and followed willingly.

Rue d'Aguesseau was not far off and they were silent during the short walk. On arriving at Vignory's house, they found the porter in conversation with a tall young man who bowed to Maxime.

"You do not know me," he said. "Do you remember the cook of Rue Jaucuffroy?"

"Very well," said Maxime, surprised at this meeting.

"Agnor Galopardin, book-keeper and member of the society of Enfants d'Apollon. I came to see my ex-commander Vignory. I say ex, because he has dropped me for the last two months. Only think, he sends this morning a messenger begging me to call at his lodging. I sacrifice my fifties and run. No Vignory. Monsieur is gone out."

"I came to see him also, and am very much vexed at not finding him."

"You too, he has set you down too! Ah, fortune changes men. He was not so proud two months ago,

turned and was awaiting him at his office.

At this moment a carriage stopped before the gateway, and his astonishment changed to stupefaction when he saw Robert de Carnoel descend from this coupe, and give his hand to the Countess Yalta to aid her to alight.

The countess leaning on the arm of M. de Carnoel, Maxime Dorgeres agitated, Georget radiant and Galopardin bewildered, formed a cortege which the concierge regarded in consternation.

Maxime bowed to the countess, pressed the hand of Robert in silence, and said in an undertone:

"My uncle will receive us. I answer for our success. And Providence has brought me face to face with a man who brings conclusive testimony," he said, designating with a glance the book-keeper leaning against the wall."

"Let us go," said Madame Yalta, simply.

(To be continued.)

### SPREADS PESTILENCE.

#### What the Rat Has Cost Us in Human Lives.

For one of the most terrible of all diseases the rat is now certainly known to be responsible, the bubonic plague, or black death. No scourge of mankind is more dreadful than this. It is slaying the Egyptians at the beginning of recorded history; a single epidemic cost Athens a third of her citizens. At Lyons, in 1572, the pestilence killed 50,000 persons; Venice in 1576 lost 70,000. During the great plague of London in 1665, 68,596 died, out of a population of 460,000; and the dead lay in the streets because the living were too few to bury them.

Even as late as 1771, an epidemic of the bubonic plague cost Moscow nearly a fourth of its 250,000 souls. But, after the last Parthian arrow, the disease retired to India and the region westward toward the Mediterranean, which seems to have been its original home; and after 1850 Europe and Africa were free.

It broke out again in 1894, from a peculiar virulent strain, that had its habitat in certain districts of Northern China. The army supply trains carried the rats and the rats carried the bacillus pestis from the Manchurian frontier to the sea. From there it made its way back by junks to Canton, where, between March and August of 1894, it killed upwards of 100,000 persons. Thence the Chinese strain of the plague bacillus passed by ship to Bombay, and diffused itself through India. Five million persons died of the pestilence in India during the six years that ended with 1908, and it was only with 1909 that the annual mortality fell below 200,000.

Before it was discovered that quarantine must include rats as well as men, this new Indo-Chinese strain had spread over the whole civilized world.

### UNUSUAL RECIPES.

Cauliflower and Beans.—One cauliflower, one pint of butter beans, one pint of white sauce, grated cheese to taste. Soak the beans over night, boil until perfectly tender in just water enough to cover. Let the water boil away toward the end of the cooking and salt to

## FLYING IN A WILD GALE

### SAID TO BE MORE EXCITING THAN PLEASANT.

#### Airman Glad to Feel Terra Firma After Wind Had Toyed With Aeroplane.

Rather than disappoint the crowd of people assembled near Halifax, England, to see him fly, Grahame-White took his aeroplane up in a gale of wind, with gusts of forty miles an hour.

Twenty feet up, the first gust—he called it "a solid slap of wind"—struck the aeroplane, which quivered from end to end and stood still in the air. Then it was swung ten feet to the right, heeling over to a fearful angle. The airman thrust his lever over to correct the falling influence, and augmented the movement with the weight of his body, throwing himself to one side. When one wing tip had nearly touched the ground the machine righted itself. "Come down!" his friends shouted from below, but the airman headed out over the ravine, rising as he forged his way onward.

#### REELED TO AND FRO.

Gusts struck him from both right and left, and men who had seen many flights in the wind held their breath. Disaster seemed imminent. The aeroplane did more than roll from side to side like a ship on a tempestuous sea. It leapt upwards and dropped again.

Right out over the valley a mile away, and with factory chimneys more than a thousand feet below him, the airman began to try to edge round. Directly he did so the aeroplane gave a heave like that of a rowboat caught sideways by a heavy swell. For a heart's beat it stood in the air at an apparently impossible angle, the wing tips on one side pointing downwards, the others high in the air.

"My heart was in my mouth," confessed the airman afterwards. "It appeared as though I was caught in a perfect whirlwind—the ground seemed so far below me." Almost miraculously, and it was an extraordinary tribute to the stability of the biplane, the machine came round. Caught at the back by a squall, it was driven towards us at a furious speed and was the plaything of the wind.

#### HE KNEW HIS DANGER.

"I saw that every moment I was in the air I ran a fearful risk," Mr. White said a minute later, as he stood gasping for breath beside his machine, "so I determined to let the wind blow me back." This it did, the aeroplane pitching heavily forwards and backwards like a ship running for land before a gale. It was with the utmost difficulty that the airman kept his craft from lurching broadside on again, but with a superb airmanship he won back, making a quick half-circle a little behind the shelter of some rising ground so as to land facing the wind. "Wait a minute. I can't speak," he panted, as people ran to him. The struggle had taken his breath away. His eyes streamed from the lash of the wind. "It's fine," he said, "to be back on old earth again."

disgraced myself by anying myself with rascals. I forswear them and I brave their vengeance. I deny them so utterly that I shall ask M. Dorgeres to publish everywhere their history and mine."

"It would be a grave imprudence and I beg you not to do it. Why should you expose yourself to terrible dangers? It is enough that Robert de Carnoel should be exonerated. I shall hasten to my uncle and announce your visit; but all will be between him and me."

"Will you pardon me?" the countess said, turning toward Mlle. Dorgeres, "for having caused you so much suffering?"

Alice did not reply. She was weeping.

"Yes," she went on. "I was cruel. I should, when I first knew that your betrothed was accused, have said before you, before your father, that I alone was the guilty one. My silence was a crime. And this crime I am ready to expiate. I consent to declare publicly that I have been the accomplice of these wretches; that to save them I have dishonored myself."

"You, madame?" stammered the trembling Alice.

"Do you doubt it? You have not heard, then, what I said to that man? You do not know at what price I paid for my stupid devotion to an infamous cause? Well, look."

She made three steps and raised a black curtain which masked a niche in the wall. Alice uttered a cry of horror and turned away her eyes. She had already raised this curtain and knew what it concealed.

"It was you, then?" murmured Maxime.

"Have you not guessed it?" she asked, showing her left arm.

He had not guessed it, or rather, he had not wished to guess, for the conversation he had just heard should have left him no doubt. He understood all now; the sad history of the stranger contained no more mysteries for him.

## CHAPTER IX.

Their friendship had been less warm of late but it subsisted still, and Maxime could not work decidedly on behalf of M. de Carnoel without forewarning Vignory.

It was an awful painful enough to make, but Maxime hoped that a frank confession would not have the effect of estranging him entirely from his old comrade. He knew that good sense was his dominant quality; that he looked on life from a practical point of view, and he counted on making him see that an enforced marriage could not be a happy one, and that instead of incurring the risk, it would be better to renounce of his own free will the hand of Alice, and content himself with being M. Dorgeres' partner.

Whilst revolving these arguments in his mind, he pursued his way to Rue d'Aguesseau.

It was Sunday, and there were chances that Vignory had not yet gone out. He had scarcely taken twenty steps when he perceived Georget coming toward him.

He had some difficulty in recognizing him, for in place of the office livery he wore an elegant packet, velvet breeches and gray hat. He walked with his head high, and hands in his pockets; his eyes were bright and his mouth smiling.

"You are cured, then?" said Maxime.

"Vignory. Monsieur is gone out." "I came to see him also, and am very much vexed at not finding him."

"You too, he has set you down too! Ah, fortune changes men. He was not so proud two months ago, when he came after me at the cafe to ask me to do him a favor. He had confidence in me then, for it concerned a delicate matter, an anonymous restitution."

"What? what do you mean?" asked Maxime, quickly.

"Oh, it was a very simple thing. Fifty thousand francs that a client of the Dorgeres' house owed to a gentleman, and wished to return it without giving his name. Between ourselves, I always believed he had stolen them."

"And—Vignory charged you with remitting this sum?"

"Ma foi! yes. I am not rich, but I am honest, and I delivered the package safely to the address of the gentleman, Boulevard des Batignolles. I even wrote the letter accompanying it. It seemed the debtor didn't want his creditor to know where the bank-notes came from, and this creditor knew the handwriting of the employes of M. Dorgeres, and that was why he applied to me. He even promised that his patron would make me a nice present, but it has never come."

Maxime was pale with emotion. He learned all at once that Robert de Carnoel was innocent, and that Jules Vignory had been guilty of a base act.

"Would you recognize this letter that you wrote?"

"Under Vignory's dictation? Perfectly. He would recognize it too. I didn't change a word in the copying."

"Then come with me."

"Where?"

"To M. Dorgeres', my uncle's. He would like to thank you."

"I would ask nothing better. However, if it would draw on me the displeasure of Vignory—"

"Come, monsieur, come and do a good act. I swear that you shall be rewarded."

Galopardin suffered himself, to be led off by Maxime, who had taken his arm.

Georget had listened without a word, but it could be read on his face that he understood all.

Two hundred steps from the house Maxime perceived Vignory approaching. He was hastening toward him, but Vignory also perceived Maxime and had recognized the lack-keeper. He turned immediately and retraced his steps at full speed.

"Ah, that is too much!" exclaimed Galopardin. "Now this monsieur makes off when he sees me. He is afraid of being obliged to confess that he once frequented the society of a poor devil of my sort. He is ashamed of me. Very well. I will pay him back some day."

"Yes," exclaimed Maxime. "he wishes to avoid us; he has guessed all. Let us hasten, I beg. I have not a minute to lose in presenting you to my uncle."

Galopardin was not pleased with his co-eval friend, and he followed Maxime without further thought of what unhappy consequences the presentation might have for the unfortunate Vignory.

Father Doulevant opened his eyes wide at seeing Georget in his new costume, but his astonishment did not prevent him from informing Maxime that M. Dorgeres had re-

luffed the wind. "Wait a minute. I can't speak," he panted, as people ran to him. The struggle had taken his breath away. His eyes streamed from the lash of the wind. "It's fine," he said, "to be back on old earth again."

WHEN A MAN IS A FAILURE.

When he has no confidence in himself nor in his fellow men.

When he values success more than character and self-respect.

When he does not try to make his work a little better each day.

When he becomes so absorbed in his work that he cannot see that life is greater than work.

When he lets a day go by without making someone happier and more comfortable.

When he tries to rule others by bullying instead of by example.

When he values wealth above health, self-respect, and the good opinion of others.

When he is so burdened by his business that he finds no time for rest and recreation.

When he loves his own plans and interests more than humanity.

When his friends like him for what he has more than for what he is.

When he knows that he is in the wrong, but is afraid to admit it.

When he envies others because they have more ability, talent or wealth than he has.

When he does not care what happens to his neighbor or to his friend so long as he is prosperous.

When he is so busy doing that he has no time for smiles and cheering words.

A Good Medicine requires little advertising. Dr. Thomas' Electric Oil gained the good name it now enjoys, not through elaborate advertising, but on its great merits as a remedy for bodily pains and ailments of the respiratory organs. It has carried its fame with it wherever it has gone, and it is prized at the antipodes as well as at home. Dose small, effect sure.

A great many women believe everything that a man says and suspect everything he does.

Minard's Liniment Cures Distemper.

LOST HIS BAIT.

"Yes, sir, the fish was so big it pulled him in the river."

"And he was drowned?"

"No, but he might's well have been, fer he lost his grip on his gallon jug, and it floated downstream, and he lives in a dry county."

ISSUE NO. 29-10.

## NERVOUS SYSTEMS

**Always Follows a Run Down Con-  
dition of the Blood.**

It is an old story now that nervous people tell of how the blood becomes poor and thin, and then the nervous symptoms followed. How many really know that the thin blood was responsible for the nervous disorders? The nerves get all their nourishment from the blood, and as thin blood is deficient in nerve-building material, the nerves become starved and pain and nervous breakdown is the result. Dr. Williams' Pink Pills are a tonic for the blood that supply it with the necessary elements to nourish and tone up the nerves and, the cause being removed, nature does the rest and health is fully restored. Mrs. Harry Patterson, Dauphin, Man., tells how she was cured of nervousness and general debility through the use of Dr. Williams' Pink Pills. She says: "A few years ago I was all run down, and my nervous system apparently all broken up. I was weak, tired and nervous all the time. When I got up in the morning I seemed to be more tired than when I went to bed. I could not walk up an ordinary flight of stairs without sitting down panting for breath, and my nerves trembled like a leaf. I got so that it was almost impossible to do any housework, and so nervous that I wanted to cry about everything I did. I took several different medicines without the least benefit; then I read of Dr. Williams' Pink Pills and decided to try them. After taking two boxes I felt a little better and I got a further supply which I continued taking for about a month when I was as well as ever; could do all my housework without difficulty, and could walk for a long distance without being all tired out. In view of the wonders Dr. Williams' Pink Pills have done for me I sincerely recommend them to all weak nervous, run-down people."

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

### DESSERTS.

**Pineapple Fritters.**—Make a batter with one egg, beaten separately. To the yolk add one-half cup of milk, pinch of salt and enough flour to make a stiff batter, the beaten white and one-half teaspoon of baking powder. Open a can of the best sliced pineapple. Cut each slice of pineapple in two, dip in the batter, and fry in hot lard. Drain sprinkle with powdered sugar, and serve. Fresh fruit is much nicer if obtainable than the canned.

**Pineapple Souffle.**—Melt two ounces of butter in a stew pan, put in three ounces of fine flour, mix with half pint of milk, boil until it thickens; have ready three ounces of pineapple cut small, the same quantity of sugar; put with the cooked mixture, add one by one the yolks of three eggs, then the whites beaten to a stiff froth; make a sauce with one cup of pineapple juice, half cupful of cut pineapple. Cook the pudding three-quarters of an hour.

**Pineapple Cream.**—Select one ripe pineapple, pare, remove the seeds, grate and sugar to suit.

## KNOW REMEDIES FOR ILLS.

**Mankind No Longer in Ignorance  
Concerning Welfare.**

This is indeed the day of the optimist. For, while as Prof. Irving Fisher, of Yale, points out, there are about 90 preventable diseases which are now taking man from this pleasant earth before his time, and while there are probably constantly ill 3,000,000 persons in this country, still nevertheless, we have at least diagnosed our own case, we are no longer suffocating in ignorance concerning our welfare. And those who know the remedies for these ills are leaders who seek, for example, correction of the bad housing conditions that oppress thousands of human beings in our large cities. If the estimate be true that bad housing is responsible for two-thirds of the delinquent children; for two-thirds of the physically ill children; for two-thirds of the deserting fathers; for one-third of the shiftless mothers; if it be true that because of bad housing conditions there will be over 5,000,000 homes consisting of 25,000,000 persons made wretched by mortality and sickness, then the despised idealist who secures legislative control of these conditions and corrects them is indeed the saviour of his people.

### DIDN'T WAIT FOR PROOF.

He was a sewing-machine agent of the most aggressive type. For twenty minutes the lady of the house had been awaiting an opportunity to say that she already possessed one.

At last he paused. Only long enough, however, to thrust a card into the lady's hand.

The bit of pasteboard was certainly a novelty.

"My name is Sellem," it read, "of the firm of Blank and Co., sewing-machine manufacturers, and I intend to prove to you that it is madness to defer purchasing one of our unequalled machines."

After a long description of the machine came the following:—

"You may plead that you are unable to work a machine. I will remove that objection in fifteen minutes, or in three lessons. Will call next Wednesday."

When the agent called again, a 6 foot man opened the door and blandly remarked:—

"You're the sewing-machine man I suppose?"

"Yes; I called last week, and—"

"Yes, I know," interrupted the big man. "You don't know me, I suppose? My name's Bury, of Bury and Keepeim, undertakers, and I intend to prove to you that it is madness to defer purchasing one of our unequalled coffins."

The agent began to edge away.

"You may plead that you are scarcely qualified for a coffin," the big man went on. "I will remove that objection in ten seconds."

But the agent simply tore from the house.

### BLISTERS AND SUNBURN? TRY ZAM-BUK.

Blisters from any cause, painful sunburn patches, stings of insects, and chafed places, are all eased instantly by Zam Buk. Don't have your vacation spoiled by pain from any sore, which Zam Buk could cure in quick time.

This wonderful balm is made from

### APPROPRIATED.

Jest fer keepin' of the cow  
They chucked the chap in prison  
Seems like they oughtn't done it,  
eh?

Well, but the cow it wasn't his'n.  
old friend of his, a Quaker.

"Thee'd didn't leave a valuable  
horse and carriage to a stranger's  
care, Thomas?" remonstrated his  
friend. "Thee'd better go get it,  
and drive to the livery stable. This  
town is not like the little place thee  
lives in."

"I looked the young man over,"  
said Squire Lawson, testily, "and  
in my judgment it was perfectly  
safe to leave him in charge. Let us  
say no more about it."

"Very well," said his friend, but  
when, at the end of two hours,  
Squire Lawson took his leave, the  
Quaker shut his office and accom-  
panied the squire to the place  
where he had left his equipage.

It had vanished, and no inquiries  
brought any information as to  
where it or the young man had  
gone.

"Well, Ames," said the Quaker,  
after an hour's hot, unavailing  
search, "thee has lost a horse and  
carriage, to be sure, but thee still  
has plenty of judgment left, I've  
no doubt."

Only those who have had experi-  
ence can tell the torture corns  
cause. Pain with your boots on,  
pain with them off, pain night and  
day; but relief is sure to those who  
use Holloway's Corn Cure.

Your luck is good if the other fel-  
lows is worse.

Minard's Liniment Cures Colds, Etc.

Love is certainly a contagious  
disease. It always makes me sick  
to see a young couple in love.

**PAINKILLER IS JUST THE REMEDY**  
needed in every household. For cuts, burns  
and bruises, strains and sprains, dander  
a cloth with it, apply to the wound and  
the pain leaves. Good substitutes there  
is but one Painkiller. Perry Davis

benefits of good hearing. Send for free  
booklet giving particulars and names

...whites beaten to a stiff froth; make a sauce with one cup of pineapple juice, half cupful of cut pineapple. Cook the pudding three-quarters of an hour.

**Pineapple Cream.**—Select one ripe pineapple, pare, remove the "eyes" grate, add sugar (pound for pound, or a little less, but it must be sweet, as freezing destroys some of the effects of the sugar). Allow one pint of cream to each pint of pulp and sugar, and freeze. Be sure and have all the ingredients icy cold before combining them.

#### HOT WEATHER DRINKS.

**Orangeade.**—Use two glasses which can be fitted together, or if accessible use a regular shaker. Squeeze into one glass the juice of half a lemon, the juice of half an orange, one teaspoonful of sugar, the white of an egg. Then shake, by fitting the two glasses air tight together, until the egg foams, and lastly add some cracked ice and enough water to fill the glass. This drink is very strengthening.

**Fruit Frappe.**—Take equal parts of the juices of pineapple, orange, lemon and cherries. Add enough sugar to taste and serve with cracked ice. This is delicious on a warm afternoon served with sweet wafers of some sort.

**Current Jelly Punch.**—Whip half a tumblerful of currant jelly to a froth, gradually adding half a pint of boiling water. Add the juice of a lemon and a half cup of sugar, pour a cup of cold water slowly into the whole. The drink is more wholesome without ice than with it, but half a pint of finely shaved ice, added as served, is liked by most people.

#### ON SECOND THOUGHT.

"Geoffrey, perhaps you'd better not come to see me quite so often. People are beginning to talk."

"Beginning to talk, are they, Millie? Well, do you care a straw for that?"

"N-no!"

**Red, Weak, Weary, Watery Eyes.** Relieved By Murine Eye Remedy. Try Murine For Your Eye Troubles. You Will Like Murine. It Soothes. 50c At Your Druggists. Write For Eye Books. Free. Murine Eye Remedy Co., Toronto.

The speed mania never hits a very hard on his way to school.

Minard's Liniment Cures Diphtheria.

#### A COMPLIMENT.

"I wonder what the teacher meant about the singing of my two daughters?"

"What did he say?"

"He said that Mamie's voice was good, but Maude's was better still."

**Costiveness and Its Cure.**—When the excretory organs refuse to perform their functions properly the intestines becomes clogged. This is known as costiveness and if neglected gives rise to dangerous complications. Parmelee's Vegetable Pills will effect a speedy cure. At the first intimation of this ailment the sufferer should procure a packet of the pills and put himself under a course of treatment. The good effects of the pills will be almost immediately evident.

A high roller cuts a queer figure when he gets a skate on.

Minard's Liniment Cures Cargot in Cows.

Blisters from any cause, painful sunburn patches, stings of insects, and chafed places, are all eased instantly by Zam-Buk. Don't have your vacation spoiled by pain from any sore, which Zam-Buk could cure in quick time!

This wonderful balm is made from herbal juices and is highly antiseptic. Poison from insect sting, barbed wire scratch, or thorn prick is immediately rendered harmless as soon as Zam-Buk touches it. Stops the stinging, smarting pain. Mothers with young babies should use it for chafing sores caused by perspiration, clothes-rubbing, etc. Also good for piles, ulcers, and festering sores. All druggists and stores sell at 50c. box, but refuse harmful imitations.

**First Darling.**—I hope you never nag your husband. **Second Darling.**—Only when he's beating the rugs. **Wheer** thoroughly irritated he makes a much better job.

One of the greatest blessings to parents is Mother Graves' Worm Exterminator. It effectually expels worms and gives health in a marvelous manner to the little one.

**Caller.**—Is Mrs. Brown at home? **Artless Parlormaid** (smiling confidently)—No, ma'am—she really is out this afternoon.

**CRIEVOUS ERRORS** made nowadays. For instance when a person buys an imitation of "The D. & L." Menthol Plaster said to be the genuine. Be careful and see that they are made by Davis & Lawrence Co.

#### INEXHAUSTIBLE STOCK.

Squire Lawson never asked for or accepted any advice. One day he drove fifteen miles to the nearest large town, and there left his horse and buggy in a side street in charge of a strange young man. Then he went off in search of an

Relief for the Depressed.—Physical and mental depression usually have their origin in a disordered state of the stomach and liver, as when these organs are deranged in their action the whole system is affected. Try Parmelee's Vegetable Pills. They revivify the digestive processes, act beneficially on the nerves and restore the spirits as no other pills will. They are cheap, simple and sure, and the effects are lasting.

#### BREAKING THE INFATUATION.

Mrs. Jones—"I'm afraid our Lucy is falling in love with Ferdinand Five-week."

Mr. Jones—"I'll stop that! I'll let her know that I've got a husband picked out for her."

Mrs. Jones—"That won't change her a bit."

Mr. Jones—"Yes, it will. I'll tell her I've picked Ferdinand; then she'll be sure to want the other fellow."

Bob was telling about his visit to the country. While there he had acquired some rustic idioms, and his mother was correcting these as he proceeded. "Well, we goes up—" "Went up." "Went up on the farm—" "To the farm." "To the farm, and there we see—" "We saw." "We saw a little kid—" "Little child. Now, begin again and tell it properly." "Well, we went up to the farm, and there we saw a goat's little child." (Further narration suspended.)

disease. It always makes me sick to see a young couple in love.

**PAINKILLER IS JUST THE REMEDY** needed in every household. For cuts, burns and bruises, strains and sprains, dampen a cloth with it, apply to the wound and the pain leaves. Avoid substitutes, there is but one "Painkiller"—Perry Davis'—25c and 50c.

"How do you find your way home when out of sight of land?" asked the girl of the captain. "By means of the compass," he replied, genially. "Oh, yes," she exclaimed, delightedly; "and when you are going from home, I suppose you use the gopass." After that he kept busy, and allowed no passengers to come near him.

In the causes of infant mortality cholera morbus figures frequently, and it may be said that complaints of the bowels are great destroyers of child life. If all mothers would avail themselves of so effective a remedy as Dr. J. D. Kellogg's Dysentery Cordial many a little one could be saved. This Cordial can be given with safety to the smallest child, as there is no injurious substance in it.

"Johnny," said the boy's mother, "I hope you have been a nice, quiet boy at school this afternoon." "That's what I was," answered Johnny. "I went to sleep right after dinner, and the teacher said she'd whip any boy in the room who waked me up."

Digby, N.S.  
Minard's Liniment Co., Limited.

Gentlemen,—Last August my horse was badly cut in eleven places by a barbed wire fence. Three of the cuts (small ones) healed soon, but the others became foul and rotten, and though I tried many kinds of medicines they had no beneficial result. At last a doctor advised me to use MINARD'S LINIMENT and in four weeks' time every sore was healed and the hair has grown over each one in fine condition. The Liniment is certainly wonderful in its working.

Ingredients: Sulphur. Glycerin. Quinin. Sodium Chlorid. Capsicum. Sage. Alcohol. Water. Perfume.

Anything injurious here? Ask your doctor.  
Anything of merit here? Ask your doctor.  
Will it stop falling hair? Ask your doctor.  
Will it destroy dandruff? Ask your doctor.

## Does not Color the Hair

J. C. AYER COMPANY, Lowell, Mass.

## COUNTING BY TENS.

And a Suggestion as to Why We Buy Things by the Dozen.

Did it ever occur to you as strange that while we count by tens we buy so many articles by the dozen? If we ask the price of apples, oranges, oysters, eggs, collars, handkerchiefs and many other things we will be told so many cents or dollars a dozen, or if large quantities are wanted so much a gross, which means a dozen dozen.

How do you suppose this has come about? It was this way: Nearly all savage people count by their fingers—that is, if they want to tell you they have seen two wild beasts they will hold up two fingers, and if ten they will hold up both hands, and if twenty both hands twice, and so on. Babel also learn to count by their fingers and toes, and to many people it seems as if that were the only possible way.

It is, however, rather a clumsy way, as you find out when you try to divide ten. Say, for example, you have ten apples. You can only make an equal division among two or five persons, while if you have twelve you can give an equal number to two, three, four or six. We find the same inconvenience in dividing a dollar and often have to pay 13 cents for what should properly cost 12½ cents.

If we had been born with two, four six or eight fingers or toes, like some animals, it is possible that we should have counted differently, but it does not now seem likely there will ever be any change in the ten or decimal system, as it is called, especially since the Arabic numerals now used nearly everywhere are based on this system.

—Brooklyn Eagle.

## SPOILED THE PLOT.

A Display of Juvenile Affectation That Saved the Mongrel.

About three weeks ago there strolled into a Ridley Park house a dirty, disreputable looking dog. He was of no particular breed, but a general mixture of all there are. Out of the kindness of her heart the cook gave him a few bites to eat, and from that time on, try as they would, the family could not get rid of the canine. The small children took a great fancy to the dog and named him Blue. Their father and mother grew tired of seeing Blue around and secretly plotted to get him out of the way. They feared to kidnap him openly by day, for there would surely follow much protest and distress on the part of the children. Accordingly plans were made for losing Blue some place far from Ridley Park by night. The evening that the plot was to be carried out, just after supper, father, mother and a five-year-old boy were in the parlor. The little fellow was fondling the dog as if he were his best friend in the world. Finally he seized the dog firmly under the shoulders and, looking straight into his eyes, lisped out, "Bwoolie, do you wove me?" and

A Fire In  
The WoodsWhen It Was Over There  
Was a Change of Heart

By CLARISSA MACKIE

Copyright, 1910, by American Press Association.

The Sunday dinner was over, and Rebecca was washing dishes in the big kitchen. Henry Miles and his wife came out dressed in their best clothes and got into the waiting buggy. Ever since they had been married twenty-five years before the Sunday afternoon ride had been a regular proceeding.

Their daughter Beth waved them a farewell as they drove out of the big gate.

Beth looked anxiously away toward the woods that bordered the distant wheatfields. Behind them rose a pale gray cloud now and then flecked by flying cinders. Rain had not fallen for several weeks, and the woods were like tinder, and the paths were thickly carpeted with dry leaves fallen from last year.

The kitchen windows faced the wheatfields, and Rebecca's red face was pressed anxiously to the pane. Then she saw Beth and came to the door.

"The woods are afire, Miss Beth," she said excitedly. "Your pa's wheat will be done for if the wind don't change pretty soon."

The wheatfield was an undulating sea of pale green blades six inches high. The dry weather had slightly parched the tips, and Beth bent down to assure herself that the grain was too green to be affected by the fire even if it should reach the fields. When she looked up again several men were running across the field. One of them saw her, paused and turned back.

Slowly she walked through the wheat, her light tread scarcely crushing the young shoots. Her fair cheeks took on the rose tint of early dawn, and her blue eyes were veiled under a thick fringe of lashes. The man watched her coming toward him, his handsome eyes drinking in her fresh, spring-like beauty. Her pink gown fell softly about her slender form as the green wheat rippled about her feet.

At last Beth lifted her shy eyes and saw his good looking face with its reckless, smiling lips—saw the immaculate whiteness of his collar and cuffs and the trim neatness of his handsome clothes. He carried his coat on his arm and slipped into it as she came up with him. They had smiled a greeting into each other's eyes, and their first words were com-

Without further parley Ralph helped Beth over the fence and into a woodland path, through which they hurried at a greater speed than the young man fancied. Given this time and opportunity, he felt that the April woods were an ideal spot in which to ask Beth the momentous question that had been hovering on his lips for weeks. He was quite sure of her answer, for she had shown her preference for him during the past winter, and his cleverness and wit had quite thrown Ben Wyatt into the shade—raw, country bumpkin that Ben was!

Ralph's lips curled in a little smile of contempt as he thought of the rival who had quietly withdrawn from the contest for Beth Miles' favor when the rivalry became the subject of open comment.

The smoke grew thicker, and the air was filled with flying cinders that fell in crisp flakes on their heads. In the distance they could hear hoarse shouts of men, the crackling of burning trees and underbrush and the barking of dogs.

Where the three roads crossed was to be the battleground. If the fire crossed Deep Hollow road the little gathering of negro cabins was doomed. The fire was coming toward them now, and they could see the forms of men through the smoke. Strange, fantastic forms they were, frantically beating back the encroaching flames or shoveling loosened soil on the creeping fire that ate along the ground.

The group of cabins was untouched, but in grave danger. The unfortunate occupants were removing their poor bits of furniture, and two ramshackle carts were being filled with the goods. Old Uncle Peter Green occupied a chair of state in one cart. A tottering chair it seemed owing to the uneasy antics of the frightened mule in the shafts. Weeping and praying and lamenting, they moved dolorously down the road along which Beth had just come.

"Go down to the farm, Judy," she said to the dominant spirit of the group. "Rebecca will take care of you till the danger is over."

Out of the thick of smoke a man turned and recognized her; saw her standing there in her pink cotton dress dazed by the smoke. Beside her was Ralph Clinton leaning on an idle shovel, whistling softly as he watched the battle with the approaching flames.

Ben Wyatt leaped into the road and confronted them. Clad in blue flannel shirt and corduroy trousers, hatless, his sun browned face and arms black with soot and grime, he presented a sorry contrast to Ralph Clinton. But somehow Beth's glance caught his steady gaze and lingered there for a brief instant, and she saw nothing to despise in Ben Wyatt, homely farmer that he outwardly was.

"Get back there, Clinton!" commanded Ben angrily. "Take Beth away from here. Can't you see it's no place for a woman?"

"Mind your own business, Wyatt!" retorted Ralph. "Get to work there on your foo's job!"

There was no time for further argument. The men, who had strung out in a wide semicircle, were drawing closer together. They had started a back fire, and there was danger when the two fires met that the sudden leap of flames might ignite the vegetation on the bluff. If it did the woods were doomed. But the farmers fought valiantly, and little by little the flames were beaten back from the crossroads until they smoldered down and left charred and blackened desolation wherever their blasting fingers had touched.

Tired and exhausted, the fire fighters

The treat in store for them.

## Synopsis of Canadian Northwest Land Regulations.

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 83 acres solely owned and cultivated by him or his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price, \$3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent and cultivate fifty acres extra).

A homesteader who has exhausted his homestead right and cannot obtain a pre-emptive may take a purchased homestead in certain districts. Price, \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.00.

W. W. CORY,

Deputy of the Minister of the Interior.

and cuffs and the trim beatness of his handsome clothes. He carried his coat on his arm and slipped into it as she came up with him. They had smiled a greeting into each other's eyes, and their first words were commonplace enough.

"The woods are afire," said Ralph Clinton. "Don't you want to go along and see the fun, Beth?"

A look of disappointment crept into the girl's face. "Aren't you going to fight it, Ralph?" she asked.

The young man laughed good naturedly. "It isn't necessary. There are half a hundred trying to kill it with sand or back fire, but it's got too big a headway. Besides, the wind is strong from the southwest, and nothing can stop it until it dies out for want of something to burn."

"Where is it now, Ralph?" questioned Beth quietly.

"Out in Deep Hollow woods—a spark from the railroad started the blaze and away she went! There were five miles burned over at Wayneville yesterday."

"Deep Hollow woods belong to my father. He owns right through to the farm here. It means a serious loss to him," said Beth.

"It's too bad, Beth, but nothing can save it, so there's no use in worrying," returned Ralph carelessly. "Come; let us go and see the fun. The woods are great at this time, you know. Perhaps you may find a moss-rose flower."

"Wait a moment," said Beth, and she turned and with flying feet recrossed the field to the barn. When she returned she carried a shovel in one hand.

"There!" she panted, thrusting the utensil into his unwilling grasp. "Take that along, Ralph. I'm ashamed to have you appear there unprepared to fight the fire."

"Not in these clothes—not on your life!" ejaculated Mr. Clinton inelegantly. "I'll carry the shovel for the looks of the thing, but if I fight a forest fire it will be by proxy! Some of the negroes from the hollow will be smoked out and glad of a job to take my place for a consideration, eh?"

"Those poor negroes!" cried Beth, disregarding his selfish speech. "I forgot all about them. Their little homes will be ruined. Let us hurry, Ralph. In spite of your joking I am sure you are going to help in a time of need like this."

## PURIFIED HIS BLOOD

Dr. Morse's Indian Root Pills  
Healed Mr. Wilson's Sores

When the sewers of the body—bowels, kidneys and skin ducts—get clogged up, the blood quickly becomes impure and frequently sores break out over the body. The way to heal them, as Mr. Richard Wilson, who lives near London, Ont., found, is to purify the blood. He writes:

"For some time I had been in a low, depressed condition. My appetite left me and I soon began to suffer from indigestion. Quite a number of small sores and blotches formed all over my skin. I tried medicine for the blood and used many kinds of ointments, but without satisfactory results. What was wanted was a thorough cleansing of the blood, and I looked about in vain for some medicine that would accomplish this.

At last Dr. Morse's Indian Root Pills were brought to my notice, and they are one of the most wonderful medicines I have ever known. My blood was purified in a very short time, sores healed up, my indigestion vanished. They always have a place in my home and are looked upon as the family remedy."

Dr. Morse's Indian Root Pills cleanse the system thoroughly. Sold by all dealers at 25c a box. 6

until they smoldered down and left charred and blackened desolation wherever their blasting fingers had touched.

Tired and exhausted, the fire fighters lay panting in the sand of the roads.

It was Beth who sent a lurking pickaniny to call the fugitives home to the cabins, and it was she who found a pail and dipper in Judy Brown's kitchen and went to the bubbling spring for water to refresh the tired men. Before it came Ben Wyatt's turn to drink from the dipper she slipped away down the road toward home. As she passed him Ralph Clinton arose and followed her.

"See here, Beth," he said disagreeably, "I'd like to know what I've done to deserve such treatment at your hands."

Beth turned and surveyed him with level eyes. "It isn't anything you've done, Ralph," she said quietly. "On the contrary, it's what you haven't done. I don't think you can understand how I feel about it, Ralph. I thought I cared for you, but I am afraid it was your appearance I loved after all. Please forget all about me if you can," Beth said contritely.

"Well, I seem to have got all that's coming to me today," he said jauntily. "Goodbye!"

"Goodbye," said Beth gently. As she watched him walk slowly away she felt a pang at the shattering of a cherished illusion, while at the same time there was a strange, sweet joy in her heart, mingled with a fear that she had dallied with real love and lost it.

Ralph Clinton turned to fling a backward taunt, "I suppose you think you can whistle Ben Wyatt back, but you're too late, Beth!" Then he went on and disappeared.

The girl's face whitened at the taunt and its insinuation, and with a little strangled sob she leaned against the friendly trunk of a tree and hid her eyes.

Ben Wyatt's voice behind her startled her to betray telltale tears on the thick lashes. Grimy and scorched, hatless and tattered and scratched, he was a sorry looking lover. The look in his faithful eyes made up for everything that seemed lacking.

"I heard what that pup said just now, Beth," said Ben grimly, standing with folded arms before her. "I ought to have stepped in long ago and told you what I want to say right now, but somehow I thought you liked him best. This forest fire isn't a patch to the fire I've been through this winter! You don't have to whistle Ben Wyatt back—he's here. Beth, darling, shall he stay?"

Beth came to his arms with a happy cry, and they must have forgotten the passage of time, for the returning cavalcade of the fugitives startled them into embarrassed realization that their secret was no longer their own, but was shared by the grinning denizens of Deep Hollow wood.

"Land or love!" shouted Aunt Judy exuberantly, and to the two, blushing under the oak tree as the procession passed, it was verily a "land of love."

## Toronto Men in Big Fight

Toronto furnished more supporters of Jack Johnson and less spectators for the big fight in Reno than any city of a similar size on the continent.

It is a peculiar coincidence that the managers of both principals are Toronto men, viz., Sam Berger, manager of Jeffries, and Tom Flanagan, manager of Johnson. Berger spent his boyhood and attended school in St. Matthew's Ward, while, of course, Flanagan is at present a citizen of that city, with a legion of athletic followers. Johnson's recent frequent visits to Toronto make him popular, regardless of color.

How to Tell if Your Hair is Diseased.

Even if you have a luxuriant head of hair, you may want to know whether it is in a healthy condition or not. 98 per cent of the people need a hair tonic.

Pull a hair out of your head, if the bulb at the end of the root is white and shrunken, it proves that the hair is diseased, and requires prompt treatment if its loss would be avoided. If the bulb is pink and full, the hair is healthy.

We want everyone whose hair requires treatment to try Rexall "93" Hair Tonic. We promise that it shall not cost anything if it does not give satisfactory results. It is designed to overcome dandruff, relieve scalp irritation, to stimulate the hair roots, tighten the hair already in the head, grow hair and cure baldness.

It is because of what Rexall "93" Hair Tonic has done and our sincere faith in its goodness that we want you to try it at our risk. Two sizes, 50c and \$1.00. Sold only at our store. The Rexall Store—T. B. Wallace.

## THE STATELY STORK.

Is Immense Power on the Wing and His Lack of Voice.

In Holland the nests of storks are generally on the summit of a tall post, put up on purpose for them, on which is fixed an old cart wheel. Says an English writer: "A Dutch gentleman

## A WARM GREETING.

She Overcame the Rules and Met Him at the Station.

She was rushing through the gate past Bill Gibson, the gateman, like a passenger train by a flag station, but Gibson stopped her.

"Let's see your ticket, lady," he asked politely enough.

"Oh, I have no ticket," she said, "but won't you please let me through. I want to—"

"It's against the rules," cut in Gibson.

"Yes, but I want to be there on the platform"—all this breathlessly—"I'm so anxious to meet him."

"Well, go on through," Gibson told her. "I guess it'll be all right." Then to himself he soliloquized: "Why not? Perhaps she won't always be so keen to meet him; probably hasn't been married but a month or so; maybe isn't married yet at all. Far be it from me to interrupt her in such nice little attentions."

The train came in. Gibson sort of looked out of the tail of his eye for a chance to witness the happy reunion. Such sights illumine the dark recesses of the dingy old depot.

In a moment he caught sight of her. But her husband or sweetheart—if she had one or the other—was not with her. However, she was not alone. Under her arm she clutched tightly a compact brindle English bulldog with a countenance like a dissipated gar-

## TWO STOCK DEALS.

Sherwood Took Flood's Boat and Later Handed it Back.

In Joseph L. King's "History of the San Francisco Stock and Exchange Board" is this story of Flood and Sherwood:

In the early days, in the seventies, quite a number of operators would gather together in Cahill's office on Montgomery street, near California. Among them were Mr. James C. Flood and Mr. Robert Sherwood. Sherwood had 1,000 Consolidated Virginia, the stock selling at about \$100. One day Sherwood, on looking at the prices, remarked that he was getting tired of that Consolidated Virginia; it did not move much. Mr. Flood said: "What are you growling about? If you are tired of that stock I will take it off your hands at \$100." "Sold," said Sherwood, and the stock changed hands.

In course of time the Nevada bank building was erected on the corner of Pine and Montgomery streets. On meeting Sherwood one day Mr. Flood remarked, "We built that Nevada block on the profits of that 1,000 shares of Consolidated Virginia you sold us."

Subsequently, in the Sierra Nevada and Union deal, Mr. Flood approached Sherwood on the street and bought from him 5,000 Union at \$200 a share, the transaction footing up \$1,000,000.

Sherwood built the Union block, on the gore corner of Pine, Davis and Market streets. Meeting Flood one day, he remarked, "I built that Union block with the profits of that 5,000 Union I sold you."

## Waiting For the Note.

An English churchman tells the following:

"At one of our cathedrals the minor canon was ill and could not sing. A suffragan bishop had a good voice and volunteered to sing the litany. 'Go,' he said to the verger, 'and tell the organist that I will sing the litany and ask him to give me the reciting note.' 'Please, sir,' said the verger to the organist, 'the bishop 'as sent me to you to say he will sing the litany.' 'All right,' said the organist. Seeing the verger remain, he said, 'You need not stay.' 'Please, sir, the bishop asked me to ask you if you would give him a something—I didn't quite catch—note.' 'You mean the reciting note.' 'That's it, sir; that's it.' Seeing the verger still remaining, he said, 'You need not stay.' To which the verger said, 'Please, sir, shall I take it to his lordship?'"

## Camel Carriages.

Camel carriages are not common conveyances in most parts of India, but on the great trunk road leading to Delhi they are frequently to be seen. They are large, double story wagons, drawn sometimes by one, sometimes by two or even three camels, according to their size. Iron bars which give them a cage-like appearance were originally intended as a defense against robbers, and the carts were probably also used for the conveyance of prisoners.

## Her Sad Fate.

"What a beautiful little girl she is!" "Yes, and, just think, she'll have to marry a mere American unless her father chirks up and exhibits more ability as a financier than he has ever shown thus far."—Chicago Record-Herald.

His Lack of Voice.

In Holland the nests of storks are generally on the summit of a tall post, put up on purpose for them, on which is fixed an old cart wheel. Says an English writer: "A Dutch gentleman of my acquaintance has one such post in his grounds within sight of his library window, but he improves on the cart wheel by having an iron framework for the reception of the nest. The first year it was put up, toward the end of June, a solitary young stork used to come daily and inspect this framework. I saw him there myself one day, standing in the empty receptacle exactly like a would be benedict inspecting an empty house, contemplating the view and wondering if the drains are all right. The verdict was apparently favorable, for next season saw the nest occupied by the newly wedded pair. Their power of wing is very fine, and on hot days I have watched them ascending spiral circles, hardly moving their broad, black wings, till they have looked no bigger than flies. After the young are hatched they appear to be suspicious of one another and unwilling to leave the nest unguarded."

Storks have no voice. The only noise they make is "klapping" (snapping their great red mandibles rapidly and loudly). Thus they greet one another, generally by throwing back the head until the upper mandible rests on the back, but occasionally "klapping" is performed with the head and bill in the natural position.

#### A South Arabian Food Plant.

Jowari, a tall, slender plant resembling corn and headed with a grain something like millet, is the Abdali's chief crop. He feeds the stalk to his camels and eats the grain himself. Three crops a year are produced. Jowari requires little cultivation except weeding, which the Abdali does by hand, and when ripe he cuts it off close to the ground with his hunting knife. New shoots spring up from the roots to become the next crop. For a camel load of about 125 pounds he receives at Aden an average of two rupees, or \$64.88. A fair yearly yield is twenty camel loads an acre.—Consular and Trade Reports.

#### Fairly Warned.

"Mr. Smith," spoke up the young lawyer, "I come here as a representative of your neighbor, Tom Jones, with the commission to collect a debt due him."

"I congratulate you," answered Mr. Smith, "on obtaining so permanent a job at such an early stage in your career."—Success.

#### Seeking Information.

Miss Yankie—And what has Lord Chichester done that you think so interesting? Lord Defendus—He won a Derby, y' know. Miss Yankie—How lovely! On an election bet?

#### Taffy For Grandmother.

There is hardly anything that flatters a grandmother more than telling her you don't believe she is one.—Galveston News.

It is a great misfortune not to have enough wit to speak well or not enough judgment to keep silent.—La Bruyere.

## CASTORIA

#### The Price of Eloquence.

The auctioneer held up a battered fiddle.

"What am I offered for this antique violin?" he pathetically inquired. "Look it over. See the blurred finger marks of remorseless time. Note the stains of the hurrying years. To the merry notes of this fine old instrument may have danced the minut in glittering Versailles. Perhaps the vestal virgins marched to its stirring rhythms in the feasts of Lupercalia. Ha, it bears an abrasion—perhaps a touch of fire. Why, this may have been the very fiddle on which Nero played when Rome burned."

"Thirty cents," said a red nosed man in the front row.

"It's yours!" cried the auctioneer cheerfully. "What next?"—Cleveland Plain Dealer.

#### A Stubborn Husband.

A most interesting phenomenon is the stubborn husband. He is not a bad man. He is contrary, and he has to be managed. He is usually married to a clever little woman, who is constantly devising schemes to accomplish the things which make their joint lives a success.

He has no suspicion of this. If he had he would be so mad he could undoubtedly eat her. So all through life she goes on swinging a turnip ahead of his nose to make him go the same as though he were a balky mule. She is a cheery little body, and she grows plump with every year, and she does her smiling behind the door or she chuckles in her sleeve when he is not by. The stubborn husband is as interesting as a bug.—London Standard.

## It's Easy to Stop Pain

TAKE ONE OF THESE LITTLE TABLETS AND THE PAIN IS GONE.

"I use Dr. Miles' Anti-Pain Pills for Neuralgia, LaGrippe and all pains. I don't intend to be without them, for I find ready relief in them for everything I use them for."

MRS. L. F. MILLER,  
120 W. 6th St., Davenport, Ia.

#### All Pain

"In my family Dr. Miles' Anti-Pain Pills are used for headache, colic and other pains, and always give relief at once."

## Hennequin's Infant Tablets

Save Babies' Lives. For Babies and Small Children. (Made in France.) Dr. Hennequin's Infant Tablets saved our little girl's life. Three doctors said she could not live. The Tablets cured her.—Mr. E. R. McBRIDE, Napanee, Ont.

My baby was so weak from sickness that he could hardly walk. We thought he would die. We could find nothing to help him. I was given a sample package of three Hennequin Tablets; we used them; I saw a change at once. We secured the Tablets and our baby improved every day, and is now a bright, fat, good natured boy; you could not believe he was the same child. They certainly cured my baby and saved his life. I believe them to be the best medicine ever sold for babies. Mothers if your babies are not well take my advice and try these Tablets.—MRS. JAMES RIDDELL, Barrydale, Ont.

We have hundreds of such letters. If the Tablets were not what you need we would not offer to give them away and prepay them. If your baby is not well send for trial package. Hennequin's Tablets have the letter "H" stamped upon them—this is your guarantee.

All dealers, 25c per package, or 5 for \$1.00 sent postpaid to any address.

## GOLD OF THE INCAS FOUND.

Bolivia May Become Centre of the World's Supply.

If government reports may be accepted as truthful, all the gold that has been taken out of the fields of California and the Klondike of Alaska will be insignificant compared with the product of the fields of Bolivia in South America within the next few years. The source of the wealth of the ancient Incas has been found in its unexplored interior. More gold is left there than was mined by the old civilized tribe of Indians and which enabled them to offer to Pizarro as a ransom for the Incan King gold to fill a room 22 by 27 feet. The same field were the source of the metal that enabled the Indian tribe to furnish the Temple of the Sun, which Pizarro's followers reported was "literally covered with plates of gold."

The report is made by Alexander Benson, the American secretary of the legation at Bolivia. He says that Bolivia may become the centre of the world's gold supply through the development of these fields by modern machinery. Here and there a shrewd Peruvian has plowed one and been rewarded with riches. The reason why these fields have not been developed has been the immense difficulty in reaching the fields and in transporting any of the products from them. Transportation is difficult in the extreme and the cost enormous. Rough mule trails are the only means of entering this region and the transportation of heavy machinery now is well nigh impossible until passable roads are built. The building of these roads and the other preparations necessary before the gold can be taken out and marketed affords a great opportunity for American capital and enterprise.

The gold is declared to be principally in the forest-clad ravines of the eastern Cordilleras, which culminate in the important River of Kaka. The trails that lead in here and the appearance of the soil show that mining has been carried out to a great extent by old methods, but the gold that could be reached only by modern mining methods is there still. This has been done by private parties that made large fortunes within a few years of working.

In the River of Kaka it is not unusual to wash a pan of surface dirt and find gravel averaging \$1 a yard on the surface, which would indicate enormously valuable deposits below. Where the river widens out below In-

cahuara and the canyons give way to an open country, gravel is deposited in large island and bars. These form a natural gold-saving table for all the gold-bearing flooded rivers that emerge from the richest known part of the Andean mountain chain.

On the River Kaka, where washing tests for gold have been made, there is a very large proportion of black sand, which accompanies the gold in the residues washed. This black sand is very heavy, non-magnetic, and is likely to show under analysis, in addition to a considerable quantity of gold, both tin and platinum.

## The Peanut's Perfections.

The man who buys 5 cents' worth of peanuts perhaps doesn't realize that his purchase is helping to build up one of the largest farm products in this country, now worth some \$15,000,000 annually. The thin covering is very like wheat bran and is excellent food for live stock when mixed with other things. The shells are burned in the factories as fuel, and the ash is used for fertilizer. The vines make fine forage. Those peanuts that are not sold on the market are ground up into butter and into meal, which is used in the manufacture of confections of various kinds. But oil is the most highly prized by-product of the peanut, of which a bushel will yield about a gallon.

## The Limitations of Science.

Johnny was sent to study mathematics, and the teacher told him that it was a true science.

"For instance," she said, "if it takes one man twelve days to build a house, then twelve men could build it in one day."

Johnny replied: "And 288 men will build it in an hour, 17,280 in a minute, 1,036,800 men will put it up in a second. Now, I don't believe they could build even a single brick in that time. Again, if one ship can cross the Atlantic in twelve days, twelve ships should be able to cross it in one day. I don't believe that either, so I'm not going to study mathematics." And Johnny left the teacher studying it herself.

## Considerate.

"Have you ever done anything to make the world happier?" asked the solemn looking person with the unbarbered hair.

"Sure," answered the jolly man with the double chin. "I was once invited to sing in public and declined."

# SAVED FROM THE KNIFE

## Appendicitis Cured By "Fruit-a-tives"

NEWBURGH, ONT., Feb. 12th. 1910.

"Just about a year ago, our daughter Ella, (fourteen years), was taken with terrible pains in the right side. The pain was so severe that we had to carry her to bed. We at once put her under the care of a first-class doctor, who pronounced it a case of Appendicitis and advised an operation.

We took her to a hospital in Kingston where she was again examined by an eminent specialist. He said she had Appendicitis and must be operated on at once if we wanted to save her life. As we had taken her to Kingston to have this done, we were ready, but our daughter was afraid and cried and begged so pitifully, that we postponed it for that day. Luckily for us and for her, an uncle came in with some 'Fruit-a-tives' and insisted on Ella taking them. Good results were apparent, almost from the first dose, and the continuous treatment cured her.

'Fruit-a-tives' saved our daughter from the surgeon's knife and to-day she is enjoying the best of health."

J. W. FOX, (Father).  
LILLIAN FOX, (Mother).

Words cannot express the gratitude of Mr. and Mrs. Fox. And Miss Ella will always remember "Fruit-a-tives"—the discovery of an eminent physician, and the only medicine in the world made of fruit. 50c. a box, 6 for \$2.50, or trial box, 25c. At dealers, or sent, postpaid, on receipt of price by Fruit-a-tives Limited, Ottawa.

## How Japs Play Ken.

In its most widely practiced form the basis of the Japanese game of ken is that the fully outstretched hand signifies paper, the fully closed hand a stone, and two fingers alone extended, the rest being closed, scissors. Each of the players, counting one, two, three, throws out his hand at the moment of pronouncing three, and the one whose manual symbol is superior to that of the others, according to the theory of the game, wins the trial. Superiority is determined on the hypothesis that whereas scissors cannot cut a stone they can cut paper and whereas paper is cut by scissors it can wrap up a stone—consequently scissors are inferior to stone, but conquer paper; stone is inferior to paper, but conquers scissors, and paper is inferior to scissors, but conquers stone. There are innumerable varieties of the game.

## The Only Thing They Ever Did.

John Bright's powers of sarcasm were almost unrivaled. Some of his sharpest utterances were against members of the nobility. When boasts had been made of the antiquity of a prominent family, that their ancestors came over with the Conqueror, his reply was prompt, "I never heard that they did anything else."

## Her Kind Friend.

Maud—So he had the cheek to ask my age, did he? Well, what did you tell him? Ethel—I told him I didn't know positively, but I thought you were just twenty-four on your thirtieth birthday.—Club-Fellow.

## Conditional.

"If I ask your father's consent will you marry me?"

# A Mystery

## The Wagon Train That Was Lost In the Mountains

By B. CRITTENDEN LYTLE

Copyright, 1910, by American Press Association.

Years ago, when there were no railroads between the Atlantic and Pacific oceans, a wagon train was lost in the Sierra Nevada mountains. It was last seen by some Indian hunters. Searching parties went out to find it without success. At last it was given up and forgotten.

The leader of the party was Edward Earle. He was a widower with a little daughter, Elizabeth, whom he had left in the east in care of his sister. Elizabeth was five years old when her father was last heard from, but she took a deep interest in the story of his disappearance. What to older people was a mystery was to her a child's story similar to those she read in her fairy books. It did not occur to her that there was anything more wonderful in the disappearance of a wagon train consisting of half a dozen teams and ten or twelve people than in changing a man into a frog. In other words, she did not realize that the one really happened and the other was impossible.

# NERVOUS, LIFELESS DEBILITATED MEN

YOUNG MEN AND MIDDLE-AGED MEN, the victims of early indiscretions and later excesses, who are failures in life—you are the ones we can restore to manhood and revive the spark of energy and vitality. Don't give up in despair because you have treated with other doctors, used electric belts and tried various drug store nostrums.

Our New Method Treatment has snatched hundreds from the brink of despair, has restored happiness to hundreds of homes and has made successful men of those who were "down and out." We prescribe specific remedies for each individual case according to the symptoms and complications. We have no patent medicines. This is one of the secrets of our wonderful success as our treatment cannot fail, for we prescribe remedies adapted to each individual case. Only curable cases accepted. We have done business throughout Canada for over 20 Years.

### CURABLE CASES GUARANTEED OR NO PAY

Are you a victim? Have you lost hope? Are you intending to marry? Has your blood been diseased? Have you weakness? Our New Method Treatment will cure you. What it has done for others it will do for you. Consultation Free. No matter who has treated you, write for an honest opinion. Free of Charge. Books Free—"Boydell, Manhood, Fatherhood." (Illustrated) on Diseases of Men.

NO NAMES USED WITHOUT WRITTEN CONSENT. No names on boxes or envelopes. Everything Confidential. Question List and Cost of Treatment FREE FOR HOME TREATMENT.

NO NAMES USED WITHOUT WRITTEN CONSENT. No names on boxes or envelopes. Everything Confidential. Question List and Cost of Treatment FREE FOR HOME TREATMENT.

a man into a frog. In other words, she did not realize that the one really happened and the other was impossible.

But as Elizabeth grew beyond the age to be impressed by the imagination this story of the lost wagon train began to grow upon her. Had it not been given to her by those in whom she had confidence she would not have believed it. A man might disappear to return many years after with an explanation. But how could wagons, horses and men all go out like a candle?

Elizabeth was the only person who fancied that her father would some day come back. Her elders did not oppose her in this, though they did not pretend to agree with her. But as time wore on she realized that the case of the wagon train her father conducted was like that of a ship going down under some marine catastrophe, carrying with it every living person. There came a hope that her father had left some message for her which she would some day receive. She was told that he had had some property, but he alone knew where it was located. No will had ever been found nor any other papers to throw light upon his affairs. But this was not strange since he had all his effects with him.

By the time Elizabeth had become eighteen this question of her father's disappearance had grown upon her to such an extent that it became a sort of monomania. Possibly this resulted from trying to solve an insoluble question. She was continually asking herself how such a thing could happen. One of her suppositions was that the train had been carried away by a cloudburst. Another was that it had been buried under an avalanche. But in the case of the cloudburst the remains of men, horses and wagons would be carried down where they would be seen, and in the case of the avalanche they would appear as soon as the snow melted. It was brooding on these problems that at last threatened to affect Elizabeth's mind.

When Henry Merryweather began to court Elizabeth her aunt hoped that a living interest would relieve her from the burden of a dead one. Henry was a fine fellow and grew more and more wrapped in the serious girl, made so by a mystery. By delicate attentions he endeavored to withdraw her mind from the topic upon which it was abnormally fastened. But his efforts were a failure. Despite all he could do he elicited only an occasional smile, a temporary interest.

The time had come when Elizabeth felt that she must relieve her aunt of her support, and she accepted a position as teacher in a school. Occupation helped her in the matter that was troubling her, but did not cure her. Often in the midst of her duties she would find herself endeavoring to solve the problem of the lost wagon train.

As a last resort Henry Merryweather resolved to go out to the region where the train was last seen with a view to solving the mystery. He hoped that if he could bring back any plausible solution Elizabeth would accept it and she would regain her normal status. Without saying anything to her in reference to his intention he set out for the Sierra Nevada and the region where the train had been last seen.

Fifteen years had passed since the tragedy or whatever it was occurred, and settlers had come into the region that had been a solitude. Henry, obtaining a good horse, set out to go over the pass where the train had been lost. The mystery was so well known that he had no difficulty in locating the position where it had been lost seen. One of the equipments he possessed for his quest was a taste for geology. As he rode along he noted

the character of the rocks, the flow of the streams, the configuration of the soil. As he passed through a canyon in which ran a mountain stream he came to a point where the ground formed a dam, making a small lake. It seemed to him that this could not have long been so. The trees growing on the dam were all very young. He wondered if it had not been thrown across the stream by some shaking of the earth. He looked up and saw that the soil on which he stood formed a direct incline for several thousand feet to a spot where a side of a mountain seemed to have been scooped out. It occurred to him that a large mass of earth far above had slid down and formed the dam on which he stood.

Might not the lost wagon train have been buried under this landslide?

The more he studied the configurations about him the more he was convinced that some cause, either a clap of thunder, a snowslide or an earthquake, had loosened the mountain side and thrown it down and across the road. Then by riding back and forth he traced the old road, noting its junction with a later one both above and below the dam. While he was satisfied that this avalanche of earth might have buried the lost train, he had no hope that he would be able to find any vestige of man, beast or wagon without employing a host of men to remove the earth from the old road, a part of which was now covered with water. But he could tell Elizabeth of his find and assure her of his belief that the wagon train had been buried under the landslide.

He argued that if those connected with the train had seen the mountain side coming they would run to get out of its way. If they were nearer the upper side of it they would run forward; if nearer the lower side they would run backward. The upper side now being a lake, it could not be examined. Merryweather rode down to where the old road, striking the dam, was deflected, to climb it by a gradual incline. Dismounting, he tied his horse to a sapling and began to look about him.

He searched a good while, bending down close to the earth that he might the better see anything unusual. His search was fruitless. Mounting, he rode to the nearest house to remain all night and in the morning bring something to dig with. That night it rained and the next day and the next till it seemed that an ocean was being precipitated. Then it cleared, and Merryweather, taking a pick and a shovel, went back to continue his hunt.

He found that the rain had washed away portions of the dam, and its side was covered with little gullies, some of them quite deep. He examined a number of these gullies, but found nothing. At the point where the road made the turn to ascend the dam he put in his pick. Presently its point struck something that gave out the ring of metal. Inserting the pick again, he threw out a horseshoe.

Though elated with his find, he did not consider it by any means important, but it stimulated him to dig on. A root or something harder than the earth under where the horseshoe had been found next attracted his attention. He dug around it and exposed a horse's hoof and in a few more strokes the bones of a leg to which the hoof belonged.

"Eureka!" he exclaimed. "The mystery of the lost wagon train is solved!"

He worked all day unearthing the metal parts of harness, gun barrels, bones of human beings and horses. At last he struck the wheel of a wagon. Then he went away to announce his find.

## What Other Papers Say.

Calgary, Alberta.

A country that has excellent abundant, overflowing crops nine seasons out of ten, and half a crop or better on the tenth year, is just about the very best country that has ever been farmed.

Rainy River Gazette.

The music of the hammer still continues. Building operations are going on at a rate that is simply astonishing. As we predicted in the spring, real estate has advanced all over town. Invest in Rainy River.

Aeroplanes and submarines have a rather formidable death record charged against them, but while there are possibilities of ultimate success the cost seems in a measure justified. The submarine can never be anything but an engine of destruction, but the aeroplane may become a thing of usefulness.

London Free Press.

The Hamilton Spectator says it is doubtful if the catch question has any place on the examination paper. There does not seem to be any room for doubt that the catch question has no place either upon the examination paper or in the text-book. The Department of Education is not required to conduct a puzzle-corner.

Calgary Herald.

To-day Botha is reported as having made a magnificent Imperial address in Johannesburg. Sir Wilfrid Laurier a French-Canadian and Premier of Canada, is doubtless making a similar address somewhere in western Canada. Truly is Britain called the mother of nations, for only she can reconcile under one broad banner the blighted hopes of conquered races and build with their aid her dominions beyond the seas.

Indian Head Vidette.

We venture the guess that prize-fighting has reached the summit of its popularity. Never again are the people of any country likely to become as enthused as the population of the United States and a very considerable element of the population of Canada were over the fight between Johnson and Jeffries. It is true that this enthusiasm was carefully and systematically worked up, but that was a trick that cannot be played twice.

Bobeaygeon Independent.

Mr. Laurier in his western tour is setting an excellent example. Replying the other day to an address he said: "I have learned much on this trip; I am a better informed man than when I left Ottawa. I am anxious to learn more, and you must be my teachers." Here is a Premier who is willing to learn, who is not above admitting that he does not know it all. He is out for the purpose of learning, not for measuring every thing by the length of his own nose.

Halifax Chronicle.

Sir Wilfrid Laurier goes on from triumph to triumph in his tour of the great western country, which has been transformed under the achievement of his statesmanship. Everywhere he is welcomed with a warmth and an enthusiasm that are accorded to a leader and master of men, who is himself a man of the people and who exemplifies in his daily life and conduct the spirit of true democracy and the highest ideals of statesmanship. Grit and

## Disease of The Kidneys Brought on By Catarrh.

Pe-ru-na Made a Well Man of Me.

I Cannot Speak Too Highly of It.

Mr. George King, 458 St. Denis St., Montreal, Canada, a well-known business man of that city, writes:

"Peruna cured me from what the doctors were afraid would turn into Bright's disease, and after you have gone through the suffering that I have with catarrh of the bladder and kidney trouble, and have been cured you are pretty apt to remember the medicine that did the work."

"Peruna is a blessing to a sick man. Eight bottles made me well and were worth more than a thousand dollars to me. I cannot speak too highly of it. It is now four years since I was troubled, and I have enjoyed perfect health since. Every spring and fall I take a bottle of it and it keeps me well."

CATARRH of the kidneys is a very much neglected disease.

It is not until the disease has a firm hold upon the kidneys that the patient begins to realize that there is some derangement of these organs.

The slight backaches, the feelings of lassitude, and other warning symptoms of kidney disease are overlooked.

They are not serious enough to detain the patient from his regular work.

Even when he discovers that the kidneys are affected, he does not recognize the difficulty as being

caused by catarrh.

Catarrh is sometimes so very gradual in its approach and its earlier symptoms cause such slight discomfort that it is not noticed.

However, when it is once firmly seated in the kidneys it becomes a difficult disease to exterminate.

Indeed, catarrh of the kidneys is more serious than catarrh affecting some of the other organs of the body.

In the kidneys it is liable to terminate in Bright's disease or diabetes, both of which are recognized as very serious ailments, if not fatal.

The thing to be done, when catarrh of the kidneys is discovered, is to take some internal, systemic catarrh remedy, one that reaches the very source of the ca-

MR. GEORGE KING

tarrh and removes the cause of the difficulty.

Such a remedy has been found in Peruna. It reaches catarrh, no matter where it may be located in the body—whether in the more exposed membranes of the nose and throat, or whether in the remotest part of the kidneys.

That Peruna is at once the safest and most reliable remedy for catarrh of the kidneys is proven by the many testimonials written by those who have experienced its benefits.

The testimonials given here are only specimens of the many testimonials on our records, pertaining to the relief afforded by Peruna in severe cases of kidney-trouble.

**Kidney Disease of Long Standing.**

Mr. Samuel A. Paxton, 1118 Troost Ave., Kansas City, Mo., member I. O. O. F. and National Annuity Association, writes:

"I am a well man to-day, thanks to your splendid medicine, Peruna. I was troubled with catarrh and kidney disease of long standing when I first began using Peruna. I soon found I was getting better and continued taking it for four months. It cleaned out the system, leaving me well and strong and feeling better than I have in years."

### MEN WHO KNOW.

"I find the keeping of individual cow records very useful indeed, and would not go back again to the guessing method," writes a farmer who has tried both ways.

The men who just guess and who do not know what each cow in the herd gives during the year, often guess too much on the weight of milk and fat, and too little on the cost of feed. They guess that "Polly" is the best cow in the herd, but they do not know, because they have not weighed or tested the milk on any system. Probably "Buttercup" is far ahead of "Polly" as a producer.

The men who know the best cows in the herd, those who know which cows produce a large quantity at a low cost are the men who not only get good satisfaction out of keeping good cows, but they are the men who get good money when they sell, because they

### LEFT HOME IN SABOTS.

When the Late Jules Renard Fooled His Mother.

M. Jules Renard, the well-known French author, who has just died, did not, as so many famous Frenchmen have done, come to Paris in "sabots," but it was in sabots that he left his native village. The charming writer of "Poil de Carotte" thus describes his departure from home:

"For a long time I wanted to go to Paris and earn my living." But my mother was opposed to my departure, and she kept a strict watch on me, fearing that I would leave home without her permission. Every morning, as I got up before she did, she listened for the sound of my footsteps. If she heard my sabots she said to herself, 'He can't go very far.' But if she heard me walking about in my boots she would cry anxiously from her bed, 'Where are you going with your boots on?' It is neither a holiday nor

He worked all day unearthing the metal parts of harness, gun barrels, bones of human beings and horses. At last he struck the wheel of a wagon. Then he went away to announce his find.

The news that the lost wagon train had been found spread. Merryweather hired half a dozen men to excavate, but so great was the interest among the people that many of them dug on their own account, some doubtless hoping to find articles of value. It was apparent that the train had been turned suddenly and headed down the canyon. Some of the wagons had not been completely reversed before they were buried.

Among the articles recovered was an iron box. Merryweather took possession of it, opened it and found that it belonged to Edward Earle. It contained several hundred dollars in gold and a number of papers.

Some of the papers were deeds to property in the region to which the caravan was going—a region where gold had then been recently discovered. Merryweather, after the excavations were concluded, rode on to what had been the destination of the train. The unearthed papers all belonged to Elizabeth Earle, and it was his purpose to transact for her any business that might be necessary. He found conditions that he was sure would make a great change in the girl he loved.

One evening Elizabeth heard a footstep in the hall, and a moment later she was clasped in the strong arms of Henry Merryweather.

"The mystery is solved, sweetheart!" he exclaimed.

He led her to a sofa and gave her an account of his efforts and their outcome. "And now," he continued, "there is news intrinsically of far greater importance to you than the solving of the mystery. You are very rich. Your father before starting on his last earthly journey made a will leaving you all he possessed. It was of no value then, but now on a portion of it is one of the largest mines in the west. You are the real owner, and I have brought you a proposition from its wrongful owners to transfer to you one-third of the stock of the company. This alone will give you a splendid income."

As the lover had expected, the unraveling of the mystery and the changes it led to in Elizabeth's life relieved her of her unhealthy current of thought and gave her new mental occupation. Not the least of the results was a husband, to whom she was indebted for bringing her good fortune.

As the mysterious disappearance of the wagon train was for years a fruitful source of discussion among those who knew of it, so since Merryweather unraveled it both chapters of the story are still told to interested listeners in the region where it occurred. The location, too, is one of the points of interest to tourists.

stusiasm that are accorded to a leader and master of men, who is himself a man of the people and who exemplifies in his daily life and conduct the spirit of true democracy and the highest ideals of statesmanship. Grit and Tory alike have opened their hearts and hands to the great leader of the Liberal party.

#### Victoria Colonist (Con).

It is only reasonable to expect that Sir Wilfrid Laurier will talk a good deal of politics on his western tour. It is also to be expected that he will take many things to his credit. If he abstained from such a course the public would question his mental ability. He has not set out on a prolonged summer tour simply to utter a lot of commonplace remarks to mixed audiences. He hopes to strengthen the party of which he is the leader, and he may be expected to claim as much for it as is warranted by the most favorable construction of the facts. So also he need not be expected to cry "Peccave." From his own point of view he has managed the affairs of Canada as they ought to have been managed, and the man who does not expect him to make a claim to that effect will surely be disappointed.

#### Windsor Record.

One of the first to suffer by the strike will be the small fruit industry and the result must be disaster to such growers as depend on the Grand Trunk for transportation. So with other perishable foodstuffs, such as cheese, eggs and butter, and the immediate losses are likely to be heavy. Grain growers also will be sufferers. Thousands of them cannot afford to hold their produce and need to get it at once to market, but they must await the settlement of this dispute, an event that may be far off. Altogether the strike will be more disastrous for the producing and consuming public than for the principals in the struggle. The men have a fat strike fund and can hold out for a long time, and the railway also, while a large loser can afford to stand it indefinitely.

#### The Dragon Fly.

The oldest extant poem about a dragon fly is said to have been composed 1,440 years ago by the Emperor Yuraku of Japan. One day, while this emperor was hunting, say the ancient records, a gadfly came and bit his arm. Therewith a dragon fly pounced upon the gadfly and devoured it. Then the emperor commanded his ministers to make an ode in praise of the dragon fly. But as they hesitated how to begin he himself composed a poem in praise of the insect, ending with the words:

Even a creeping insect  
Waits upon the great Lord.  
Thy form it will bear,  
O Yamato, land of the dragon fly!

And in honor of the dragon fly the place of the incident was called Akit-suno, or the moor of the dragon fly.—"A Japanese Miscellany."

#### Children's Answers.

The superintendents of public schools tell many anecdotes of odd answers which have been made by children to the questions of teachers.

One teacher explained to the class in a lower room that an island was "a body entirely surrounded by water." Then she asked one of the little fellows in the class, "Now, Willie, what is an island?" "It's a person in a bathtub, teacher," said the confident Willie.

Another teacher in the physiology class asked the class in general which was the most curious bone in the human body. "Please, ma'am," was the quick reply from a little girl, "it's the wishbone."

The men who know the best cows in the herd, those who know which cows produce a large quantity at a low cost are the men who not only get good satisfaction out of keeping good cows, but they are the men who get good money when they sell, because they have records to augment the value. The men who know the poor cows by their records sell them off for beef and save time, and labour, and feed, and stable room, and bad language. The men who know enough to select good cows on their records of production are the successful dairymen to-day. The Dairy Division, Ottawa, supplies record forms for milk and feed so that men can soon know what profit each cow pays. The question is not "What does the herd average this month or next, but what does each cow give during the year?" Each cow should be a "long distance" milker.

#### THE WORD "GOWN."

It First Came Into Use In The Fourteenth Century.

Female costume in the tenth century was classical in its simplicity. The women wore long, loose, flowing skirts reaching to the feet and a draped "cote," or upper garment. Chaucer, who died in 1400, when Henry IV. was king, frequently uses the word cote. In the "Canterbury Tales" he depicts the sergent-at-law as wearing a "medley cote," which no doubt means a coat of many colors, while the miller he describes as wearing "a whyte cote."

It was in the fourteenth century that the word "gown" first came into use. An anonymous author in no mild words finds fault with the fashion of his days. He writes that "the commons were besotted in excess of apparel, in wide surcoats reaching to their loyns, some in a garment reaching to their heels, close before and strowting out on the side, so that on the back they make men seem women, and these they call by a ridiculous name—gown."

As early as the twelfth century women's cotes were made with trains, and in the first quarter of the thirteenth century a bishop moralizes early on their vanity for wearing trained cotes, some of which contained seven ells and a half.—Westminster Gazette.

#### TIBURON ISLAND.

Its Waters Are Literally Swarming With Ferocious Sharks.

Less than three thousand miles from the city of New York and about a third of that distance from San Francisco there is situated, in the upper reaches of the gulf of California, a small island, worthless even for so mean a purpose as the raising of goats, but nevertheless a center of attraction for the ethnologists and archaeologists of the old and new worlds for many generations.

This rocky peak, rising from the quiet waters of the gulf, is known as Tiburon island. Tiburon is a Spanish word which, translated into English, means "shark." The waters around the islet are literally swarming with these tigers of the sea, and the inhabitants of the island are said to be no less ferocious than the sharks. Tiburon is peopled with a handful of Indians, the only aborigines of their kind in the world, known as Seris. They are reputed to be cannibals, to be so fierce that none of the mainland tribes of Mexican redskins ever dare invade their shores and to possess the secret of manufacture of a peculiarly deadly poison with which they prepare their arrows before battle.

Children Cry  
FOR FLETCHER'S  
CASTORIA

I got up before she did, she listened for the sound of my footsteps. If she heard my sabots she said to herself, 'He can't go very far.' But if she heard me walking about in my boots she would cry anxiously from her bed, 'Where are you going with your boots on?' It is neither a holiday nor the day of the fair," I replied. "Mother, I'm going to the plow, and I put on my boots because it's raining, and my sabots would stick in the mud." And I dared not leave home that day. One morning, however, I left the farm with my boots under my arm, at the same time making a lot of noise with my sabots. Some distance from the village I took off my sabots and threw them over the hedge of a little field belonging to my mother. Then I put on my boots, and continued my way towards Paris. When my mother took the cow to the field she found my sabots. At first she did not understand. But when she called me and I did not answer, she returned to the house and began to search for my boots. When she was tired of looking for them she sat down in a corner of the chimney and cried a long time."

M. Renard was the mayor of Corbigny, in the Nievre. Every Sunday he contributed to The Journal de Clamecy, and this is the sort of thing he used to give the peasants. Writing of The Journal Officiel, posted up on the wall of the mairie, and which no one ever reads, he said:

"I had forgotten the goats. One of them never misses a number. Standing on its hind legs, with its front legs resting on the poster, it moves its horns and beard from right to left, like an old woman reading. When it has finished reading, as the official sheet has an appetizing smell of fresh paste, the goat eats it. After nourishing the mind, one must feed the body. Thus nothing is lost in the commune. What a pity that all novel readers have not the stomach of this practical goat! They might then eat the books they had read, buy more, and so the man of letters would in the end be able to eat in his turn."—Paris Correspondence London Globe.

#### King of Arms a Song Composer.

Sir Alfred Scott-Gatty, Garter King of Arms, who was a prominent figure at the recent solemn functions in London, is one of England's most famous popular song composers and his "True Till Death," "Little Songs for Little Children," "The Goose Girl," and others have been instanced as examples of his talents in that direction. Few, however, who witnessed Garter King of Arms proclaiming George V. in all the glory of his mediæval trappings and listened to his Majesty's phraseology, associated him with those typically negro plantation ditties which bear his name both as composer and author. Millions have sung the choruses of "De Ring Tail Coon," "De Ole Banjo," and "Dat's Berry Queer," to mention three of Sir Alfred's most popular efforts in negro minstrelsy. Altogether he has hundreds of plantation songs and many more nursery rhymes and children's songs to his credit.

# CAREER OF TERRORIST

## SOMETHING OF THE LIFE OF MICHAEL RIPS.

### Scenes of Misery Determined Him to Devote His Life to Cause of Liberty.

A despatch to The London Daily Graphic from Paris says:—Michael Rips, Russian Terrorist, who was acquitted by a French jury for having a year ago attempted, in a Paris hotel, to assassinate Col. von Khoten, head of the political police in Moscow, has had a career which needs few words added to make it a Nihilist romance after the approved pattern.

He himself told the court in impassioned language the story of his life. He is still a young man of thirty-three, with rather an interesting personality. His hair is glossy black, worn rather long, and curls round his brow. His eyes are large, and full of fire, his expression sympathetic. He does not look at all the conventional assassin.

Born in Russian Poland, of Jewish parents, from his youth up Rips knew the agrarian troubles which make miserable the lives of the Russian peasant. He told how he had seen a whole starving village go in procession to the authorities to beg for bread, and how mounted Cossacks, armed with

**THE TERRIBLE KNOT,**  
were sent among them to drive them away. These savage mercenaries took delight in their brutal work, and spared neither age nor sex.

"I was then pierced to the heart," he cried, "as with the blow of a dagger. Against brute force it is no use to write on paper, one must defend one's honor with weapons in the hand." Maddened by scenes like these, Michael Rips determined to devote his life to the cause of liberty.

This was in 1901. For four years he managed to keep free of the hands of the police, though deeply engaged in revolutionary intrigues. But in 1906 he was arrested for supposed complicity in a plot, and was despatched to Siberia. He alleged that he had not even the semblance of a trial, but that by a convenient and much-used regulation called the ohkrana he was handed over by the civil to the military authorities, who have the right without giving the accused the chance of pleading his cause to sentence him to from one to five years in Siberia.

The ohkrana was put in force in his case, but when on his way to the mines he managed to escape, and made his way back to Moscow. But the police soon got their eye on him, and he was again seized for evasion of his punishment. It is here that Col. von Khoten comes into the story. This typical officer of

**THE SECRET POLICE,**  
before whom Rips was brought, told him that he was now liable to banishment to Yakutsk, one of the most dreaded penal settlements in Siberia. When he had let this threat sink in he whispered to him that there was one way open to him to avoid deportation, and that was to become an "agent provocate-

## WRITING BY WIRE.

### Lord Mayor of London Opens First Telewriter Exchange.

The business office, which was once plain and matter-of-fact, with solid, unromantic ledgers and inkpots, is fast becoming a chapter of the unseen world, an uncanny department, with mysterious forces at work.

The telewriter is the latest addition to its wonders. It is no longer necessary to throw down the receiver in disgust when the man whom you ring up on the telephone is out or engaged. To-day you can write him, a message, which is instantly reproduced in facsimile at his end of the wire. That is the uncanny mission of the telewriter.

The telewriter is an attachment to the ordinary telephone. Before you on a desk is a slip of paper with a pencil, which is held, pantograph fashion, in a couple of slender steel arms. As you write with the pencil a similar pencil at the other end of the wire reproduces the writing, and so the message is recorded for examination at leisure by the man for whom it is intended.

Rough sketches, figures and plans of any kind can also be sent—indeed, any marks on the paper at the transmitting end are instantly reproduced at the other end in facsimile, so that in business houses, for sending messages from one department to the other, the invention should prove invaluable.

At the head office of the Telewriter Company, Bucklersbury, London, E. C., recently, the Lord Mayor initiated the service by sending a written message to the Postmaster-General in the following terms:

"The Lord Mayor congratulates the Postmaster-General on the opening of the Telewriter Exchange, which will enable the transmission of facsimile written messages within the city area. The enterprise of the National Telewriter Company and the Post Office authorities, in placing this facility at the disposal of the public should meet with cordial recognition, and I wish the undertaking every success."

To this Mr. Herbert Samuel, M. P., sent a brief acknowledgment.

Sir William Treloar, a director of the Telewriter Company, then described the progress of telegraphic writing, which was first made possible by Professor Gray, and its evolution was due to the company's chief engineer, Mr. Ritchie.

## THE FIRST HANDCUFFS.

### Different Forms of Devices for Manaculating Prisoners.

In Vergil is to be found the first recorded instance of the use of handcuffs, for the poet tells us that Proteus was thus fettered and rendered powerless by Aristaeus, who apparently knew that even the gods themselves were not proof against this form of persuasion, says the London Globe.

In the fourth century B. C. an army of victorious Greeks found several chariots full of handcuffs among the baggage of the defeated Carthaginians, and it is highly probable that the ancient Egyptians had some contrivance of the kind. The word is derived from the Anglo-Saxon "handcop," whence

## THE HORSE IN HOT WEATHER

### Care Must be Taken in Feeding and Watering Him.

Extreme hot weather brings more or less suffering to a horse and if the animal does not receive proper care and attention at this trying period disastrous results are sure to follow. Above all things else, says Country Life in America, do not overwork the farm horse or force the driver for too much speed or make long drives without frequent rests.

At this season, when water is usually more or less scarce and horses apparently have an insatiable thirst, the matter of watering deserves considerable attention. Do not give the horse too much at a time, and it is safest to give none at all while he is very warm.

A bran mash twice a week will assist in keeping the system cool, and in case of overfat a dram of pulverized saltpetre added to the mash will be beneficial.

On very hot days allow work horses two hours for dinner instead of one, and do not feed until they are somewhat cooled off. Also remove the harness at this time; this extra labor is more than offset by the comfort it gives the animals.

In a three horse team the middle one is most liable to heat exhaustion because of the additional heat radiated upon him by the horse on each side. On this account it is advisable to change the horses so that one will not be compelled to be in the middle for more than half a day at a time.

The pernicious pestering of flies is another matter that cannot be overlooked. The dairy cows and calves, as well as the horses, can be well protected from flies by such preparations as are for sale at almost all drug stores or are advertised in the farm papers. This preparation is not expensive and is best applied with a sprayer, although a brush or rag will do if a sprayer is not available. For the work horse a light treatment every morning will afford better protection from flies than a net or blanket—and is much cooler.

According to another writer it is allowable when a horse is hot to let him have three or four swallows of cool water, but no more. The few swallows will help cool him, and another limited drink may be given every few minutes for four or five times, after which he may drink his fill without danger. In careless or inexperienced hands, however, the only safe way is to let the horse stand for half an hour or more with no water, until he is fairly cooled off.

Salt is necessary to horses, but it should not be given to them in large quantities, and irregularly. An excess of salt at one time produces congestion of the stomach and induces excessive thirst. The best plan is to keep rock salt in reach of the horses at all times, so that they can satisfy their appetite by an occasional lick. If you have not followed this practice, introduce it gradually by giving the animals a little salt with their regular ration for a week.

## A REMARKABLE PARISH.

### St. Christopher-le-Stocks in London has but One Inhabitant.

## MAGNET REPLACES DIVER.

### Lifts Tons of Nails and Wire From 100 Feet of Water.

The lifting magnet has now been employed for several years in and about iron works and manufacturing establishments in connection with cranes and hoisting machinery because of the convenient manner in which it enables masses of iron such as rails, pig iron, etc., to be picked up and released at the will of the operator who controls the crane.

Recently a new application of this method has been made, says Cassier's. A few months ago a barge, which was laden with 1,500 tons of wire nails in kegs besides steel barrel hoops, staples and barbed wire, had been towed from Pittsburgh to New Orleans, and while endeavoring to make a landing at the latter city the barge broke loose from the tug which was handling it and sank in fifty-five feet of water.

The work of salvaging the valuable cargo was immediately begun by expert divers and a portion of the material was recovered. It was found that the barge had broken in two and that a part of it had been carried out about 150 feet from the shore and lay at a depth of about 100 feet at a point where the swiftness of the current rendered work with ordinary diving apparatus impracticable.

Although the lifting magnet had not hitherto been used for submarine operations it was determined to make the trial of the apparatus for this novel undertaking. The experiment was crowned with success and a great part of the sunken quantity of iron and steel has been raised to the surface by this novel method.

The magnet is lowered into the water until it reaches the material, when the electric current is turned on; the masses of steel are attracted and held so securely that they can be hoisted to the surface and delivered to the dock without the aid of any human intervention other than the control of the current by the operator.

## GERMAN WORKERS PROSPER.

### Signs of the Diffusion of the Empire's National Wealth.

The national wealth of Germany shows striking signs of becoming more and more diffused. The latest statistics indicate that in Prussia the aggregate taxable incomes of less than \$750 annually have risen from \$775,000,000 in 1895 to \$1,600,000,000 in 1909, an increase of nearly 150 per cent. in fourteen years.

Even more remarkable evidence of prosperity among the less well to do classes is afforded by the savings banks' deposits, which have grown from \$1,125,000,000 to nearly \$3,000,000,000 in the same period. This enormous increase is attributable to the rise in wages in almost every German industry.

According to calculations published by the Government's Accident Insurance Bureau the German workman's average annual wages have risen during the last ten years from \$186.50 to \$256.25, an increase of 38 per cent. Assuming that the cost of living in Germany has gone up 25 per cent. in the same period there is still a liberal

to banishment to Yakutsk, one of the most dreaded penal settlements in Siberia. When he had let this threat sink in he whispered to him that there was one way open to him to avoid deportment, and that was to become an "agent provocateur."

At the trial Von Khoten vigorously denied this, and said that all he asked Rips to do was to become an "indicateur," or member of the secret police. He added that there were many of the secret police among the ranks of the revolutionaries. Several witnesses, among them an ex-member of the secret police, made it clear that it was impossible for a Nihilist member of the secret police to avoid being an instigator of crimes, if only to ward off suspicion from himself. It was the notorious traitor and spy Azef who, when thus engaged, planned the assassination of M. Plehve, the Governor of Moscow, and of the Grand Duke Serge, brother of the Czar.

Rips says he refused indignantly to betray his compatriots, but at last he agreed to come to Paris as agent of the secret police, intending, as he affirms, to

#### FIND OUT THEIR SECRETS.

and divulge them to his revolutionary associates. In Paris one day arrived Col. von Khoten, to learn what new plots were hatching, for Paris is one of the most active centres of Nihilism. Rips had by this time got into touch with the Paris section of the Terrorists, and had told them his story and his intentions. But they would have none of this double life; they said that he could not run with the hare and hunt with the hounds. Rips soon saw that he was an object of suspicion to his revolutionary brethren, and determined to do a deed which should prove his good faith.

He invited Col. von Khoten to visit him at his hotel so that he might give him a report of his work. When the chief of the Moscow police entered his room he fired seven shots at him, but only wounded him slightly. It was for this attempted assassination he was tried, and acquitted.

#### A GREAT DRY-DOCK.

Constructed to Lift New Battleship Built in England.

The voyage of the floating dry-dock Dewey from Newport News to the Philippines still holds the record, but England will have second place if the big dry-dock built at Barrow by Vicker's Sons and Maxim for the Brazilian Government reaches Rio Janeiro safely.

The distance is some 5,500 sea miles, approximately one-third of the distance the Dewey was towed. The Brazilian dock is 550 feet long and 150 feet broad. It is now at sea, being towed to Brazil by two Dutch tugboats especially built for such service.

The cost of the towage is estimated at \$80,000. There will be no calls at ports on the way to recoil, for the tugs are abundantly supplied with fuel and an additional supply is stowed on the deck.

The dock cost \$1,000,000 and was built to lift the big battleships constructed in England for Brazil. It is expected the tugs will consume two months in reaching Rio Janeiro.

several chariots full of handcuffs among the baggage of the defeated Carthaginians, and it is highly probable that the ancient Egyptians had some contrivance of the kind. The word is derived from the Anglo-Saxon "handcopp," whence comes evidently the slang term "copper."

In earliest Saxon days "handcops" were used for nobles, and "foot cops" for kings, but in the fourteenth and fifteenth centuries the word is supplanted by the terms "shack bolt," and "swivel manacle," and the instruments were as cumbersome as the names by which they were known.

Up to the middle of the last century there were two kinds of handcuff in general use. One, known as the "flexible," was very like those which are still used; the other kind, called the "figure eight," was used to restrain violent prisoners. It was so fashioned that the captive could not move his hands and was universally dreaded, for the pain caused by a limb immovably confined is almost unbearable.

A simple but powerful device for securing prisoners was the "twister," now abolished owing to the injuries it inflicted. It consisted of a chain with handles at each end. The chain was put around the wrists, the handles brought together and twisted until a firm grip was obtained. The least struggle on the part of the captive and the chains bit deep into his wrists. Of the same nature, but made of wire, is "la ligote," while in an emergency whiplard has proved perfectly satisfactory.

The handcuff used in some parts of eastern Europe is most primitive. It consists of a V-shaped piece of metal, in which the wrists are inserted, the open ends being then drawn together by means of a cross hook, which must be kept taut the whole time. The most handy form of cuff, which is in general use at present, comes from America. It is lighter and much less clumsy than the old "flexible."

It is no easy matter to clap the "bracelets" on a person who is struggling violently. Inventors should turn their attention to the subject, for much remains to be done before the fighting prisoner can be quickly and strongly secured without harm to himself or his captor.

#### FACT AND FANCY.

Cigar butts are worth fifteen cents a pound.

The poet says the bravest are the tenderest, yet a red game rooster cuts up very tough in a pot pie.

If you reach your 30th year without having suffered from a serious disease, statistics show that you are likely to live to 73.

The world's rubber farms bid soon to outnumber the food farms.

An optimist is the kind of man who says he will take some cream on his berries when he knows it is skim milk.

Electric cars, with their frequent short circuits, have a beneficent effect on the air of cities, acting as disinfecting agents and creating an abundance of ozone.

The man who demands timely preaching often changes his mind when the preacher turns to look at the way he spends his time.

#### A REMARKABLE PARISH.

St. Christopher-le-Stocks in London has but One Inhabitant.

The heart of London, that region about the Bank of England and the Royal Exchange which has been dubbed "the financial hub of the world," stands in what is the strangest parish in the city. There is in this parish no church, no municipal office, and, it is said, but one inhabitant; yet its value in a parochial and official sense is equal to that of many another parish in the British metropolis with its thousands of taxpayers.

This is the parish of St. Christopher-le-Stocks. Some seven hundred years ago it was founded, no one knows exactly now or by whom, and is still existent with all its right and dignities.

The church of this parish stood in Threadneedle street, on the site of the Bank of England of to-day, but this church was demolished at the time of the improvement of the bank in the year 1781. The church was a stately edifice, altered and beautified by Sir Christopher Wren after the ravages of the great fire of London, and embellished by gifts from the city's wealthy aldermen.

The first authentic reference to this church is found in the year 1292, but it is certain that the church was in existence at least a hundred years prior to this date, inasmuch as without the gate stood a pair of stocks for the punishment of those whose offences had been committed within the city limits. These were abolished in 1292, when Edward I. was King.

At the time Henry Walis was Mayor of London the tolls derived from London Bridge were insufficient for its maintenance, so the Mayor, with the royal permission, established a fish and flesh market "near by the Church of St. Christopher-le-Stocks." The Stocks market was designed to aid the upkeep of London Bridge, the bridge keeper having power to grant leases for market shops. The church was the spiritual resort of all "godly shopkeepers."

In 1624 a graveyard was attached to the church and it was upon this that the Bank of England encroached, so that in 1781 the church was demolished. But no doubt to save the consciences of the money makers the parochial rights and dignities were still maintained. The garden with the fountain within the Bank of England marks the site of the burial ground. The last interment took place 100 years ago, being that of one "Jenkins, a bank clerk, 7 feet 6 inches high."

So the old Church of St. Christopher le Stocks went its way, but its parish remains, embracing the open space in front of the bank and the Mansion House. This parish has one inhabitant and he enjoys full rights of voting for Parliament and all municipal councils.

When a man tries to hide his sins he usually succeeds in planting them.

Many preachers mistake pounding the people for expounding the truth.

No man misses more than he who has been so suspicious of all that he has never lost anything.

Cent Insurance Bureau the German workman's average annual wages have risen during the last ten years from \$186.50 to \$256.25, an increase of 38 per cent. Assuming that the cost of living in Germany has gone up 25 per cent. in that period, there is still a liberal margin to the good.

The total revenue derived from income tax amounted to \$35,000,000 in 1895. Last year it was \$71,000,000, the increase being almost entirely due to the growing number of moderate incomes.

If the price of land may be taken as a sign of the well being of a country, the great rise in the price of real estate in Prussia tells an eloquent tale. To give one instance: Twelve years ago the Odin property near Luckau, a small town in the province of Brandenburg, was sold for \$67,500. Eighteen months ago the estate fetched \$125,000 and recently it changed hands again for \$187,500.

This increase of nearly a threefold increase in twelve years is a striking sign of Germany's rural prosperity, and quite in keeping with its great commercial and industrial expansion.

#### CASUALTY LIST OF AVIATORS.

Seventeen Killed and Many Injured in Three Years' Struggle.

Seeking the conquest of the air, twelve aviators have been killed since September, 1908, one in America, fifteen on the continent and one in England. In nearly the same period there have been numerous accidents to experienced aviators. Latham fell 100 feet at Cairo, Egypt, a year ago, and at Springfield Ill., Charles Baldwin dropped from the astonishing height of 150 feet without getting his name in the death column. The great Paulhan's craft rather unexpectedly tried to fly through a fence at Dover recently. Indeed there seems to be no limit to the luck of the new breed of navigators. The name of one lady appears in the list of aviators, the unfortunate being Baroness Raymonde de la Roche, who fell at Rheims.

It is significant that two of the killed and four of the thirteen more seriously hurt were army officers. The military scientists of the world are taking the problem of air navigation rather seriously.

Of the remainder some are scientists, interested in achieving mechanical triumphs and possibly in getting material rewards and not a little glory. Others might be called gentlemen amateurs, who take all the chances of the dangerous game that they may feel a new thrill and a new power.

That a complete triumph has not yet been won is proven by the fact that this year's list, and 1910 is barely half over, is longer than the combined lists for 1908 and 1909. Yet volunteers multiply, airship makers are seeking incorporation, and the stolid Teutons are planning an air line with through passenger service and regular stops.

People who live in a bread and butter world are always hungry.

Aseptic charity is more than keeping your tainted money to yourself.

No prayers were ever long enough to lengthen a short yardstick.

## SOURCES OF RUBBER.

Plants That Produce It for Commercial Purposes.

Probably very few of those who have gone mad on rubber shares know that the number of plants producing rubber is considerable and that they differ very materially in their relative value in the production of rubber for commercial purposes, says the Gardener's Magazine.

The most important of these is *Hevea brasiliensis*, a tree attaining to a considerable height and belonging to the natural order Euphorbiaceae. This is the source of Para rubber, which has long held a commanding position in British markets.

Ranking next in importance is the well known *Ficus elastica*, which belongs to the natural order Urticaceae and produces the Assam rubber. *Landolphia*, woody climbers, belonging to the natural order Apocynaceae, yield the African rubbers, and *Sapium biglandulosum*, belonging to Euphorbiaceae, produces the Colombian rubber. *Kickxia africana* is the source of the Lagos rubber.

Para rubber is obtained from several species of *hevea*, but for the most important of them is *H. brasiliensis*. This species is widely distributed in South America and with other members of the genus is strongly represented in the region drained by the mighty Amazon and its tributaries.

The town of Para, the centre of the rubber industry of the Amazon, is on the river Guana about a hundred miles from the sea, but the Para district extends over a large region to the south and the west. Throughout this and the forests of central and northern Brazil rubber trees are abundant.

Rather more than thirty years ago the suitability of *Hevea brasiliensis* for cultivation in India was recognized and strenuous efforts were made to introduce the tree into Ceylon and other parts of our eastern possessions in sufficient numbers to carry out experiments on a large scale.

The difficulties were considerable, but they were eventually surmounted and there are now large areas of rubber trees that are giving an ample return. Under favorable conditions the trees grow with great rapidity, and it is recorded that rubber trees planted at the Henaragoda Garden, Ceylon, have attained a height of fifty feet and a girth of two feet in six years.

*Ficus elastica*, the "India rubber plant" of gardens and the source of Assam rubber, is of course well known. When growing in its native habitat and under cultivation where it has sufficient space for its full development it presents a very different appearance from the largest of the specimens that may be met with under glass in this country.

It indeed spreads so freely in cultivated plantations in Burma and elsewhere that eighteen plants to the acre are considered quite sufficient. It is found growing wild in moist forests from the base of the Sikkim Himalaya eastward to Assam and Arracan, and in upper Burma it is so plentiful as to form large forests.

## AUDIENCE ENTHRALLED.

## PROSPEROUS CANADA.

1909 a Year of Wonderful Expansion in the Dominion.

The clearing houses of fourteen leading cities of the Dominion for 1909 showed a total transaction of over \$5,000,000,000, says a United States Consular and Trade Report. The banks have a total paid up capital of \$100,000,000, a reserve fund of nearly \$80,000,000, notes in circulation \$82,000,000, deposits aggregating nearly \$900,000,000 and assets of over \$1,000,000,000. In less than fifteen years the exports of wheat from Canada to the British Empire have grown from 9,000,000 bushels to 46,000,000, and the exports to other countries in the same time from 9,000,000 to 50,000,000 bushels.

The total agricultural development for the year 1909 was 30,000,000 acres of land, yielding crops valued at \$532,000,000. This was an increase of over \$100,000,000 over the previous year. In 1909 Canada imported goods to the value of \$300,000,000, two-thirds of which came from the United States. The exports reached \$244,000,000, of which Great Britain took \$127,000,000 and the United States \$85,000,000. The silver production for 1908 was \$11,000,000 and that of copper, nickel and cobalt \$25,000,000.

In the same year the electric railroads transported 300,000,000 people and 730,000 tons of freight on 11,000 miles of track. The electric roads showed earnings of \$14,000,000 and working expenses of \$8,000,000 on a capital of \$88,000,000. The steam railways, with 23,000 miles of track, carried 34,000,000 passengers and 63,000,000 tons of freight, an earning of \$147,000,000 on a capitalization of \$1,250,000,000.

In 1909 the number of declared settlers who arrived in Canada was 152,071. Of this number 72,349 came from the United States, 47,580 from the United Kingdom and the rest from other countries.

## IN FAVOR OF FAT.

The Stout May Read This and Pluck Up Courage.

Fat is often unappreciated or misunderstood and unduly blamed for sins of delinquencies of other body foods. From 15 to 20 per cent. of each healthy body is composed of fat and its chief sources are the starches and sugars, though certain fats are directly utilized, says the Medical Record.

The weight of present opinion is in favor of the view that fats are completely decomposed in the intestine and that the fatty acids formed are absorbed, either as soaps or in a solution brought about by the bile.

As a source of energy for the development of heat, fat may be described as quickly available, but not so lasting as some other substances. By its concentrated fuel power it saves other tissues, especially the albuminous ones from overoxidation and is valuable as a reserve force.

Moreover, by its presence the protein is better enabled to do its work in tissue building and as a storage of energy for emergencies it is of great importance. The last material use of fat is to serve as a protection of the body from injury and cold. It forms an outer

## RAILWAY'S FEARFUL TOLL.

Trespassing on the Right of Way the Cause.

It is not generally understood how large a proportion of the deaths and injuries on the railroads of the United States is due to the risks wilfully taken by trespassers who persist in using the right of way of a public thoroughfare. The annual report of the Interstate Commerce Commission for the last 11 years show that in this period 105,000 persons were killed or injured and that of this total about 50,000 were killed outright. The large ratio of fatalities to injuries, which is several times larger than the ratio that obtains in the case of accidents to passengers and employes, suggests that practically all these accidents were due to trespassers being struck by moving trains.

There is no country in the world, says The Scientific American, where the loss of life due to trespassing on railroads approaches these figures. The difference is due to the stringent laws in Europe against trespassing, to the careful policing of the tracks, and especially to the fact that violations of the law are invariably punished.

The fatalities and injuries are most frequent where the railroads pass through manufacturing districts in which the tracks are lined with factories. The railroad frequently offers the shortest cut between the factory and the home, and statistics show that men of the laboring class are annually killed by the hundred. Evidently the remedy is to be found in the thorough co-operation of city and country authorities with the railroads in the rigid enforcement of the law against trespass.

So long as the public realizes that warning placards, railroad watchmen and laws against trespass are subject to the caprice of local magistrates who look with innocent eye upon offenders, trespassers will continue to walk on the track, and this horribly annual roll of deaths and injury will continue to increase.

## 20 DESTROYERS ORDERED.

Secrecy About Novel Machinery Improvements.

"The British Admiralty have now completed their prolonged negotiations with naval shipbuilders, and have placed the orders for the twenty torpedo-boat destroyers included in this year's naval programme," says "Engineering."

Fourteen of the twenty boats, we are told, are to be of the Acorn class, designed by Sir Philip Watts, and, being similar, will afford in fleet manoeuvres the tactical advantage which accrues from corresponding speed and turning circle, apart from the gain in the standardization of the machinery.

These vessels are to be 240 feet long, 26 feet beam, and of 770 tons displacement, the speed aimed at being 27 knots, which will require about 14,000 shaft horse-power. All the vessels, except three, to be built by Messrs. Brown, will have Parsons turbines. A notable feature of all the ships is that they will carry two 4-inch guns, as well as a number of 12-pounders.

In the case of the other six ves-

## TRADE IN CIGAR STUBS

IT IS A THRIVING BUSINESS IN NAPLES.

Cut Up and Manufactured Into Cigarettes and Smoking Tobacco.

Buying and selling cigar stubs is a large and lucrative business in Naples, and many persons are engaged in it.

Some of them have little stalls or shops near the docks, the arsenals and the manufacturing establishments where workmen are in the habit of passing to and fro from their tasks. Others, with less capital, have little stands at street corners—a board laid across a saw horse, upon which their stock is displayed, while the petty dealers exhibit their stock in little piles upon the walk, sometimes not even a newspaper being under them.

The supply comes from the cafes, restaurants, hotels and other public places. Men and women pick over the garbage heaps and the dust boxes, and boys run up and down the pavements in front of the hotels early every morning looking for "snipes."

## PAY FOR PRIVILEGE.

Some of the restaurant and cafe keepers sell the privilege of picking up the cigar stumps in their places to dealers, and the proceeds amount to a considerable sum during the year. In other places it is one of the perquisites of the head waiter. The janitors of public buildings, the porters of the hotels and men at the clubs invariably have business relations with gentlemen in the second cigar trade and make a little something out of it.

Some of the stubs are taken to factories, where they are cut up and manufactured into cigarettes and smoking tobacco, but the greater part of them are sold to the lower classes of workmen, sailors and dock wall-poppers, who smoke them in their pipes.

## SECOND HAND.

At the entrance of the navy yard, which is upon one of the most frequented streets in Naples, and in a very conspicuous place, half a dozen of the second-hand cigar dealers can be found when the men are coming out of the gates at the close of their day's work.

The employees are not allowed to smoke inside and their wages do not permit them to indulge in the luxury of cigars or even smoking tobacco at first hand.

For a centesimo, which is the smallest coin imaginable—one-fifth of a cent—they buy a cigar stub, crumble it in their hands and cram it into their pipes.

At the Strada del Molo—the big docks—a thriving business is done with the sailors, teamsters and roustabouts, and in the market place are always two or three stands.

## OUR RELATIONS WITH U. S. A.

No Differences Soon, Says British Under-Secretary.

The British Under-Secretary of State for Foreign Affairs, writes the Washington correspondent of

in most forests from the base of the Sikkim Himalaya eastward to Assam and Arracan, and in upper Burma it is so plentiful as to form large forests.

## AUDIENCE ENTHRALLED.

### A Lecturer's Experience in a Redecorated Hall.

"One of my most surprising experiences," said a lecturer, "was a comparatively small thing that has left an unforgettable impression. It occurred in a small town hall, that had just been refurbished and redecorated. The seats were of that collapsible wooden kind with leather bottoms, and they had all been freshly and neatly varnished.

"So far as I could judge from the lecture platform, my remarks went off excellently. The audience was attentive, and when I had finished there was the usual applause that sometimes leaves a lecturer wondering whether the audience is pleased with the lecture or is just expressing its satisfaction that the infliction is over. I was about to leave the platform, when I was surprised to notice that the audience was still seated.

"I stood and looked at them, and they sat and looked at me. It was a small hall, and there were only a dozen or so rows of seats immediately in front of me. I could see the faces of all the people, and the expressions puzzled me. In fact, each face wore almost the same expression of surprise, astonishment and indignation. Here and there one of them would start to get up, and then change his mind and remain thinking it over. They seemed to be waiting.

"Then it dawned on me. The seats! They had been newly varnished—and my entire audience was stuck to them! I began to wonder whether I should have to call for the janitor and pry them off one after another.

"Fortunately one man, sitting in the front row, had the courage to meet the situation. He drew himself together, made a mighty effort, and rose suddenly to his feet. The thing happened just as everybody had expected. There was a tearing sound as he left the varnish, but he was on his feet, and had set an example that the rest felt they must follow or remain there forever.

"I went to the edge of the platform.

"Ladies and gentlemen," said I, "shall I begin another lecture?"

"Apparently the threat and the successful escape of that one determined man inspired the others. There followed a succession of reports, like a line of infantrymen firing their guns one after another, and then the audience was on its feet and moving toward the entrances. But the expression with which most of them looked back at those newly varnished chairs was something to remember."

## HOOTS OF A WISE OWL.

One satisfying thing is that the fool who rocks the airship will get his good and plenty.

It is not the man behind the gun, but the man behind the bun who is causing most of the excitement in our large cities recently.

An Eastern scientist says love is a disease. It is mighty catching, but matrimony is often a cure.

Moreover, by its presence the protein is better enabled to do its work in tissue building and as a storage of energy for emergencies it is of great importance. The last material use of fat is to serve as a protection of the body from injury and cold. It forms an outer cushion for the frame.

From an aesthetic standpoint the physiological and orderly distribution of fat in the connective tissue makes all the difference between beauty and ugliness. In considering the psychic role of fat we should specially bear in mind G. M. Miles says, its reserve function in relation to active vital processes. A liberal deposition of fat is one of nature's wise precautions to enable us to bear some of the trials of life. It has been known from earliest antiquity that fat people are more contented and optimistic than lean ones and the supply of fat may be compared to the ample bank account of a busy and provident man.

Niles says that he believes he is correct in asserting that a physiological reserve of fat by its very presence exerts a quieting and reassuring influence in the vital forces most concerned in constructive metabolism, while its lack leads to a physical discontent and unrest, which sooner or later reacts on the disposition, developing into that pessimism and temperamental discontent so often seen in lean people.

## MYSTERY OF THE SEA.

### Sailor Landed from Wreck, Gives Alarm and Disappears.

There is a story by W. W. Jacobs, of a ship which sailed away from an English village, and was never heard of for years. Then one of the crew—a boy when the ship sailed—turned up, a middle-aged man, at the house of his mother. She fed him, then showed him to his bedroom, for he was too weary to talk, then went and told the neighbors. In the morning he slept late, and when, urged by the eager neighbors, she went to call him, she found the sole survivor of the lost ship had died in his sleep.

An incident, upon which Jacob's yarn might have been based, is related in the English papers, as having occurred on the Cornish coast, on a morning towards the end of June.

About 10.30 that morning a farmer named Waters met near Land's End a man near the shore wet and shivering. He was unable to speak a word of English, but by gesticulations managed to make the farmer understand he was the sole survivor of a wreck off Land's End, and that he had come ashore during the night on a raft.

He was about 25, of middle height, with black hair and pale complexion. He appeared to be a Spaniard. Having been fed and clothed by the farmer, he accompanied the latter to Mill Pool Beach, where some wreckage was found, including part of a ship's hatch. One other piece which attracted attention was a box resembling an officer's binocular case kept on the bridge, that bore the letters in capitals, H. M. G. M. and the word Febrero. The Febrero is the name of a cargo boat belonging to the Bilbao Navigation Company. The Spaniard has disappeared and cannot be traced.

about 14,000 shaft horse-power. All the vessels, except three, to be built by Messrs. Brown, will have Parsons turbines. A notable feature of all the ships is that they will carry two 4-inch guns, as well as a number of 12-pounders.

In the case of the other six vessels, the contractors have been allowed a larger measure of latitude in the design of the ship and machinery, although the speed and armament is the same.

The contract for these vessels has been placed for two each with the Parsons Marine Steam Turbine Company, Limited, of Wallasey; Messrs. J. I. Thornycroft & Co., Limited, Southampton, and Messrs. Yarrow & Co., Limited, Scotland.

In all three pairs the contractors will fit machinery differing from each other and from that in any existing British destroyer; but it is desired that the actual details should not be disclosed because of the significance of the change. The hull and boilers of the two vessels to be built by the Parsons Company will be constructed by Messrs. Denny, of Dumbarton.

## NO EXERCISE NEEDED.

### Physician Affirms it is Unnecessary for Indoor Toilers.

A noted London physician, Dr. Alexander Bryce, has started a world-wide discussion by asserting that office workers should not take exercise after their day's work.

"The root reason is that though head work is not exercise in the sense that it develops the body, it most decidedly is exercise in that it quickly induces 'fat' and physical lassitude. So it is almost pathetic for a man to expect any good to come from taking more exercise when the exercise involved in the day's work has already tired him out.

"One takes it that young people have sufficient outdoor exercise reasonably to develop their frames before beginning office work. So when once they have started in the office in earnest it is much better for them to realize at once that their days of hard physical strain are over, and that henceforth they must confine these efforts to week ends and holidays.

"The body and system easily attune themselves to circumstances, even to over civilized and consequently rather unnatural circumstances, and indoor head workers will soon find that a good state of health can be maintained with little or no apparent exercise."

## SENTENCE SERMONS.

You do not manifest faith by denying facts.

The measure of every gift is the all we have.

Making earth brighter makes heaven surer.

Praying is a wasteful act when it stops at wishing.

You cannot live for people without living with them.

Trouble never weakens you save when you flee from it.

No man has a great mission who slight's little ministries.

Some spend minutes in charity and months in advertising it.

Too many think that square living must mean sour looking.

Many reformers get switched off on to reforming one another.

OUR RELATIONS WITH U. S. A.

## No Differences Soon, Says British Under-Secretary.

The British Under-Secretary of State for Foreign Affairs, writes the Washington correspondent of the Chicago Tribune, has made an interesting report to the Foreign Office upon the relations of the United States and Canada. He describes the relations as friendly, and cites the various agreements that have been made to insure the continuance of this condition. It is interesting to consider what has been done during the last year. The two countries have:

Entered into new tariff relations.

Adopted the boundary waters treaty, which affects particularly the use and diversion of waters of the great lakes and the Niagara River, and insures the preservation of Niagara Falls.

Drawn up regulations for the protection of food fishes in the great lakes.

Delimited the international frontier through Passamaquoddy Bay.

Begun the arbitration of the North Atlantic coast fisheries dispute before a court of arbitration at The Hague.

Continued the delimitation of the Alaska boundary.

Negotiations for the settlement of disputes still existing are under way. Before many years have passed there will not be a single difference of importance between the two countries.

## TRAGEDY ENDED WELL.

### Man Became Husband of Girl Whose Face He Disfigured.

A Glasgow family were entertaining a group of friends, the eldest daughter having just become engaged to a very promising young man. The youngest daughter, a very delicate girl, turned somewhat faint during the evening, and her sister's fiance lifted what he took to be a bottle of perfume which stood on a table close by and threw part of its contents on the girl's face. Instantly she screamed in direct agony, and as the others came rushing in the young man found, to his undying remorse, that what he had supposed to be perfume was in reality a strong acid used by a young brother who dabbled in chemistry, and who had carelessly left it lying about. The poor girl suffered terribly for weeks, and her face was frightfully disfigured, though her sight was spared.

The young man's regret for the tragic end to his well-meant efforts was intense, and to make matters worse, his sweetheart broke off her engagement with him, saying she could not bear to marry him after what had happened. He sailed for Canada, prospered there, and returned at the end of five years, to find the girl he had innocently injured living in poverty with her widowed mother, her sisters having all married. There was a few week's courtship, then a quiet wedding, and now a happy, honored and prosperous woman blesses fervently the day which held for her all the elements of tragedy.

There is no naturalization for heaven without good citizenship here.

# HAYS WILL NOT ARBITRATE

## Now That the Strikers Are Willing the Company Refuses.

Montreal, July 24.—An official announcement that all of the G. T. R. shops from Chicago to Portland will be opened to-morrow morning, giving work to thousands of hands, and the distinct refusal of the Grand Trunk to arbitrate under any condition, and the acceptance of the strikers to arbitrate with acceptable arbitrators, the starting of all through freight trains are chief features of to-night's situation.

Mr. Fitzhugh stated this afternoon that he was never more confident of complete victory, and all they required was protection.

Mr. Hays has closed correspondence with Hon. Mackenzie King as follows: "Your telegram of 23rd received. As you know from the many conferences urging your action before the strike took place and from our offer, urged and repeated before the committee, we were desirous of arbitration to avoid existing troubles. The time for such action has now passed and it is only necessary that we should have protection to which we are entitled to en-

able us to resume the full operations of the road. (Signed) Chas. M. Hays."

Vice-President Murdock, in an official statement handed out this evening, says that it is untrue that the riots have been caused by the strikers, although he did not explain any of the arrests, and it is said the men in custody can prove an alibi.

Mr. Murdock claims that the men from one end of the line to the other would remain true to the principles for which they quit work, and added that the company would bluff a few more of the men back to work. The men also claim that it will be an absolute impossibility for the company to run their freight trains as promised. They admit, however, that the suburban are running, generally in charge of inexperienced hands.

Your correspondent learns this evening that before Mr. Hays took his stand in the strike situation, he cabled to London seeking their views, the answer being that Mr. Hays being on the spot to do as he saw fit.

## A BIG CONSOLIDATION.

**All Companies Manufacturing Wood Working Machinery and Tools.**

Mr. Garnet P. Grant, to-day made the official announcement in connection with the Canada Machinery Corporation consolidation and the Companies to be included in it.

In his announcement Mr. Grant stated that the new Company would include the MacGregor, Gourlay & Company, Limited, of Galt, Ontario; The John Ballantine & Company, Limited, of Preston, Ontario; The Hespeler Machinery Company, Limited, of Hespeler, Ontario, and the Woodworking Machinery Departments of Goldie & McCulloch Company, Limited, of Galt, Ontario, and of the Sussex Manufacturing Company, Limited, of Sussex, N. B.

The capitalization of the new Company will be as follows:

Authorized. Now Issued.

First Mortgage 6 p. c. sinking	
Fund bonds .. \$1,000,000	\$400,000
Preferred Stock, 7 p. c. Cumulative .. .. .	1,500,000
Common Stock .. .	1,500,000
	625,000

The Companies taken over constitute practically all the concerns in Canada manufacturing the lighter grades of woodworking machinery and tools. They also constitute a large percentage of the manufacturing capacity of iron working tools in Canada.

The headquarters of the new Company will be at Galt, Ontario. The intention of the new Company is to perfect the organization of the different factories upon a uniform basis, thereby eliminating the excessive duplicating of special machinery which has taken place in the

being included in this important consolidation. Mr. George D. Forbes, President of the Taylor-Forbes Company of Guelph, will be the First President of the New Company, the Vice-Presidents being Mr. R. L. McCulloch of the Goldie, McCulloch Co. of Galt, Mr. R. MacGregor, Sr., President of the MacGregor, Gourley Co. of Galt, and Mr. S. H. White, President of the Sussex Manufacturing Co., Ltd., of Sussex, N. B., while the other directors will be Mr. T. H. Watson of Toronto, Vice President and General Manager of the Canada Bolt and Nut Co., Alec. G. Gourley of Galt, Garnet P. Grant, Montreal, President Dominion Cannery, and Harry Cockshutt of Brantford, Managing Director of the Cockshutt Plow Co.

Mr. George D. Forbes, the President of the new Company, when asked to-day to point out the results that would be achieved through the consolidation, stated that they might briefly be summarized as follows:

Increased efficiency resulting in economies by specializing the output at the different factories and by eliminating the unnecessary duplication both in the output and patterns.

Savings to be effected in the purchase of raw material and in administration, economies in selling, distributing, manufacturing and transportation charges.

## STRIKE OVER IN BRITAIN.

**Employees of the Northeastern Railway Accept Terms.**

A despatch from Newcastle, Eng., says: The strike of 12,000 employees of the Northeastern Railroad was settled on Thursday

# INTESTINAL PARALYSIS

"Fruit-a-tives" The Only Medicine That Will Really Cure Constipation.

The Liver both causes and cures Obstinate Constipation or Paralysis of the Bowels.

When the Liver becomes torpid or weak, then it cannot give up enough Bile to move the Bowels.

"Fruit-a-tives" acts directly on the liver and makes the liver strong and active.

By curing the liver, "Fruit-a-tives" enables this important organ to give off sufficient Bile to move the bowels regularly and naturally, and thus cure "Intestinal Paralysis."

"Fruit-a-tives" is made of fruit juices and tonics and is undoubtedly the only medicine ever discovered that will positively cure Constipation in any form.

"Fruit-a-tives" is sold by all dealers at 50c a box, 6 for \$2.50, or trial box, 25c, or may be obtained from Fruit-a-tives, Limited, Ottawa.

## VALUE OF MAN'S LIFE.

**Michigan Supreme Court Gives an Interesting Decision.**

A despatch from Detroit, Mich., says: The Supreme Court of Michigan on Wednesday handed down an interesting legal decision in which the value of a man's life is clearly defined. The decision was rendered in connection with a suit brought by the heirs of Henry Austin, against the Detroit United Railway and the Detroit, Monroe & Toledo Short Line. Austin was killed while riding on the rear platform of a car by the trolley pole leaving the overhead wire. The wheel of the trolley hit Austin and killed him. The case was first tried in a lower court and the heirs given judgment against the railway company for \$250, about enough to pay the burial expenses. An appeal has been before the Supreme Court for some time, and a verdict rendered on Wednesday, in favor of the heirs gives them damages for the full amount of wages Austin would have earned had he lived to the age of seventy.

## MOTHERWELL CONFIDENT.

**Saskatchewan Will Have a Satisfactory Harvest.**

A despatch from Winnipeg says: "The only portion of Saskatchewan where the crop prospects are not satisfactory," said Hon. W. R. Motherwell, Minister of Agriculture, here on Thursday, "is a strip 100 miles wide on the western boundary. In this strip good yields will be secured, where there has been good tillage. Had there been the right kind of tillage there would have been no part of Saskatchewan which would have suffered severely from dry weather. What was needed was more intelligent cultivation of the soil, and conservation of the moisture." In the portion of the Province in which he has resided for many years, Mr. Motherwell stated that the prospects were excellent. There had been sufficient rainfall in the Indian Head coun-

# THE WORLD'S MARKETS

## MONTREAL MARKETS.

Toronto July 26.—Barley—Car lots, ex-store, No. 3, 54c; No. 4, 50c. Corn—American, No. 2 yellow, car lots, ex-store, 68½c; No. 3 yellow,

Company will be at Galt, Ontario. The intention of the new Company is to perfect the organization of the different factories upon a uniform basis, thereby eliminating the excessive duplicating of special machinery which has taken place in the past.

The Canada Machinery Corporation has been fortunate in the men it has secured for its first Board of Directors, as it will include, according to the official announcement made to-day, all the leading interests who have built up the various Companies that are now

**Employees of the Northeastern Railway Accept Terms.**

A despatch from Newcastle, Eng., says: The strike of 12,000 employees of the Northeastern Railroad was settled on Thursday evening, the men accepting the terms offered by the company. The Amalgamated Society of Railway Servants refused to recognize a defiance of the strike. This attitude on the part of the society, which embraces the whole country, made it impossible to carry the strike to a successful issue.

# CENSUS OF AGRICULTURE

The Next Census Will Be Taken Under Date of June 1st, 1911

A despatch from Ottawa says: The area, product and value of field crops harvested in 1910 will be enumerated for fall wheat, spring wheat, barley, oats, rye, corn for husking, buckwheat, beans, peas, flax, mixed grains, hay and clover, alfalfa or lucerne, corn for forage, other forage crops, turnips, mangolds, sugar beets, other field roots, tobacco and hops; and grass seed, red clover seed and alsike clover seed will be enumerated for product and value.

Grain and other field crops for the harvest of 1911 will be taken by acre only, as none of these crops will be ripe at the taking of the census. The products of these crops will be gathered later in the year from the reports of correspondents.

Animals and animal products, also under the head of agriculture,

will include the numbers of horses three years old and over, horses under three years, milch cows, other horned or neat cattle, sheep, swine, turkeys, geese, ducks, hens and chickens and hives of bees held or owned by each person at the date of the census on 1st June of 1911.

The number of horses, milch cows, other horned or neat cattle, sheep, swine and poultry sold in 1910, will be recorded, as well as the wool, milk, home-made butter, home-made cheese, eggs and honey products of the year, and the quantities of milk and cream sent to factory or sold.

Pure-bred animals registered, or eligible for registration, which are owned at the time of taking the census will be enumerated for horses, cattle, sheep and swine, but their number will also be counted with all other animals.

# SUFFERING AT CAMPBELLTON

Many Compelled to Sleep in Wet Clothing on Water-Soaked Ground.

A despatch from Campbellton N. B., says: Thunderstorm and heavy rainfalls have made the condition of the homeless people of Campbellton pitiable. On Thursday night many had to sleep in wet clothing practically on water-soaked ground. It is hard enough on the men, but more so for the women and children. Two people are reported to have become mentally unbalanced, one over the auto accident, in which Chas. W. Anslow was killed. There is some diphtheria too. A general appeal for cash aid is issued to relieve the present suffering, and help towards building for the future. In addition to the discomfort of wet clothing, wet bedding and the chilling east wind, the water that has been emptying down on the stricken town since early morning, has started the decay of all vegetable matter left by the fire, and to-night there is a stench that is sickening arising from the streaming ruins.

In view of the general appeal for aid, the relief committee wish to tell the public exactly how the funds are to be handled. The subscriptions should be addressed to Judge McLatchy, Chairman of the Finance Committee, Campbellton. The cash received is deposited in banks in Campbellton, and the funds are not paid out except upon cheques drawn out and signed by the three members of the Finance Committee. So far only \$33,000 has been received in cash. How far this will go towards relieving the situation is shown by the explanation of the committee. It is absolutely necessary to rebuild the houses before winter sets in, to avoid abject misery. To do this it is important to keep the present working population on hand, and, first of all, the homes of the workmen must be rebuilt. This means the expenditure of a large amount of money, but the future of the town depends upon it.

of the soil, and conservation of the moisture." In the portion of the Province in which he has resided for many years, Mr. Motherwell stated that the prospects were excellent. There had been sufficient rainfall in the Indian Head country, and in the district in the north. The yield from the entire Province would be satisfactory.

**A BRAVE MAN'S DEATH.**

Charles Norman Gave His Life to Save Another Man.

A despatch from Nelson, B. C., says: Charles Norman of the Lucky Jim Mine, near Kaslo, one of the five who perished in Saturday's bush fire, died in an attempt to rescue one of his men, and after having seen to the safety of all in his charge. In addition to Norman's heroism, there are many instances of brave conduct at the mine. One woman went down a 70-foot ladder in the darkness with her little child. Pickney and a companion, against strict orders, went into the mine and succeeded in saving several lives and finding some of the bodies. Great praise is accorded Superintendent Walsh of the Great Northern, Kaslo & Slocan branch, who, with the train crew, worked hard.

**AND NOW THE GRASSHOPPER.**

He Comes From Dakota and is Headed North.

A despatch from Winnipeg says: Reports from Gretna on Thursday state that the black grasshopper, the most destructive pest ever known in the Northwest, have made their appearance in swarms within the past few days, and are attacking garden stuff. From 1871 to 1874 they covered the country in swarms, eating everything green, and stripping the bark from the poplar trees after they had destroyed the crops. The grasshoppers are large, and have a wide spread of wing, resembling butterflies when in flight. They have come from the Dakotas, and appear to be headed north.

**INSANE FROM FALL.**

Conductor Perrault of Montreal Taken to the Asylum.

A despatch from Montreal says: Conductor L. Perrault of the Montreal Street Railway has gone violently insane as the result of a fall from a car. A few days ago a man running to catch the car missed the rail, and accidentally grabbed hold of Perrault, throwing him violently to the ground. On Thursday he was removed to Longue Point Asylum. He has a wife and three children.

**KILLED BY CARS.**

Public Utilities Commission to Investigate List at Montreal.

A despatch from Montreal says: The Public Utilities Commission has decided to hold an investigation into the large number of deaths caused by street cars in Montreal recently. The Secretary has been ordered to submit a report on the subject to the commission. The street car death toll is also being investigated by the Board of Control. Sixteen have been killed by cars this year.

**MONTREAL MARKETS.**

Toronto July 26.—Barley—Car lots, ex-store, No. 3, 54c; No. 4, 50c. Corn—American, No. 2 yellow, ear lots, ex-store, 68½c; No. 3 yellow, 68c.

Oats—Car lots, ex-store, No. 2 Canada west, 45½c to 46c; No. 3, 44½c to 45c.

Millfeed—Bran, Ontario, \$20.50 to \$21; Manitoba, \$20; middlings, Ontario, \$21 to \$22; shorts, Manitoba, \$21; mouille, pure grain, \$32 to \$33; mixed, \$25 to \$28.

Flour—Manitoba spring wheat patents, firsts, \$6.30; seconds, \$5.80; winter wheat patents, \$5.40 to \$5.50; Manitoba strong bakers', \$6.50; straight rollers, \$5.10 to \$5.20; straight rollers, in bags, \$2.40 to \$2.50; extras, \$1.90 to \$2.

Butter—Best creamery, 22½c; creamery, 21½c.

Cheese—Western, 11c to 11½c; eastern, 10½c to 11c.

Eggs—Selected stock, 21c dozen; straight receipts, 17c to 17½c dozen; second grade, 12½c to 13c.

**UNITED STATES MARKETS.**

Buffalo, July 26.—Wheat—Spring—Strong; No. 1 Northern, carloads store, \$1.31¼; Winter, firm. Corn—Firm; No. 3 yellow, 70½c; No. 4 yellow, 68½c; No. 3 corn, 68½c; No. 4 corn, 68½c, all on track through billed. Oats—Stronger; No. 2 white, 48½c; No. 3 white, 47c; No. 4 white, 45½c.

Minneapolis, July 26.—Wheat—No. 1 Northern, July, \$1.25½; September, \$1.17½.

**LIVE STOCK MARKETS.**

Montreal, July 26.—Calves, \$3 to \$8; live hogs, \$10 to \$10.20 per 100 pounds; sheep, 3½c to 3¾c lb.; lambs, \$4 to \$6; steers, choice, 6½c to 6¾c; good, 6c to 6¼c; middle, 5½c to 5¾c; fair, 5c to 5½c; common, 4½c to 5c.

Toronto, July 26.—Picked lots of butcher cattle sold in some instances for as much as \$6.75. Good loads of butcher cattle brought from \$5.80 to \$6.25, and medium from \$4.25 to \$4.75. Choice grades of cows were also up, some having sold for as much as \$5.60, straight loads fetching up to \$5.25. Common and medium cows sold at \$3.50 to \$4.75. Three loads of Manitoba stockers sold at from \$5 to \$5.25. Sheep and lambs comprised a large part of the run, and the market for them was up higher, but was rather easier. Hogs were comparatively scarce, and were decidedly stronger, being quoted at \$9.40 f.o.b., and \$9.70 fed and watered off cars Toronto. In some cases hogs sold at \$10 per cwt., fed and watered.

**TEN SOLDIERS KILLED.**

While at Practice at Fort Monroe, Virginia.

A despatch from Fort Monroe, Va., says: Ten artillerymen are dead, two are probably fatally injured and several slightly injured as the result of the premature ignition of a powder charge in a twelve-inch gun in Battery de Roussey at Fort Monroe on Thursday morning. The accident occurred while student officers were endeavoring to sink a fleet of towed targets, representing an imaginary hostile fleet proceeding towards Washington.

**MOST PERFECT MADE**

Winnipeg TORONTO, ONT. Montreal  
Awarded highest honors at  
all Expositions.

## Sweeping Changes Outlined by Home-Secretary Winston Churchill.

His object is to treat criminals by more humanitarian methods, and, as far as possible, to avoid their degradation by prison life. Briefly, he wished to give longer time for the payment of fines, and to prevent imprisonment for their

non-payment, and to substitute disciplinary or curative methods, for imprisonment in the cases of youthful and minor offenders; to allow political offenders, like passive resisters and suffragettes, various privileges, such as conversation, book reading, better meals, etc., to reduce solitary confinement to a single month; to abolish the ticket-of-leave and the entire system of police supervision for released convicts; to introduce methods looking to the welfare of released prisoners, and, finally, to arrange winter lectures or concerts in convict prisons.

### Fifty Deaths and Many Injured Reported.

A despatch from Milan says: A terrific cyclone swept over the district of northwest Milan on Saturday, doing great damage to the towns of Sorrento, Rovellasca and Vnate Pozzelo. It is estimated that about 25 persons were killed and many wounded. Many houses were unroofed and telegraph lines were leveled; some dwellings were cracked and shaken as though they had been through an earthquake. Railway traffic has been impeded and the wreckage thrown across the tracks. At Busto-Arsizio, 19 miles from Milan, a factory collapsed, burying most of the workmen. Ten dead and many seriously injured were taken from the ruins. At another village the collapse of the roof of a building resulted in the death of 14 workmen and the injury of 20 others.

### What the Men Receive Under the New Agreement.

A despatch from Montreal says: In the agreement made between the C. P. R. and its trainmen the passenger men are to receive for the months of May and June ten per cent. increase on their wages. Through freight men are to receive for the months of May and June an increase of 17 per cent.; way freight men are to receive for the same months 13 per cent. of an increase; men employed in yard service are to be paid 25 per cent. of an increase on the total amounts received by them when being paid for the months of May and June.

Has Appeared on a Farm in York-  
shire, England.

A despatch from London says: The foot-and-mouth disease, from which the cattle of Great Britain have long been free, has appeared on a farm in Yorkshire. A wide area around the affected district has been quarantined.

Will the suit case ever come to trial?

King George's civil list was passed in the British House of Commons on Friday.

The London Times announces the constitution of a new body designed to be to English literature what the French Academy is to French.

It is stated that the Lords may seek to gain prestige in Britain by rejecting the accession declaration bill if they find the agitation against it growing.

President Taft in a speech at Eastport, Me., advocated reciprocity with Canada.

Two women were burned to death and a baby fatally burned in a fire at Grand Rapids, Mich., on Thursday.

A revolution has broken out in Honduras.

Seven hundred families of Jews have already been driven from Kley.

An aeroplane at Barcelona was struck by lightning and thrown to the ground in flames.

A diamond weighing over 191 carats has been found in the Premier mine in South Africa.

Twenty-six Acres Cut Near Carman, Manitoba.

A despatch from Carman, Man., says: M. W. H. Elford, farming three miles south of Carman, cut a field of 26 acres of wheat on July 18. The wheat is a new bearded variety known as Hungarian red. This year it will go 18 bushels to

ITALIANS ON STRIKE.

The Civic Laborers Quit Work in Vancouver.

A despatch from Vancouver, B. C., says: Practically all the Italian laborers employed by the city are on strike. An eight-hour day was declared on all city work, but one contractor made his men work nine. The City Council reduced the hours to eight, but also reduced the pay. The gang of seventy-five ceased work and picketed others, with the result that labor was suspended. Wednesday morning the strikers paraded the streets. The police are powerless unless they see force or intimidation being used. The striking Italians declare they will force the others to leave their jobs on pain of death.

man, Manitoba.

A despatch from Carman, Man., says: M. W. H. Elford, farming three miles south of Carman, cut a field of 26 acres of wheat on July 18. The wheat is a new bearded variety known as Hungarian red. This year it will go 18 bushels to the acre, but in an ordinary year will yield 25 to 30 bushels. It has stood the test of drought and the high winds which prevailed this season in a remarkable manner. Last year this wheat matured in 85 days. It matured as early or earlier than fall wheat, and was about the same milling quality as Alberta winter wheat, with the great advantage that it goes about 66 pounds to the bushel. Mr. Elford got a small quantity of wheat several years ago from the Argentine Republic.

TRIPLE DROWNING.

Four Went Out in Boat and Tried to Change Places.

A despatch from Montreal says: There was a triple fatality at the Light, Heat and Power Co. picnic on Thursday at Maple Grove. Four men named Dugas, Pervault, Pelerdeau and Higgins went out on the river for a row, and on changing places in the boat the quartet were thrown into the water. Higgins alone being saved. The other three were not able to swim.

BUSH FIRES IN ONTARIO

Woods Along Turtle River and Gull River Are Being Destroyed.

A despatch from Kenora, Ont., says: Bush fires are burning at intervals of every few miles from Rainy River north to the Grand Trunk Pacific, and already a vast amount of timber has been consumed. A number of islands in the Lake of the Woods have been badly scorched. On Monday the village of Norman, one mile from here, was the scene of a fire of unknown origin which completely destroyed the Rat Portage lumber mill and five houses in the vicinity. Embers, evidently from this fire, almost immediately started a blaze on the

southeast corner of Tunnel Island, and on the mainland, across from the dam and though many from the town and vicinity are doing effective work, the situation is still very dangerous, and precautions are being taken in the town to ward off occasional embers from the fire scene. Turtle River, sixty miles south of Dinorwick, and also Gull River, in the same direction, are being devastated and already miles of timber and sawlogs have been consumed despite the work of the fire rangers and C. P. R. men, who are assisting the fighters.

ANOTHER LARGE INCREASE

Canada's June Trade Totalled Sixty-Six Million Dollars.

A despatch from Ottawa says: The total trade of Canada for June was \$66,000,000, an increase of \$10,254,623 over June of last year. For the first quarter of the present fiscal year the total trade has been \$171,173,690, a comparative increase of \$36,606,000, or over 25 per cent.

Imports for June totalled \$39,795,237, an increase of \$8,363,675 over June of last year. For the three months imports totalled \$109,384,187, an increase of \$27,281,997. Exports of domestic products for the quarter totalled \$57,648,937, an increase of \$8,321,923.

The principal increase in exports was in agricultural products, which show a betterment of nearly six millions as compared with the corresponding period of last year. The customs revenue for June was \$5,596,906, and for the three months \$16,568,411, increases of \$1,044,647 and \$3,657,352 respectively.

has been quarantined.

Repentance soon after green apples is no promise of a new life. Will the suit case ever come to trial?

then, according to Mr. Collingwood Schreiber, Government consulting engineer. In an interview at Edmonton, he says labor is so scarce there is little if any hope of getting the men that could be used.

## RIOTING AT BROCKVILLE

### Crowd Attacks Depot and Several Men Brutally Assaulted.

A despatch from Brockville says: A mob, estimated to number about 1,000 persons, late Friday attacked a number of non-union Grand Trunk employees in the station here, severely assaulted about a dozen of them and badly wrecked the building. Two men had to go to the hospital. Although the crowd had been gathering around the station from about seven o'clock, only two town policemen were on the job, and they were useless. The disorder followed the arrival of the local passenger train from Toronto and a freight. Half a dozen Thiel detectives, a couple of trainmen and Road Foreman Szammer of Belleville were in the station agent's office, when the crowd made an ominous movement in that direction. Those inside bolted the door, but, while some of the crowd used a baggage truck for a battering ram, others began to stone the windows, and others again got out the company's hose and began to flood the office.

The occupants, unable to withstand the siege, came out on the platform, when they were surrounded by the crowd, and struck and kicked and generally assaulted. Then the crowd moved against the telegraph office, where P. F. Wilcox of Toronto, the conductor of the local from Toronto, with two other Toronto men and a despatcher, named Johnson of Belleville, it is said, were sitting. Somebody in the office fired a revolver shot through the window to scare the invaders, but they came right on, forced the men out, and set upon them so savagely that Wilcox had to go to the hospital, suffering from cuts about the head and body.

E. Course, a private detective from Montreal, is also in the hospital. His shirt was soaked with blood when he was admitted. He said he had been hired to act as a special officer to protect trains along the line to Montreal. Wilcox says he was out of employment when he was engaged by the railway in Toronto.

The windows, doors and furniture of the station are practically destroyed.

## NA-DRU-CO Headache Wafers

stop the meanest, nastiest, most persistent headaches in half an hour or less. We guarantee that they contain no opium, morphine or other poisonous drugs. 25c. a box at your druggist's, or by mail from

National Drug and Chemical Co. of Canada, Limited, Montreal.

## MOTOR CARRIAGES

AWARDED DEWAR TROPHY.

The Dewar Challenge Trophy is awarded yearly by the ROYAL AUTOMOBILE CLUB for the most meritorious performance of the year under the general regulations for certified trials.

The New Daimler engine has now been in the hands of the public for nearly 18 months, quite long enough to prove its merit; owners are sending in testimonials by every post and we should like to forward to any person or persons interested a complete set of literature fully explaining this marvelous new motor. Send also for our new illustrated booklet, "The Dewar Trophy and how it was won," a history of the Greatest Engine Test on Record.

The Daimler Motor Co., (1904) Limited,  
COVENTRY, ENGLAND.

### Bunions are sore things.

"Rexall Bunion Ease" is soothing, cooling, relieves the congestion, allays inflammation and gives quick relief. Price 25c and sold in Napanee only at Wallace's Red Cross Drug Store.

### Half Holidays.

We, the undersigned blacksmiths of the town of Napanee, do hereby agree to hold every Wednesday afternoon as a holiday during July and August, commencing July 13th: H. Savage, A. O. Sine, Fred Edgar, D. Benn, W. Hall, G. H. Brown, E. Graham, J. M. Graham, E. Pringle.

### To Trenton on Monday.

Don't forget the Firemen's Excursion to Trenton on Monday next. Boat leaves at 7 a. m. sharp. It is expected that there will be 28 fire companies with their bands at Trenton that day, and the massed band of 250 musicians will be an attraction of itself well worth seeing. Nearly all the tickets are sold, so if you are going you should secure your tickets early.

### His Knee Cap Broken.

Andrew Killoran, whose home is in Tamworth, had the misfortune to fall and fracture his knee-cap on the platform of the railroad station at Smith's Falls. The accident occurred on Monday evening as he was walking across the platform from one train to another. He was brought in on the Bay of Quinte railway Tuesday morning and taken to the Kingston general hospital in James Reid's ambulance.

### Death of a Former Resident.

John Meacham Bogart a most highly respected and well known former resident of Napanee, passed away in Toronto on Sunday last. Deceased was the son of the late John Bogart, of Adolphustown, where deceased's boyhood days were spent on his father's farm. He spent a number of years in the west, where he had varied business interests. He had been in poor health for the past six months and although the best medical aid was consulted the disease could not be arrested. Deceased was about sixty years of age. He leaves one brother, Gilbert Bogart, late postmaster of Napanee, and one sister, Mrs. Phoebe Trumpour, of Adolphustown. The remains were brought to Belleville, on Monday, for interment.

### Ita at the Brisco Opera House.

At the Opera House, Thursday, Friday and Saturday, Aug. 11, 12 13th will appear an attraction that is out of the ordinary, in Ita, the 16 year old Girl Mentalist, who is supported by her own high class and refined company of Six Big Acts Ita's performance appeals to all classes of people, from the laborer to the aristocrat. She caused a decided sensation in Toronto last season while appearing at the Majestic Theatre and last week foretold Mr. J. H. Boudon at Midland of his property being burned—it was destroyed twenty-six hours after she had told him of it. She does a great deal of good by her advice on business changes, marriage trouble, work, lost articles, etc. Her supporting Company includes the best that money can procure. Splendid singing, best of music, electrical dances and changes of moving pictures every night. Parry Sound and Midland say it is one of the best shows that ever appeared there. Summer prices, 10 and 20c. Plan at Jessops drug store.

Mrs. Murphy, of Wolfe Island,  
while attending the funeral of the late  
Michael Hennessy on Monday, at the  
church took a fainting fit. She was  
removed to her home and died during  
the night of heart disease.

## Children Cry FOR FLETCHER'S CASTORIA

The Bay of Quinte Ry. will open  
their new station for business on Mon-  
day morning next. Commencing on  
that date all Bay of Quinte tickets will  
be sold at the new station and all  
freight will be handled at the new  
freight shed adjoining the station.

A sad accident occurred just out of  
Odessa, on Saturday evening, when  
John McEwen, who, in company with  
his brother, Isaac, were returning from  
Kingston, having obtained passage  
with Mr. Foster. Mr. McEwen, who  
was in the rear of the wagon, pitched  
over and broke his neck, death follow-  
ing immediately. The body of the un-  
fortunate man was taken on to Wilton  
to his home.

The Ladies Guild of St.  
John's Church, Selby will  
hold a social at Mr. James  
McCormacks, near Forest  
Mills, on Wednesday even-  
ing August 3rd. Pro-  
gramme, Ice Cream and  
Cake. Admission, 15c.

At her home, near Erinsville, July  
14th, occurred the death of Mrs. Mar-  
garet Kegans. Although she had been  
in poor health for some time death  
was unexpected. She is survived by  
six children, two sons and four daugh-  
ters, Dennis and Mrs. T. Mahoney, of  
Tamworth, Mrs. Michael Barrett, Cam-  
den, Patrick, Maggie and Katie, at  
home. With her own family was a  
grandson, whom she dearly loved.  
All mourn the loss of a kind and lov-  
ing mother. The funeral on Saturday,  
was largely attended by a circle of  
relatives and friends, which followed  
the remains to the Roman Catholic  
church, Centreville, where a solemn  
requiem mass was sung by Rev. Father  
McCarthy, after which the remains  
were placed in the vault to await in-  
terment on Thursday. She will be  
laid in the family plot beside her hus-  
band, who died some years ago.

## Dyspeptic, Bilious

Strong purgatives have killed many  
a good man. Costiveness is bad—vi-  
olent cathartics are worse. If bothered  
with stomach trouble or biliousness,  
try Fig Pills. They are so mild you  
can scarcely feel their action, yet so  
effective that the entire system is  
cleansed of waste. Just try Fig Pills.  
25c a box, or five boxes for \$1.00. For  
sale at all drug stores. Fred L. Hoo-  
per, special agent.

### WILTON.

One of our villagers, John McEwen, met with a tragic death on Saturday, while returning from Kingston, falling from the back of a waggon and breaking his neck. Deceased had been ailing for a few weeks, subject to faint spells, and it is believed that becoming faint had caused his fall. The burial took place Monday afternoon.

On Tuesday afternoon the body of the late Mrs. Albertson, nee Georgia Wallace, daughter of William Wallace, Murvale, was buried in this cemetery.

Mrs. Earl Burt and baby Arthur, are visiting friends in Portland. Mr. Burt returning on Monday after accompanying her there.

Mrs. Ernest Day, Harrowsmith, with her two children, is visiting her aunt, Mrs. Burt.

Mrs. Clement Booth, Rutherford, N. Y., is visiting her mother, Mrs. R. Storms.

Mr. and Mrs. Charles Ward, Colebrook, spent Tuesday at W. H. Neilson's.

The rural telephone line east of the village is nearing completion, some of the houses being supplied with telephones now.

Mrs. Frank Greenland, and Miss Margaret Greenland, Buffalo, are visiting at Erwell Miller's.

#### Attended Divine Service.

The members of L. O. L. No. 358, attended divine service on Sunday afternoon last. The service was held in the commodious building occupied by Bro. Jas. Foster on Dundas street, and a stirring address was delivered by Bro. Rev. Jas. Ansley, W. M. of No. 870. At the end of the proceeding a hearty vote of thanks was tendered the speaker for his enthusiastic and instructive remarks.

#### Try This.

A Port Hopelady has found a sure cure for broken dishes. If the dish to be mended can be tied with a stout string then place it in boiling milk and leave one hour, you can never tell the dish had been broken, and it can afterwards be put in boiling water without the pieces coming apart. This experiment has been tried and proven and many are the broken dishes which were thought to be useless, are now as good as new.

#### Cheap Power.

Negotiations are about concluded by the Electric Light Commissioners with the Trenton Electric and Water Co. and the matter will be ready for submission to the council in a short time. This is a matter which should be pushed ahead as fast as possible and electric power secured from the cheapest source as soon as possible. What has happened to delay the sewer building programme outlined at the council board some weeks ago. It was then stated that work would be begun at once, on the most necessary extensions but the matter seems to be languishing.

#### Trinity Church Excursion.

Wednesday, August 3rd, 1910, is the date fixed for Trinity Church Excursion to Thousand Islands and Alexandria Bay. This is the fifth annual excursion and every year it grows in popularity. No more delightful day's outing could be conceived of. Excursion leaves by Grand Trunk regular train 7.43. At Kingston the change is made to the steamer especially chartered for the occasion and the run is made to the Thousand Island Park where about two hours will be allowed for dinner and sight-seeing. Leaving at 1 p. m. the excursionists are taken down the American channel to Alexandria Bay, returning by the Canadian channel to Kingston in time to catch the regular evening train arriving in Napanee 8.11 p. m. The fare for the round trip is only \$1.00 from Napanee, Kingston and return 75c. Fuller particulars will be given on the large bills.

#### Wednesday Half Holiday.

A Candy Bowl Laxative.

#### TOO HOT TO WORK.

Some of the old members of cow testing associations appreciate the system very much and are realizing a profit by it. In the Shearer, Ont. association, for instance, one man states that he has delivered to the factory almost as much milk from ten cows as he did two years ago from fourteen cows. He has sold one of the ten for \$45.00 for beef. At her best she gave 31 lbs. of milk per day; she is replaced by a cow costing \$50.00, now giving 41 lbs. of milk per day.

This statement shows the immense saving of labor that can be effected by keeping cows selected on their records. It is too hot weather to work round and bother with four unnecessary cows if the smaller herd, as indicated above brings as good a return. If it pays to milk a cow it pays to milk a good one. The herd needs pruning of the dead, unprofitable wood. Dairy records of individual cows show conclusively which to lop off. Blank forms are supplied free of charge on application to the Dairy Commissioner, Ottawa.

#### To keep Ants away.

We have found the article to do it at last. "Sangran Oil" not poisonous and not disagreeable to smell, can be used with perfect safety around pantry shelves etc. get 20c worth at Wallace's Red Cross Drug Store.

## RUPTURE

J. Y. EGAN, Specialist of Toronto  
A WORD OF CAUTION.

Procrastination is the most common error of ruptured people. In most cases they do not realize the risk they are running. You may have been ruptured for some time and not noticed any change for better or worse. But remember, no rupture stands still. Even if not getting larger the bowel is growing fast to the inside, and any day your ordinary truss is liable to slip while lifting or coughing and let more of the bowel escape. In such a case strangulated hernia may result in death. Many people come to me constipated, nervous, irritable, suffering from indigestion and constant colds. They seldom charge this to their rupture, but that is where their ill-health originates. A rupture strains the whole physical organism and is a constant nerve irritant, a breeding place for the germs of typhoid, and frequently causes rheumatism, paralysis and sterility. Your rupture cured will make you feel like a new being, your nerves will recover their normal tone and your rundown condition replaced by vigorous, joyous health. Act at once and remove the daily danger of death which, like a threatening thundercloud, hangs over the head of every ruptured person. Don't delay, to suffer and die. Let me help you live and enjoy life. What I have done for thousands in the past fifty years I can do for you to-day. Awaken to the fact that a cure means to you—viz., immediate security, comfort and a perfect physical condition. This is all yours to-day for the asking. Out-of-town patients can consult me and return home same day relieved of all rupture trouble permanently. No operation, pain or loss of time. Tear off free coupon now.

**Free Consultation Coupon.**  
This coupon, upon presentation to J. Y. Egan, rupture specialist, 321 West-King Street, Toronto, who will visit the towns (on dates named below) will entitle the bearer to free consultation and examination of his or her case. Ask at hotel office for number of my consulting room. Note dates.

**I WILL VISIT**  
Kingston, British American Hotel, July 30th.  
NAPANEE, Paisley House, Monday (all day and evening) 1 day only, August 1st.  
Picton, Globe Hotel, August 2nd.
